# 11th Annual CAN-ACN Meeting

Montreal, Québec · May 28 – 30, 2017

#### **ABOUT CAN-ACN**

The Canadian Association for Neuroscience is a community of scientists, researchers and students brought together with the common purpose of representing the interests of Canadian neuroscientists at national and international levels. CAN's mission is to promote communication among neuroscientists throughout Canada, and generate interest and understanding of the importance of scientific research and development.

#### **CAN-ACN Annual Meeting**

Since 2007, the Canadian Neuroscience Annual Meetings have been an important platform for researchers to present their work, generate scholarly debate, and obtain valuable feedback and be informed about the important neuroscience research done across country and abroad. This highly regarded conference is in its 10<sup>th</sup> year.

# The Canadian Association 10<sup>th</sup> Annual Canadian Neuroscience Meeting 2016

#### **CAN-ACN PRESIDENTS 1981 - PRESENT**

Term	Name	Affiliation
1983 — 1985	Alberto Aguayo	McGill University
1985 — 1987	Sergey Fedoroff	University of Saskatchewan
1988 — 1989	Richard B Stein	University of Alberta
1990 — 1991	Robert W Dykes	McGill University
1992 — 1993	Penny Moody-Corbett	Memorial University
1994 — 1995	Harold Atwood	University of Toronto
1996 — 1997	Alain Beaudet	McGill University
1998 — 1999	Andrew Bullock	University of Calgary
2000 — 2001	Vincent F Castellucci	Universite de Montreal
2002 — 2003	P. Ken Rose	Queen's University
2004 — 2005	Valerie MK Verge	University of Saskatchewan
2005 — 2008	Jonathan Dostrovsky	University of Toronto
2008 — 2010	Brian MacVicar	University of British Columbia
2010 — 2012	Yves De Koninck	Universite Laval
2012 — 2014	Samuel David	McGill University
2014 — Present	Douglas Munoz	Queen's University

#### LETTER FROM THE PRESIDENT

#### DEAR COLLEAGUES AND FRIENDS,

It is my pleasure to welcome you to the Canadian Neuroscience Meeting in Toronto in 2016. This year marks a key milestone for CAN-ACN as we celebrate the 10<sup>th</sup> anniversary of the annual meeting and acknowledge some of the individuals who played a large role in the growth and development of CAN-ACN and the annual meeting. Our Scientific Program committee has put together an impressive list of Keynote and Plenary speakers that showcases some of the best of neuroscience research in the world.

I wish to thank all our members who submitted abstracts and session proposals for the annual meeting. It is the quality of these submissions that drives the content and excellence of our meeting. I especially want to thank all our members who have submitted proposals for parallel symposia this year. As you will see in the program, parallel symposia, organized by our members, are a very important part of our meeting, and feature a wide range of research topics.

The CAN meeting is an ideal place to meet and interact with colleagues from across the country. It is also a great place for trainees to present their work, get valuable feedback, and make connections for the future. We also have special mentoring and career development sessions planned for trainees and junior investigators.

I hope you enjoy the meeting, and I look forward to seeing you in person in Toronto.

Best Regards,

Doug Munoz,

President of the Canadian Association for Neuroscience

#### CHERS COLLÈGUES ET AMIS,

Il me fait plaisir de vous accueillir au congrès canadien de neuroscience 2016. Cette année marque une étape clé pour CAN-ACN puisque nous célébrons le 10ème anniversaire du congrès annuel et reconnaissons quelques-unes des personnes qui ont joué un rôle important dans la croissance et le développement de CAN-ACN et de notre congrès. Notre comité du programme scientifique a assemblé une liste impressionnante de conférenciers d'honneur et pléniers qui présenteront un échantillon de la meilleure recherche en neuroscience au monde

Je tiens à remercier tous nos membres qui ont présenté des résumés et des propositions de session pour la réunion annuelle. C'est la qualité de ces soumissions qui définit le contenu et l'excellence de notre congrès. Je tiens particulièrement à remercier tous nos membres qui ont soumis des propositions pour des symposiums parallèles cette année. Comme vous le verrez dans le programme, les symposiums parallèles, organisés par nos membres, forment une partie très importante de notre congrès, et permettent de présenter un large éventail de sujets de recherche.

Le congrès de l'ACN est l'endroit idéal pour rencontrer et interagir avec des collègues de partout au pays. Il s'agit également d'une excellente occasion pour les étudiants et stagiaires de présenter leurs recherches et d'obtenir un feedback important d'experts reconnus. Des sessions spéciales de mentorat et de développement de carrière pour les jeunes chercheurs sont également organisées.

Je vous souhaite un excellent congrès, et j'ai bien hâte de vous accueillir en personne à Toronto!

Bien à vous,

Doug Munoz

Président de l'Association canadienne des neurosciences

#### **CAN-ACN LEADERSHIP**

Elected members govern the Canadian Association for Neuroscience. These members comprise the Board of Directors who in turn elects Officers that comprise the Executive Committee. The Society's Bylaws govern how the Board manages the Society.

#### **Executive Committee:**

President: **DOUG MUNOZ**, Queen's University

Vice-president

(President-elect): FREDA MILLER, University of Toronto
Secretary: KATALIN TOTH, Université Laval
Treasurer: ELLIS COOPER, McGill University

#### **Board Members:**

Past President: SAMUEL DAVID, McGill University

CHARLES BOURQUE, McGill University
WILLIAM COLMERS, University of Alberta
EDWARD RUTHAZER, McGill University
MELANIE WOODIN, University of Toronto

#### **2016 Scientific and Local Program Committee**

Conference Chair **DR. KATHLEEN CULLEN**Professor, Department of Physiology,
McGill University

**DR. JAIDEEP BAINS**Professor, Physiology & Pharmacology,
University of Calgary

Co-chair

Local Organizing Committee Chair **DR. MELANIE WOODIN**Associate Professor, Cell & Systems Biology
University of Toronto

#### **Committee Members**

**GAUTAM AWATRAMANI** University of Victoria JOHN HOWLAND University of Saskatchewan **SHERNAZ BAMJI** University of British Columbia STEFAN KOHLER University of Western Ontario MAURICE CHACRON McGill University **NEIL MAGOSKI** Queen's University JEAN-FRANÇOIS CLOUTIER McGill University **SARAH MCFARLANE** University of Calgary **JODY CULHAM** University of Western Ontario **CATHERINE RANKIN** University of British Columbia

#### **2016 Advocacy Committee**

Advocacy Chair **KATALIN TOTH** Université Laval

#### **Committee Members**

JAIDEEP BAINS

#### **CAN-ACN Administration**

#### **ASSOCIATION SECRETARIAT & CONFERENCE MANAGEMENT**

secretariat@can-acn.org

#### PODIUM CONFERENCE SPECIALISTS

- Marischal De Armond
- Michelle Smith
- Gabriela Dominguez
- · Heather Reive

#### COMMUNICATIONS DIRECTOR AND WEBMASTER

info@can-acn.org

• Julie Poupart

#### **Membership Information**

CAN membership is open to all scientists, principal investigators and students actively involved in neuroscience research from across Canada and around the world. CAN membership dues are paid annually and cover the calendar year from September 1st to August 31st.

#### **Benefits**

CAN-ACN membership includes the following benefits:

- Eligibility to submit or sponsor communications at CAN Scientific meetings
- A significant reduction on registration for our annual meeting
- Networking opportunities
- The possibility of advertising positions and meetings on the CAN-ACN website
- A forum to exchange information with colleagues and the general public
- Eligibility for CAN-ACN prizes and awards
- Members, Honorary Members and Emeritus Members, but not Student Members or Corporate Members, shall have the right to vote at any duly constituted business meeting of the Association and shall have the right to hold office in the Association.

TO BECOME A CAN-ACN MEMBER PLEASE VISIT US AT THE REGISTRATION DESK TODAY.

