

# Postdoctoral Fellowship in Molecular and Genetic Study of Nociceptive Neural Circuits

We are looking for a qualified individual interested in using molecular and genetic approaches to study nociceptive circuit development and function.

Requirements:

- A recent (less than 1 year ago) doctorate degree in molecular neurobiology or a closely related field
- Experience and expertise in the following fields: developmental biology, molecular neurobiology, neuroscience, cell biology, genetics, neuroanatomy
- Thorough technical knowledge of mouse genetics, immunohistochemistry, molecular biology, neuronal tracing
- Canadian citizenship or permanent residence

Please email your CV to Artur Kania at the following address:
