Satellite meeting to 2014 CAN-ACN Meeting

May 25, 2014

Speaker profile:

Dr. Ian Brown, PhD, Co-founder and Vice-President, BKIN Technologies

Dr. Brown was recruited in 2002 to lead the development and commercialization of the KINARM robotic system. He has expertise in bringing new biomedical products out of university-based research labs as demonstrated by his former position at the A.E. Mann Institute for Biomedical Engineering at the University of Southern California. Dr. Brown has a B.A.Sc. in Engineering Physics and a Ph.D. in Physiology, both from Queen's University, and performed post-doctoral work at the California Institute of Technology.