#### **GENERAL CONFERENCE INFORMATION**

#### **Conference Venue**

#### **SHERATON CENTRE TORONTO HOTEL**

123 Queen Street West, Toronto, ON M5H 2M9 All conference sessions will take place in this location.

#### Registration

Annual Conference registration fees include access to all sessions including panel, symposium, and poster sessions. Registration also includes 2 daily refreshment breaks.

#### Name Badges

Your name badge is your admission ticket to the conference sessions, coffee breaks, and receptions. Please wear it at all times. At the end of the Conference we ask that you recycle your name badge in one of the name badge recycling stations that will be set out, or leave it at the Registration Desk.

#### **LOST NAME BADGES:**

#### There is a \$25 replacement fee for any lost or missing name

**badges** — If you've lost your name badge, visit the registration desk for a replacement as soon as possible.

#### **Registration and Information Desk Hours**

The CAN-ACN Registration and Information Desk, located in the Grand Ballroom Foyer will be open during the following dates and times:

Sunday, May 29	8:00 AM to 8:00 PM
Monday, May 30	8:00 AM to 7:00 PM
Tuesday, May 31	8:00 AM to 7:00 PM
Wednesday, June 1	8:00 AM to 4:00 PM

If you need assistance during the conference, please visit the Registration Desk.

#### **Poster Information**

#### SET-UP / REMOVAL

There are three Poster Sessions during the Meeting and posters have been allocated to one of the sessions based on poster themes. Poster presenters must set-up and remove their posters during the following times.

#### POSTER SESSION 1 Monday, May 30

Poster hours	10:15 - 10:45 AM
(lunch on own — posters will remain open)	12:00 PM - 1:30 PM
Poster hours	3:30 - 5:30 PM
Poster set-up:	
Sunday, May 29:	7:00 - 8:00 PM
Monday, May 30:	7:30 - 8:30 AM
Removal of all posters by:	7:00pm on May 30

#### POSTER SESSION 2 Tuesday, May 31

Removal of all posters by:

Poster hours	10:15 — 10:45 AM
(lunch on own — posters will remain open)	12:00 PM - 1:30 PM
Poster hours	3:30 - 5:30 PM
Poster set-up:	
Tuesday, May 31:	7:30 - 8:30 AM

7:00pm on May 31

Poster hours 10:15 – 10:45 AM (lunch on own – posters will remain open) 12:00 PM – 1:30 PM Poster hours 1:30 – 3:30 PM

Poster set-up:

Wednesday, June 1: 7:30 – 8:30 AM **Removal of all posters by:** 5:00pm on June 1

Information on Poster Authors, Poster Numbers and Poster Titles begins on page 31. Digital copies can be downloaded from the Member Only section of the <u>CAN-ACN Website</u>. Posters can also be browsed using the CAN App by downloading the app from the Apple Store/Google Play Store.

#### WiFi Information

CAN is pleased to offer complimentary WiFi this year.

POSTER SESSION 3 Wednesday, June 1

Network: Sheraton Meetings Network

Password: CAN2016

Please note the wireless is good for basic internet usage but it is not strong enough for streaming videos or social media usage.

#### **Message Board**

For your convenience, a Message Board will be located near the Registration Desk. Feel free to leave messages of interest to other conference participants.

#### Staff

CAN-ACN staff from Podium Conference Management can be identified by ribbons on their name badges. Feel free to ask anyone of our staff for assistance. For immediate assistance please visit us at the Registration Desk.

#### **Nearby Amenities**

**Link Café** — Opens at 6:00am daily and can be found in the Lobby Level of the Sheraton Centre

**BnB Restaurant** — Open from 6:30am — 1:00am daily and can be found in the Lobby Level of the Sheraton Centre

**Queen Mother Café** – 208 Queen Street West (5 minute walk)

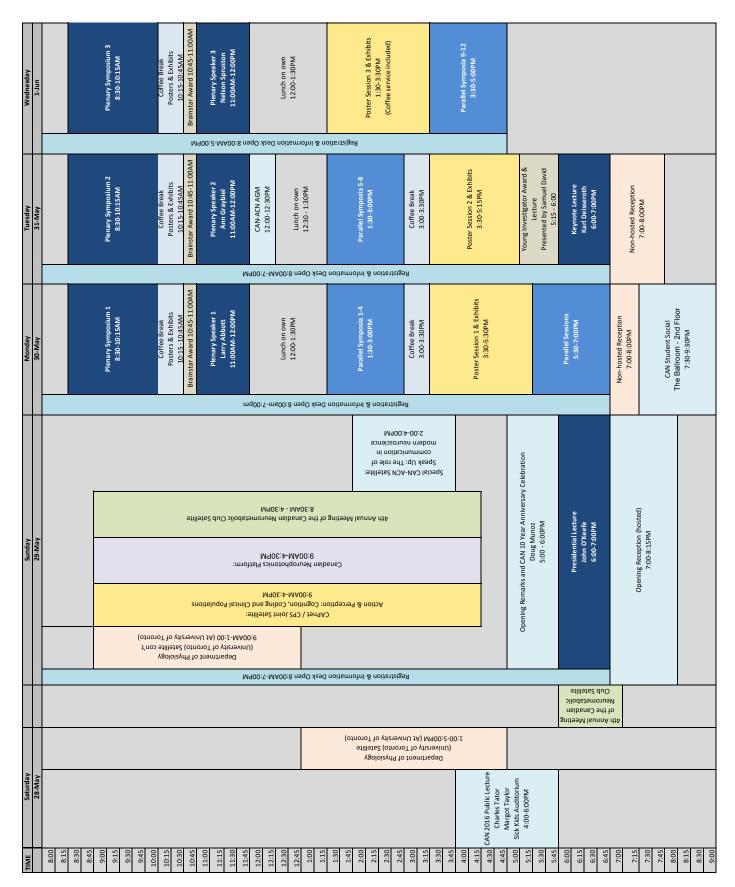

**Longo's Supermarket** – 111 Elizabeth Street (7 minute walk)

**Underground Food Court** – (5 minute walk)

Bannock - 401 Bay Street (3 minute walk)

The Sheraton Centre Toronto Hotel is a newly renovated hotel in the heart of downtown Toronto. With multiple food and beverage options, conveniently connected to the financial and entertainment districts, and with a two acre Waterfall Garden, the Sheraton Centre Toronto is sure to provide a distinct Toronto experience.

#### PROGRAM AT A GLANCE

#### 2016 CAN YOUNG INVESTIGATOR AWARDEE

The Canadian Association for Neuroscience (CAN) is proud to announce that **MATTHEW HILL**, from The Hotchkiss Brain Institute, University of Calgary, has been awarded the 2016 CAN Young Investigator Award for the 10<sup>th</sup> Annual Canadian Neuroscience Meeting in Toronto, Ontario.

Sponsored by:

#### **ONTARIO BRAIN INSTITUTE**

The Young Investigator Award Lecture will take place on Tuesday, May 31 from 5:30pm — 6:00pm in the Grand Ballroom East.

#### MATTHEW HILL

The Hotchkiss Brain Institute, University of Calgary

Dr. Matthew Hill's research has deepened our understanding of how the brain responds and adapts, or fails to adapt, to stress. His research has helped demonstrate the important role of the endocannabinoid system in buffering stress response and regulating emotional response in the brain. His

pioneering work with rodents has demonstrated that exposure to chronic stress results in a collapse of the endocannabinoid system. He also showed that enhancing the endocannabinoid system produced behavioral changes suggesting reduced anxiety and active coping responses to stress, and that conventional antidepressants use the endocannabinoid system to dampen activation of the stress response. This body of work has led to the hypothesis that deficient endocannabinoid signaling may be an underlying cause of stress-related psychiatric conditions such as depression and posttraumatic stress disorder, or PTSD.

In addition to showing that endocannabinoids regulate stress, Dr. Hill has worked to elucidate the mechanisms through which they act. In a series of highly-cited publications he showed that endocannabinoid signaling can prevent the activation of the stress response, that stress hormones recruit endocannabinoids to terminate the stress response, and that endocannabinoid signaling is required to modulate the excitability of stress circuits, thereby contributing to the ability of the brain to adapt to repeated exposure to stress.

His current work focuses on understanding how chronic stress hinders endocannabinoid signalling to generate pathological anxiety. The insight Dr. Hill has gained through research done with animals has prompted him to collaborate with clinicians to investigate the role of endocannabinoids in humans. This work has shown that the endocannabinoid system regulates stress response in humans and that this system is defective in individuals suffering from major depression or PTSD. This research has led to the exploration of new therapeutic avenues, investigating the potential of endocannabinoids for the treatment of these psychiatric illnesses.

Matthew Hill's productivity, both in terms number and quality of scientific publications, is impressive. He has published in top journals in the field such as the Journal of the American Medical Association (JAMA), Nature, Nature Neuroscience, Neuron, the Journal of Neuroscience and Molecular Psychiatry. Dr. Hill's leadership in research, the originality and quality of his work, and the impressive level of recognition he has gathered internationally make him stand out as an exceptional young neuroscientist. The Canadian Association for Neuroscience is very proud to present Dr. Hill with the 2016 CAN Young Investigator Award.

#### ABSTRACT:

### Endocannabinoid Signaling in the Amygdala and the Regulation of Stress and Anxiety.

Endocannabinoids (eCB) have a well documented inhibitory role over the stress response, whereby impairments in eCB signaling enhance, and facilitations in eCB signaling constrain, neurobehavioral responses to stress. Several converging lines of evidence have suggested that the amygdala may represent a hub by which eCB signaling exerts control over the stress response. Our ongoing work has sought to identify the mechanisms by which interactions between stress and the eCB system in the amygdala govern the stress response. Using a combination of approaches, our studies have demonstrated that exposure to acute stress results in a rapid decline of anandamide (AEA) content within the amygdala, which is mediated by an increase in the AEA-hydrolyzing enzyme fatty acid amide hydrolase (FAAH). This stress-induced change in FAAH activity appears to be mediated by the release of the stress-promoting neuropeptide corticotropin releasing hormone (CRH) and its subsequent activation of the CRHR1 receptor. This interplay between CRH and FAAH regulates the generation of anxiety states, and seems to also contribute to extra-hypothalamic regulation of the HPA axis. At a cellular level, the ability of AEA signaling to gate activation of the amygdala in response to stress appears to occur through an inhibition of afferent corticothalamic glutamatergic inputs. Through translational genetic studies, it has been demonstrated that a common mechanism appears to regulate stress-induced activation of the amygdala and the generation of anxiety states in humans as well. Together, these data create a template by which we can understand how eCB signaling can temper neural activity in the amygdala to modulate changes in both anxiety and HPA axis activation following exposure to stress.

#### **BRAIN STAR AWARDEE TALKS 2016**

Each year, since 2001, the Institutes for Neuroscience, Mental Health and Addiction (INMHA) of the Canadian Institutes of Health Research (CIHR) selects up to 15 great research articles and award their authors a Brain Star Award. These awards were designed to recognize the excellence of research done in Canada by students and trainees in all fields and disciplines covered by INMHA, to promote research careers in neuroscience, mental health and addiction in Canada, and to stimulate the participation of trainees in the planning and development of INMHA activities.

The top three Brain Star Awardees are invited by INMHA and CAN to present their award-winning research at the Canadian Neuroscience Meeting. INMHA also gives the recipient a prize of \$1,500, and recognition on the INMHA website and communications.

Department of Biochemistry and Goodman Cancer Research Centre, McGill University | ruifeng.cao@mail.mcgill.ca

#### **MONDAY, MAY 30, 10:45AM**

#### Light-regulated translational control of circadian behavior by eIF4E phosphorylation.

The circadian (~24 h) clock is continuously entrained (reset) by ambient light so that endogenous rhythms are synchronized with daily changes in the environment. Light-induced gene expression is thought to be the molecular mechanism underlying clock entrainment. mRNA translation is a key step of gene expression, but the manner in which clock entrainment is controlled at the level of mRNA translation is not well understood. We found that a light- and circadian clock-regulated MAPK/MNK pathway led to phosphorylation of the cap-binding protein elF4E in the mouse suprachiasmatic nucleus of the hypothalamus, the locus of the master circadian clock in mammals. Phosphorylation of elF4E specifically promoted translation of Period 1 (Per1) and Period 2 (Per2) mRNAs and increased the abundance of basal and inducible PER proteins, which facilitated circadian clock resetting and precise timekeeping. Together, these results highlight a critical role for light-regulated translational control in the physiology of the circadian clock.

#### RAVI L. RUNGTA PHD

Djavad Mowfaghian Centre for Brain Health, University of British Columbia | <a href="mailto:rlrungta@gmail.com">rlrungta@gmail.com</a>

#### **TUESDAY, MAY 31, 10:45AM**

#### The cellular mechanisms of neuronal swelling underlying cytotoxic edema.

Cytotoxic brain edema triggered by neuronal swelling is the chief cause of mortality following brain trauma and cerebral infarct. Using fluorescence lifetime imaging to analyze contributions of intracellular ionic changes in brain slices, we find that intense Na(+) entry triggers a secondary increase in intracellular Cl(-) that is required for neuronal swelling and death. Pharmacological and siRNA-mediated knockdown screening identified the ion exchanger SLC26A11 unexpectedly acting as a voltage-gated Cl(-) channel that is activated upon neuronal depolarization to membrane potentials lower than -20 mV. Blockade of SLC26A11 activity attenuates both neuronal swelling and cell death. Therefore cytotoxic neuronal edema occurs when sufficient Na(+) influx and depolarization is followed by Cl(-) entry via SLC26A11. The resultant NaCl accumulation causes subsequent neuronal swelling leading to neuronal death. These findings shed light on unique elements of volume control in excitable cells and lay the ground for the development of specific treatments for brain edema.

#### PIERRE MATTAR PHD

Institut de recherches cliniques de Montreal | pierre.mattar@ircm.qc.ca

#### WEDNESDAY, JUNE 1, 10:45AM

#### A conserved regulatory logic controls temporal identity in mouse neural progenitors.

Neural progenitors alter their output over time to generate different types of neurons and glia in specific chronological sequences, but this process remains poorly understood in vertebrates. Here we show that *Casz1*, the vertebrate ortholog of the Drosophila temporal identity factor castor, controls the production of mid-/late-born neurons in the murine retina. *Casz1* is expressed from mid/late stages in retinal progenitor cells (RPCs), and conditional deletion of Casz1 increases production of early-born retinal neurons at the expense of later-born fates, whereas precocious misexpression of *Casz1* has the opposite effect. In both cases, cell proliferation is unaffected, indicating that *Casz1* does not control the timing of cell birth but instead biases RPC output directly. Just as Drosophila castor lies downstream of the early temporal identity factor hunchback, we find that the hunchback ortholog *lkzf1* represses *Casz1*. These results uncover a conserved strategy regulating temporal identity transitions from flies to mammals.

#### **SPECIAL MEETINGS & SOCIAL EVENTS**

#### **SATURDAY, MAY 28**

4:00 - 6:00 PM

**CAN 2016 PUBLIC LECTURE** 

Auditorium of the Peter Gilgan Centre for Research and Learning at SickKids

Impact of innate vs. acquired brain disorders

686 Bay Street, Toronto, ON

Why Concussions are a Significant Public Health Concern
CHARLES H TATOR, Krembil Research Institute, University of Toronto

and

Probing the autistic brain

MARGOT TAYLOR, Hospital for Sick Children, University of Toronto

**SUNDAY, MAY 29** 

6:00 – 7:00 PM

PRESIDENTIAL LECTURE

Grand Ballroom East

Sponsored by **Hotchkiss Brain Institute JOHN O'KEEFE**, University College London

Hippocampus as a cognitive map: past, present, and future

7:00 - 8:15 PM

**OPENING RECEPTION** (hosted)

Grand Ballroom Foyer

Join us for a special celebration of 10 years of CAN! Enjoy good food while catching up with old friends and making

new ones to start off the annual meeting.

**MONDAY, MAY 30** 

7:00 - 8:00 PM

**RECEPTION** (non-hosted)

Grand Ballroom Foyer

Grab a quick drink in the Grand Ballroom Foyer with your colleagues at the end of the first day. Bars will be set up in the Foyer space to make evening plans, discuss the day and network with fellow attendees.

7:30 – 9:30 PM The Ballroom **CAN STUDENT SOCIAL** 

2nd Floor, 143 John Street

(Corner of Richmond and John Street)

Located only a short walk of 10 minutes from the hotel. First drink is on complimentary for students.

#### SPECIAL MEETINGS & SOCIAL EVENTS

#### **TUESDAY, MAY 31**

12:00 - 12:30 PM CAN-ACN ANNUAL GENERAL MEETING

Grand Ballroom East All CAN members are invited to attend

6:00 – 7:00 PM KEYNOTE LECTURE

Grand Ballroom East Sponsored by Sick Kids Program in Neuroscience & Mental Health and

The Center for Brain & Mental Health KARL DEISSEROTH, Stanford University

Integrated brainwide structural and functional analysis

7:00 – 8:00 PM RECEPTION (non-hosted)

Grand Ballroom Foyer Grab a quick drink in the Grand Ballroom Foyer with your colleagues at the end of the second day. Bars will be set

up in the Foyer space to make plans and discuss the day. Enjoy the last evening of CAN with your colleagues.

7:00 – 8:30 PM PARKINSON SOCIETY OF CANADA – DONALD CAYNE RECEPTION AND LECTURE

Osgoode East Ballroom (Pre-Event Registration required)

Join the Parkinson Society of Canada for the Donald Cayne Reception and Lecture.

7:30 PM CANADIAN ACTION AND PERCEPTION NETWORK (CAPNET) SOCIAL

**C'est What** (everyone welcome)

Food provided and a cash bar

Restaurant and Beer Garden 67 Front Street East at Church Please join us for a social evening at C'est What! Limited food and a cash bar will be available.

We specialize in planning, organizing and delivering exceptional international scientific, academic and research conferences.

Podium offers effective and efficient conference management solutions through a range of conference tools, conference planning, and conference marketing services.

#### Conference Management, Planning and Delivery

From idea conception through to conference delivery and the post review stage, we are here to help you deliver an outstanding conference.

#### Website Design, Hosting & Maintenance

Our conference website service engages with your conference to focus on creating a comprehensive and specialized website designed to describe, promote and generate conference leads and reach your audience.

#### Online Registration, Abstract, Membership and Exhibit Booth Management

With our range of conference tools, you will be able to find efficient solutions to that save precious administrative and volunteer hours, freeing up your staff to focus on other critical areas.

#### Association Management

We provide your association with the ability to focus on core responsibilities and roles related to organizational growth while a system is in place to manage the daily affairs and activities.

To learn more about us or to secure our services for your conference or organization, please call 1 800 472-7644 or e-mail us: office@podiumconferences.com.

#### **CAN SATELLITE MEETINGS**

Each year, the opportunity for like-minded groups to hold a Satellite Meeting at CAN-ACN is offered. This year, CAN-ACN is pleased to offer the following satellite meetings. If you or a group you are involved in are interested in holding a satellite meeting at future CAN-ACN meetings, please stop by the registration desk to speak to a member of the planning team.

#### **SATURDAY MAY 28**

#### 1:00 PM - 5:00 PM

#### UNIVERSITY OF TORONTO PHYSIOLOGY DEPARTMENT SYMPOSIUM

McLeod Auditorium and Stone Lobby of the Medical Science Building at the University of Toronto

This symposium will bring together outstanding faculty and trainees associated with the Dept currently or in the past to highlight glorious accomplishments in the past 25 years and prospective outlooks of the future; to honor several senior neuroscientists who have made tremendous contributions to the field and commemorate the late John F MacDonald and Hubert van Tol; and most importantly, to discuss emerging horizons of new areas, ranging from fundamental mechanisms of synaptic transmission, plasticity and behavior to stem cells therapy and translational medicine to treat stroke, pain and other neurological and neuropsychiatric disorders.

#### 6:00 PM – Open Keynote by Martin Myers

Cedar Room

#### **4TH ANNUAL MEETING OF THE CANADIAN NEUROMETABOLIC CLUB**

Annual meeting gathering Canadian researchers working on CNS controls of appetite, energy metabolism, energy expenditure and related pathologies such as obesity and eating, mood and neurological disorders. Keynote lecture of Martin Myers on Saturday evening. All day short talks by trainees will be held on Sunday May 29<sup>th</sup>.

#### **SUNDAY MAY 29**

#### 9:00 AM - 1:00 PM

#### UNIVERSITY OF TORONTO PHYSIOLOGY DEPARTMENT SYMPOSIUM

McLeod Auditorium and Stone Lobby of the Medical Science Building at the University of Toronto

# **8:30 AM – 4:30 PM** Osgoode Ballroom East

#### 4TH ANNUAL MEETING OF THE CANADIAN NEUROMETABOLIC CLUB

#### 9:00 AM — 4:45 PM Grand Ballroom Centre

# CAPNET-CPS CAN SATELLITE SYMPOSIUM "ACTION & PERCEPTION: COGNITION, CODING AND CLINICAL POPULATIONS"

This one-day satellite symposium focuses on perception and sensorimotor processes underlying the control of vision and movement in healthy and clinical populations.

It is jointly organized by the Canadian Action and Perception Network (CAPnet), a neuroscience research consortium that focuses on sensation, perception, and movement control, and by the Canadian Physiological Society (CPS).

#### 9:00 AM - 4:30 PM

Grand Ballroom West

#### A SHORT COURSE BY THE CANADIAN NEUROPHOTONIC PLATFORM

One of the greatest challenges of modern science is to decipher the functional connectome of nature's most complex organ, the human brain. A key to success in this effort is to develop and exploit technologies that allow us to probe and manipulate brain microcircuits from the level of single synapses — and even nanoscale substructures within synapses — to entire circuits in the intact brain in behaving animals. Light-based tools represent the enabling technology in this endeavour. An all-day short course to articulate new methods and applications of light microscopic imaging and optogenetic manipulation of nervous system tissues. Optogenetics topics include: optogenetic probe development, optogenetic activation and inhibition, with emphasis on region selective expression, light, and probe delivery. Imaging topics include: in vivo approaches (2-photon fast scanning, wide-field), super-resolution imaging, and methodologies for assessing the structure and function of large brain networks. Data analysis topics include visualization of activity in large networks, and image processing strategies to improve light microscopic images.

#### 2:00 PM - 4:00 PM

McLeod Auditorium and Stone Lobby of the Medical Science Building at the University of Toronto

#### SPEAK UP: THE ROLE OF COMMUNICATION IN MODERN NEUROSCIENCE

Whether you are trying to write an effective review article, talk about your work at a conference, or start a blog, science communication is a vital part of modern neuroscience. That's why it's important to understand the many roles that concise, skillful communication has in our science, and the ways we can use science communication to both develop professionally and increase the impact of our science in society. This session will include a series of presentations from researchers and professional science communicators on the roles of communication in neuroscience, and the many paths to a career in science communication. The presentations will be followed by a discussion panel and question and answer period.

#### **SUNDAY, MAY 29**

#### PRESIDENTIAL LECTURE

JOHN O'KEEFE, University College London

Hippocampus as a cognitive map: past, present, and future.

Sponsored by:

#### **HOTCHKISS BRAIN INSTITUTE**

Locating ourselves in familiar environments, navigating flexibly around those environments, and remembering where important objects can be found in them represent some of the most fundamental cognitive tasks that the brain performs.

In the first part of my talk, I will describe the discovery of the place cells and how they led to the formulation of the idea that the hippocampus was the neural substrate for a cognitive map.

In the second part I will summarise our current understanding of the components of the map: the place, direction, grid and boundary cells in the hippocampal formation. In addition to providing inputs for the construction of place representations, the grid cells appear to be good candidates to provide the distance metric for the map although recent evidence from our own lab suggests they may not be able to do this in all environments.

In the third part, I will look a little bit into the future and describe some of the emerging technologies which I think will give us a greater insight into how the networks of cells in the hippocampal formation cooperate together to provide spatial representations.

#### MONDAY, MAY 30

#### PLENARY SYMPOSIUM

Chair: **FRANCES SKINNER**, Krembil Research Institute/UHN and University of Toronto

#### Toward Theoretical and Experimental Synergies in Neuroscience

While it is abundantly clear that modeling and theory is needed in neuroscience, it is not always clear how to bring about synergies with experiment. I will briefly describe some of my older work along with recent work from my lab as examples of such synergy and its evolution.

#### MAURICE CHACRON, McGill University

#### Cracking the neural code

Understanding how neurons process sensory information in order to give rise to behavioral responses (i.e. the neural code) remains a central problem in neuroscience. Here I will highlight some of our recent advances towards understanding neural coding that have been successful because of a tight integration between experimental and theoretical approaches in both the electrosensory system of weakly electric fish and the vestibular system of

macaque monkeys. These two sensory systems appear to be quite different at first glance: one senses electricity while the other senses movement. Despite these differences, I will show that the neural coding strategies used by both systems are not so different from one another when the statistics of the natural electrosensory and vestibular environments are actually taken into account. I will then show how simple phenomenological models can explain these coding strategies and their importance in establishing a paradigm shift towards understanding neural coding in these two systems. These approaches are likely to shed new insights into developing general theories of neural coding applicable across systems and species.

#### **GAUTAM AWATRAMANI**, University of Victoria

#### The Fine Balancing Act of GABAergic/Cholinergic Retinal Starburst Amacrine Cells

Over the last 25 years, a surprisingly large number of neurons with the ability to co-release both fast excitatory and inhibitory transmitters have been identified throughout the brain. However, the computational benefits of dual transmitter release remain poorly understood. It is possible that inhibition and excitation arising from a common source leads to cancellation. Alternately, co-transmission of inhibitory/excitatory transmitters may allow neural networks to maintain balanced states, especially under limiting conditions where network variability is high. Here, I will address the role of co-release of ACh and GABA by starburst amacrine cells, which are integral components of the retinal direction-selective circuit. I will discuss how we have combined pharmacology, optogenetics and linear regression methods to estimate the spatiotemporal profiles of GABA, acetylcholine and glutamate signalling evoked by moving stimuli, and formulate a new theory on how the network of starbursts finely controls the balance of inhibition and excitation that shapes directional responses of downstream ganglion cells.

#### FEATURED PLENARY SPEAKER

**LARRY ABBOTT**, Columbia University

#### Sense from Randomness in Neural Circuits

Many neural circuits are interconnected with remarkable precision, but others appear to be wired randomly. How extensive is randomness and how can randomly connected circuits perform useful functions? I will address these questions using experimental data and models from a number of different systems. I will also discuss how a characteristic feature of randomly wired neural populations, small numbers of synapses, optimizes their performance.

#### **TUESDAY, MAY 31**

#### **PLENARY SYMPOSIUM**

Reward learning: neurons, circuits, and behavior

Chair: JONATHAN BRITT, McGill University

Reward seeking and reward consumption in relation to glutamate input to the nucleus accumbens

The decision to allocate effort in pursuit of reward is a function of the nucleus accumbens. Glutamate inputs here likely encode goals and action plans. To gain insight into these signals, we measured pathway specific glutamate input activity in mice during a discriminative reward seeking task using GCaMP-based fiber photometry.

#### **STEVE LAVIOLETTE**, The University of Western Ontario

# Hunting the Brain's Addiction Switch: Implications for Neurobiological and Clinical Approaches to Drug Dependence

The 'disease model' model of addiction has dominated the clinical and pre-clinical realms of drug abuse research for decades. This paradigm considers addiction primarily from the perspective of chronic and static alterations to brain reward circuits, leaving the brain in a permanently altered state of drug dependence and persistent vulnerability to relapse. However, considerable evidence demonstrates that the process of addiction involves discrete molecular and neuronal events occurring both in primary reward processing regions such as the ventral tegmental area, and in neural regions critical for reward-related associative memory formation, such as the amygdala and prefrontal cortex. Equally important, mounting evidence points to the remarkable plasticity of drug-related exposure effects on select brain reward and molecular memory mechanisms, as well as the reversibility of many of these drug-induced neuroadaptations. Using pre-clinical rodent models of opiate addiction, our research program has focused on identifying addiction switching mechanisms in the mammalian brain that control separate and distinct reward and associative memory pathways. We have found that both the primary rewarding effects and associative memories related to opiate exposure depend upon separate neuroanatomical, neuronal and molecular substrates. In turn, these addiction switching mechanisms are controlled by the brains opiate exposure state during either the acute, early rewarding effects of opiates vs. the motivational effects of opiates after dependence and withdrawal has developed. This presentation will discuss the implications of these addiction-related plasticity mechanisms in terms of re-conceptualizing our theoretical, neurobiological and clinical approaches to addiction treatment.

#### **RICK BENINGER**, Queen's University

# Inverse incentive learning: decreased responding to stimuli associated with low dopaminergic neurotransmission

Incentive learning is the acquisition by neutral stimuli of an increased ability to elicit approach and other responses. Inverse incentive learning (IIL) is the loss by stimuli of ability to elicit approach and other responses. When dopamine neurons signal negative prediction error, IIL may take place. IIL is observed

using (paired) rats treated with low dose haloperidol (e.g., 0.25 mg/kg) and tested once daily by placing them with their forepaws resting on a horizontal bar at a height of 10 cm. Paired rats descend immediately during the first session but over sessions latencies gradually increase. Control (unpaired) rats, tested following injection of saline but given haloperidol later in their home cage, continue to descend immediately over sessions. After 10 days, when both groups are tested following injection of haloperidol, increased descent latencies are observed only in the paired group even though both groups have a similar history of 10 haloperidol injections over 10 days. Results confirm the conditioned nature of the effect. The effect is seen with spiroperidol (0.25 mg/ kg) or with bilateral microinjections of haloperidol (10 μg/0.5 μl/side) into the nucleus accumbnes but not dorsal striatum. Using c-Fos immunohistochemistry, lower neuronal counts were observed in the nucleus accumbens core and ventral pallidum of paired versus unpaired or saline control rats following testing all groups with haloperidol after 15 conditioning sessions. D1-like and D3 dopamine receptors have been differentially implicated. IIL may take place when dopamine neuron firing is inhibited and may serve to reduce responsiveness to specific environmental stimuli.

#### FEATURED PLENARY SPEAKER

ANN GRAYBIEL, McGovern Institute for Brain Research at MIT

#### The Striatum and Decision-Making Based on Value

This lecture will review experiments done in non-human primates and rodents suggesting that a circuit interconnecting the medial prefrontal cortex and striatum is differentially engaged in cost-benefit decision-making. This circuit leads through the striosomal system of the striatum toward the dopamine-containing substantia-nigra. This work is leading to the view that the striosome-matrix architecture of the striatum represents an evolutionarily ancient system that likely is associated in humans with emotional states including anxiety. We hope to contribute to an understanding of how these striosomal microcircuits are integrated into forebrain networks modulating movement and emotion.

KARL DEISSEROTH, Stanford University

Integrated brainwide structural and functional analysis

Sponsored by:

SICK KIDS PROGRAM IN NEUROSCIENCE & MENTAL HEALTH AND THE CENTER FOR BRAIN & MENTAL HEALTH

RESEARCH INSTITUTE

Neurosciences & Mental Health

#### PLENARY SYMPOSIA AND KEYNOTE SESSIONS

This talk will address the discovery and engineering of optical tools for precise, high-resolution investigation of intact biological systems, focusing on optogenetics (a technology for precisely controlling millisecond-scale activity patterns in specific cell types using microbial opsin genes and fiberoptic-based neural interfaces) and CLARITY (a technology for creating composites of biological molecules in tissue covalently linked to polymer hydrogels-- typically acrylamide-related-- allowing removal of unlinked tissue elements to create transparency and accessibility to macromolecular labels; the resulting new structure allows high-resolution optical access to structural and molecular detail within intact tissues without disassembly). The talk will focus on fundamental biochemical and structural discoveries regarding the operation of channelrhodopsins, strategies for targeting opsins and light to meet the constraints of the freely-behaving mammal, engineering of opsin genes spanning a range of optical and kinetic properties, development of high-speed behavioral and neural activity-readout tools compatible with real-time optogenetic control, recent advances in imaging of clarified tissue, and applications of these tools for circuit-based insight into motivated behaviors.

#### **WEDNESDAY, JUNE 1**

#### **PLENARY SYMPOSIUM**

Signal integration and plasticity

Chair: : ROGER THOMPSON, University of Calgary

#### Non-ionotropic functions of NMDA receptors

In the classical view, the NMDA receptor requires ligand binding (glutamate and glycine) in conjunction with membrane depolarization to open its ion channel and signal. I will discuss a new signalling modality where the NMDA receptor can activate downstream effectors upon ligand binding but without its ion channel activity.

#### KATALIN TOTH, Université Laval

#### Presynaptic calcium dynamics and information transfer at hippocampal mossy fibres

Presynaptic terminals play a key role in the translation of presynaptic firing patterns to a neurotramsitter release profile. Unique features of the presynaptic terminal will determine for example whether repeated firing leads to increased (facilitation) or decreased (depression) neurotransmsitter release. The process of signal translation is largely defined by presynaptic calcium dynamics. Neuronal calcium elevations are shaped by several key parameters, including the properties, density, and the spatial location of voltage-gated calcium channels (VGCCs). Short-term plasticity is synapse-specific, the same firing pattern is 'inetrpreted' differently by various neurons. What is the structural and functional reason of this diversity? How do the same building blocks endow terminals with synapse-specific features? We identified two distinct presynaptic mechanisms that are involved in short-term facilitation in hippocampal mossy fibers. The combination of multivesicular release and the recruitment of additional release sites act together to increase glutamate release during burst activity. This is supported by the compartmentalized

spatial profile of calcium elevations in boutons and helps to expand the dynamic range of mossy fibers information transfer. We also identified the specialized roles different types of VGCCs play in neurotrmanitter release. N-type VGCCs permit fast glutamate release at a limited number of release sites and support short-term facilitation by enhancing multivesicular release through close association with active zones. In contrast, Ca2+ entry via P/Q-type VGCCs promotes the recruitment of additional release sites through activity-dependent homogenization of Ca2+ elevations. This is made possible by the strategic distribution of P/Q-type VGCCs further away from active zones. Altogether, our results highlight the specialized contribution of P/Q- and N-types VGCCs to neurotransmitter release.

#### KURT HAAS, University of British Columbia

#### In vivo imaging of brain circuit refinement

How neural circuits capable of complex information processing are formed remains a leading question in developmental neuroscience. Specifically, it remains unclear to what extent, and how, activity-dependent mechanisms interact with intrinsic genetic patterning. Functional circuit formation requires appropriate growth of each neuron's elaborate dendritic and axonal arbors and precise selection of hundreds to thousands of synaptic partners. We study these events using direct, rapid time-lapse imaging of neuronal growth, synaptogenesis and encoding in the awake developing brain, and post-imaging comprehensive quantification of large 4D datasets. We find that growth and connectivity of visual brain circuits arises through a program of experience-driven self-organization following rules that optimize encoding of the stimuli encountered. These rules act at the levels of growing dendritic processes and their synapses, but are influenced by tuning of neuronal firing. While shedding light on normal development, these mechanisms provide insight to the origins of neurodevelopmental disorders in which aberrant synaptic transmission drive abnormal growth and connectivity.

#### PLENARY SPEAKER

**NELSON SPRUSTON**, Janelia Research Campus

#### Neuronal Diversity and Complexity in the Hippocampus

The hippocampus plays a crucial role in learning and memory. In rodents, this function is manifested in both spatial and emotional memories, which are thought to be encoded in the dorsal and ventral aspects of the hippocampus, respectively. Although the cellular organization of the hippocampus has been extensively studied using traditional anatomical methods, the diversity of cell types that comprise the circuit can now be probed with modern molecular, genetic, anatomical, and physiological approaches. My lecture will outline our progress toward using these techniques to explore the cellular organization and function of the hippocampus. We have identified subclasses of the major cell types in the hippocampus and we are relating the key molecular, anatomical, and functional features of these cell types, with the long-term goal of understanding how the menagerie of cell types works together to produce sophisticated functions such as spatial maps and memories. About half of the talk will feature new, unpublished data.

#### PARALLEL SYMPOSIA

Please note: the individual abstracts of all symposium presentations listed below are available on the CAN Conference App, and on the CAN-ACN website.

#### **MONDAY, MAY 30**

#### SYMPOSIUM 1: Voltage-gated ion-channels of the mammalian central nervous system

Chair: **DEREK BOWIE**, McGill University

#### Overview:

Voltage-gated ion-channels (VGICs) are a family of signaling proteins expressed throughout the developing and adult mammalian brain that are critical for its normal function but also implicated in many disorders, from pain sensation and epilepsy to dysfunction of immune cells. The symposium on "Voltage-gated ion-channels of the mammalian CNS" brings together 4 speakers whose work is at the forefront of this field of study. Dr. Lyanne Schlichter will discuss the role of VGICs in the activation of microglia, the resident immune cells of the brain. Dr. Terry Snutch will present his latest results on voltage-gated calcium channels in epilepsy and migraine. Bowie lab graduate student Ryan Alexander will present data on a new role for TTX-resistant sodium channel in the cerebellum. Finally, Dr. Ray Turner will describe how T-type calcium channels form complexes with specific potassium channels to effect multiple forms of control over cell excitability and signal processing.

#### Speakers:

LYANNE SCHLICHTER, University of Toronto

Expression and regulation of K+ channels that control microglia functions

TERRY SNUTCH, University of British Columbia

New Insights into Familial Hemiplegic Migraine Type-1

RYAN ALEXANDER, McGill University

# SYMPOSIUM 2: Structural and functional features of neural connectivity and plasticity in emerging and mature networks

Chair: **JEAN-CLAUDE BÉÏQUE**, University of Ottawa

Sponsored by: CENTRE DE RECHERCHE INSTITUT UNIVERSITAIRE EN SANTÉ MENTALE DE QUEBEC

#### Overview:

Specialized information processing in neural networks is critically dependent on the fine-scale organization of synaptic connectivity. This symposium will highlight recent advances on our understanding of how specific structural features of connectivity are acquired during key developmental periods and how they regulate processing properties in mature networks. Dr. Bamji will begin the session by presenting data on the molecular mechanisms underlying activity-mediated synapse formation and plasticity. Dr. Lefebvre will then describe how neurons use a large family of recognition molecules to discriminate self from non-self for proper coverage of their dendritic territory. Dr. Béïque will follow and describe how developing dendrites encode spatiotemporal features of synaptic inputs and how these mechanisms spatially regulate synaptic connectivity. Dr. Araya will close the session by discussing how the structural plasticity of dendritic spines influences their electrical properties and how this ultimately regulates the transmission, integration and storage of information in mature neurons.

#### Speakers:

SHERNAZ BAMJI, University of British Columbia

Regulation of synapse form and function through palmitoylation

JULIE LEFEBVRE, University of Toronto

Spatiotemporal feature detection and plasticity rules in emerging neural networks

ROBERTO ARAYA, University of Ottawa

Input transformation by dendritic spines of pyramidal neurons

#### SYMPOSIUM 3: Circadian regulation and clock genes link neuronal physiology to behavior

Chair: VALERIE MONGRAIN, Université de Montréal

#### Overview:

Circadian rhythm research, especially that concerning the central nervous system, shapes understanding of the intimate relationship between circadian oscillators, comprising clock genes, and neuronal physiology and functions. As such, the molecular clockwork has been increasingly linked to neuronal and behavioral plasticity that has been previously recognized to be associated with various types of brain functions and behaviors including learning and sleep. The symposium will feature new data obtained from research in flies and rodents regarding both the regulation and the role of the circadian timing system and of its molecular elements and will highlight the important contribution of the Canadian research community to the state of the knowledge in circadian rhythm research. The last two presentations of the symposium will also discuss the implication of these 'circadian' findings for social behavior and sleep regulation.

#### Speakers:

# SYMPOSIUM 4: Low-level circuits for sophisticated sensorimotor control: lessons from four model systems

Chair: J. ANDREW PRUSZYNSKI, Western University

Sponsored by: **ONTARIO BRAIN INSTITUTE** 

#### Overview:

It is obvious that robustly integrating sensory inputs is essential for maintaining perceptual stability. It is less obvious, and thus often forgotten, that robustly integrating sensory inputs is also essential for generating accurate motor commands. Recently, substantial progress has been made in determining the neuronal mechanisms that underlie sensory integration for motor control. This symposium will highlight work by four new faculty – studying different sensory modalities, motor effectors and model systems – all showing the striking role of peripheral and subcortical circuits in sophisticated motor behaviour. Michael Hendricks will show how subcellular signalling contributes to sensory modulation during nematode orienting. Kathy Nagel will explain how synaptic and circuit mechanisms promote broadband transmission of olfactory stimuli and how they may contribute to drosophila navigation in a natural landscape. Tuan Bui will describe how a class of dorsal spinal interneurons enables cutaneous control of hand grasping in mice. Andrew Pruszynski will show how first-order neurons in the human skin signal edge-orientation and how these signals could support object manipulation.

#### Speakers:

**ANDREW PRUSZYNSKI**, Western University

Geometric feature extraction in the human tactile periphery

MICHAEL HENDRICKS, McGill University

Sensorimotor integration at the subcellular level

KATHERINE NAGEL, New York University

Cellular and synaptic specializations for navigation in turbulent odor plumes

TUAN BUI, University of Ottawa

A class of spinal neurons integrates cutaneous information for motor control

#### SYMPOSIUM 5: Mechanisms of Plasticity

Co-chairs: MICHAEL JACKSON and TABREZ J SIDDIQUI, University of Manitoba

#### Overview:

From the simplest invertebrate species to man, mechanisms contributing towards neuronal plasticity are crucially involved in development, enable behavioural adaptations and form the basis for human perception, reasoning, learning and memory. The proposed symposium brings together Canadian experts whose research is focused on elucidating mechanisms responsible for the establishment and maintenance of plasticity. Topics covered will include an overview of studies exploring the signalling requirements for developmental plasticity in zebrafish, the importance of translational control as a determinant of bi-directional plasticity in Aplysia, the use of reverse genetics to elucidate the molecular underpinnings that regulate the form and function of dendritic spines in mice and the mechanisms that guide higher-order plasticity in well-defined circuits underlying odor preference in rats. Note: Session co-chaired by Drs Michael Jackson and Tabrez Siddiqui. Dr Siddiqui is entered as a speaker but will not be presenting.

#### Speakers:

WAYNE SOSSIN, McGill University

Regulation of eEF2 phosphorylation bi-directionally regulates translation-dependent synaptic plasticity in Aplysia

**DECLAN ALI**, University of Alberta

Synaptic Plasticity at developing Synapses in Zebrafish

**ZHENGPING JIA**, University of Toronto

Genetic analysis of synaptic and spine plasticity

**Qi Yuan**, Memorial University

Shaping odor coding neuronal ensembles by reward and norepinephrine

#### SYMPOSIUM 6: Neuroimmunology: A key interface in neurophysiology, neurodegeneration and repair

Chair: **SHALINA OUSMAN**, University of Calgary

#### Overview:

The immune system plays a pivotal role in maintaining homeostasis in the brain and spinal cord. In addition, immune cells are increasingly found to be involved in the pathogenesis, progression, and/or resolution of diseases and injuries of the central nervous system (CNS) and peripheral nervous system. This symposium will highlight research showing that immune cells such as microglia, T cells and macrophages, and their regulators [Cystatin C (Ousman), chondroitin sulfate proteoglycan (Yong) and ion channels (Schlichter)] promote not only injury but also repair of the CNS during diseases such as Alzheimer's disease (Rivest), multiple sclerosis (Ousman, Yong) and stroke (Schlichter).

#### Speakers:

**SHALINA OUSMAN**, Hotchkiss Brain Institute, University of Calgary

Pathogenic immune-mediated mechanisms in multiple sclerosis and its animal model, experimental allergic encephalomyelitis.

**SAM DAVID**, McGill University

Macrophage and microglia plasticity - they are what they eat.

**SERGE RIVEST**, Université Laval

*Neuroprotective properties of the innate immune cells.* 

**V. WEE YONG**, University of Calgary

Harnessing the benefits of inflammation for repair of the CNS.

#### PARALLEL SYMPOSIA

#### SYMPOSIUM 7: Novel Experimental Models of Epilepsy

Chair: **JESPER SJÖSTRÖM**, McGill University

Sponsored by: CENTRE DE RECHERCHE INSTITUT UNIVERSITAIRE EN SANTÉ MENTALE DE QUEBEC

#### Overview:

Approximately 60 million people worldwide suffer from epilepsy, a devastating neurological disorder afflicting characterised by recurrent seizures. Despite major recent advances, about 30% of cases cannot be controlled with current therapies, and the key steps by which the healthy brain undergoes epileptogenesis remain unclear. This symposium highlights novel findings in epilepsy research obtained by advances in experimental animal models. These models rely on a range of contrasting approaches, from trauma and ischemia to optogenetics, which enables researchers to focus on different factors that contribute to epileptogenesis.

#### Speakers:

PETER CARLEN, University Health Network

Neocortical ischemia and seizures

AYLIN REID, University of Toronto

Electrophysiological abnormalities during epileptogenesis after fluid percussion injury

IGOR TIMOFEEV, Université Laval

Age dependency of trauma induced epileptogenesis

JESPER SJÖSTRÖM, McGill University

Optogenetic kindling as a model of epilepsy

#### SYMPOSIUM 8: Circuit and systems basis of emotion and emotional learning

Co-chairs: **SHEENA JOSSELYN**, The Hospital for Sick Children and **STEPHANIE BORGLAND**, University of Calgary

Sponsored by: **ONTARIO BRAIN INSTITUTE** 

#### Overview:

Learning about the environmental cues that predict biologically significant events plays an essential role in survival. Indeed, these emotional memories [either negative (e.g., fear conditioning) or positive (e.g., palatable food, illicit drug or alcohol reward)] may attain a privileged status in memory. Perturbation of emotional learning may underlie pathological conditions including anxiety disorders and overeating. Therefore a greater understanding of the mechanisms mediating emotional conditioning may inform the development of more effective treatments for these disorders.

#### Speakers:

MAITHE ARRUDA-CARVALHO, University of Toronto

Maturation of the Prefrontal-Amygdala circuit and the encoding of fear memories

**LINDSAY NAEF**, University of Calgary

Dysfunction of the orbitofrontal cortex in diet-induced obesity

THOMAS KASH, University of North Carolina

Dissecting the role of ""Aversive"" circuitry in Addiction

**SHEENA JOSSELYN**, The Hospital for Sick Children

Winner-take-all neuronal competition for fear memory encoding

#### SYMPOSIUM 9: Shedding light on the function of cholinergic midbrain neurons

Chair: **SUSANNE SCHMID**, University of Western Ontario

Sponsored by: TUCKER-DAVIS TECHNOLOGIES

#### Overview:

Neurons of the midbrain cholinergic cell groups Ch5 and Ch6 project to wide-spread areas in the brain and are part of the ascending reticular activating system. The specific function of these neurons have been elusive, due to the fact that bilateral lesions of these neurons are lethal, unless they are performed in a way that allows the brain to compensate. Not surprisingly, functional consequences are then minimal. Transient activation and inhibition of these neurons using optogenetics or DREADDS allow for the first time to probe for their specific function. S. Steidl will present data of cholinergic versus glutamatergic projections to the ventral tegmental area and their crucial role in reward and addiction. G. Felsen reports of the effect of cholinergic projections to the superior colliculus and its importance for selecting orienting responses. E Azzopardi will revisit the long-standing dogma that these neurons mediate sensorimotor gating through descending projections to the brainstem, and C. Van Dort will report about the role of the same cholinergic projections to the reticular formation in inducing and maintaining REM sleep in mice.

#### Speakers:

**STEPHAN STEIDL**, Loyola University Chicago

Laterodorsal tegmental nucleus inputs to the ventral tegmental area drive reward

JOHN THOMPSON, University of Colorado

Mesencephalic representations of recent experience influence decision making

**ERIN AZZOPARDI**, University of Western Ontario

The role of mesopontine cholinergic neurons in sensorimotor gating

CHRISTA VAN DORT, Harvard Medical School

Activation of cholinergic neurons in the PPT and LDT induces REM sleep

#### SYMPOSIUM 10: Nociceptive Circuits: From Molecules to Behaviour

Chair: **STEVEN PRESCOTT**, The Hospital for Sick Children

#### Overview:

Understanding the specific anatomical and functional wiring of sensory circuits transmitting touch and pain information is a fundamental challenge in neuroscience. Recent transgenic mouse technology combined with advancements in optogenetics/pharmacogenetics, functional imaging, anatomical and analytical techniques now provide an unprecedented detailed and dynamic view of complex neural networks. In this symposium, we will discuss how we have combined such techniques to understand the workings of the circuitry of the spinal cord involved in nociception (pain). Attempting to bridge the gap between our understanding of the cellular connectivity, network activity and pain perception, the symposium will focus on 4 major questions: 1) What are the molecular pathways underlying the proper development of nociceptive somatotopy? (AK) 2) What do we learn from the optogenetic and chemogenetic control of pain pathways? (PS) 3) How do interneurons in touch-processing circuits gate pain? (RSN) 4) How spinal networks process information and how that processing impacts pain perception? (SP)

#### Speakers:

**ARTUR KANIA**, IRCM

A genetic and functional analysis of nociceptive somatotopy

PHILIPPE SÉGUÉLA, McGill University

Selective functional control of peripheral somatosensory neurons in pain circuits

**REZA SHARIF NAEINI**, McGill University

Dorsal horn parvalbumin inhibitory neurons act as gate-keepers of touch-evoked pain after nerve injury

**STEVEN PRESCOTT**, The Hospital for Sick Children

Disruption of circuit-level pain processing by chloride dysregulation in spinal dorsal horn

#### **PARALLEL SYMPOSIA**

#### SYMPOSIUM 11: Mechanisms governing cerebrovascular structure and function in health and disease

Chair: IAN WINSHIP, University of Alberta

#### Overview:

The cerebrovasculature is a critical component of a properly functioning nervous system. All aspects of the cerebrovasculature, from structural elements like the blood-brain barrier, to functional coupling of blood flow with neural activity, are tightly regulated and controlled in the healthy brain. In small and large vessel disease states such as ischemia, diabetes, vascular dementia or Alzheimer's disease, the mechanisms that govern cerebrovascular structure and function can go awry, which has profound implications for the maintenance of, or recovery of sensory, motor and cognitive abilities. The proposed symposium brings together 4 Canadian scientists actively exploring these fundamental issues. First, Dr. Grant Gordon (Calgary) will discuss his latest research imaging the cellular and molecular mechanisms of tonic astrocytic control of cerebral blood flow. This will be followed by Dr. Edith Hamel (McGill) who will describe how the coupling between sensory-evoked neuronal activity and cerebrovascular responses is affected by acute changes in brain states and by chronic loss of cholinergic neuromodulation. Third, Dr. Craig Brown (Victoria) will reveal with longitudinal imaging approaches, how vascular networks in the healthy and disease-affected brain modify patterns of blood flow or structure to deal with micro-vessel obstructions. And finally, Dr. Andy Shih (MUSC, USA) will describe how matrix-metalloproteinase secretion from pericytes regulate blood brain barrier opening during ischemia.

#### Speakers:

**CRAIG BROWN**, University of Victoria

Imaging microvessel recanalization and remodelling following occlusion

**GRANT GORDON**, University of Calgary

Blood Flow Control Across a Spectrum of Brain Activity States

**EDITH HAMEL**, McGill University

Hemodynamic signals: how reliable are they to map changes in neuronal activity?

ANDY SHIH, Medical University of South Carolina

The Double Life of a Cerebral Pericyte

#### SYMPOSIUM 12: Temporal sequences in brain and memory

Chair: KAORI TAKEHARA-NISHIUCH, University of Toronto

#### Overview:

The ability to temporally organize the sequence of events is required for extracting meaning from experiences and guiding adaptive behaviour in the future. Past investigations highlighted the role of the hippocampus in remembering the flow of events in distinct experiences and the role of prefrontal cortex in using the memory to organize behaviour in time. This symposium reviews recent studies in animals and humans that examined how neurons in these regions represent the temporal sequence of events and how these regions work in concert with other regions to connect temporally disparate events. These findings provide a new insight into how the brain processes temporal sequences, an evolutionary foundation for many cognitive phenomena, including episodic memory, working memory, and goal-directed behavior. This, along with disruptions of temporal sequence processing in various mental disorders, should make this symposium attractive and informative for both basic and clinical researchers across many research topics.

#### Speakers:

HOWARD EICHENBAUM, Boston University

Time cells in the hippocampus

KAORI TAKEHARA-NISHIUCHI, University of Toronto

Prefrontal time code underlying temporal associative memory

NANDAKUMAR NARAYANAN, University of Iowa

Prefrontal dopamine and temporal control of action

**LIANG-TIEN HSIEH**, University of California in San Diego

Temporal representation in the episodic recollection network

Notes	

#### **POSTER AUTHOR INDEX**

#### **POSTER SESSIONS**

Session 1: Monday, May 30

10:15 - 10:45 & 3:30 - 5:30

Session 2: Tuesday, May 31

10:15 - 10:45 & 3:30 - 5:15

Session 3: Wednesday, June 1

10:15 - 10:45 & 1:30 - 3:30

# The poster board numbers work in the following way: Session – Theme – Board number (E.g 1-A-1)

Location of individual poster boards indicated on poster board floor plans at the back of the program.

All abstracts are available to view online at can-acn.org, or on the CAN App — scan the QR code to download the app or search for 'Podium Conferences' in the App Store.

#### **POSTER THEMES**

- A Development
- B Neural Excitability, Synapses, and Glia: Cellular Mechanisms
- C Disorders of the Nervous System
- D Sensory and Motor Systems
- E Homeostatic and Neuroendocrine Systems
- F Cognition and Behavior
- **G** Novel Methods and Technology Development
- H History, Teaching, Public Awareness and Societal Impacts in Neuroscience

IBRO International Brain Research Organization

#### POSTER SESSION 1 - MONDAY, MAY 30, 2016

#### A - Development

1-A-1 Gene expression profiling in the prenatal brain of Cyclooxygenase-1 and -2 knockout mice - a model system for Autism Spectrum Disorders

**Eizaaz Ahmad<sup>1</sup>, Ravneet Bhogal<sup>1</sup>, Hongyan Li<sup>1</sup>, Dorota Crawford<sup>1</sup>**<sup>1</sup>York University

1-A-2 Rescue of neuroanatomical impairments following Mecp2 reactivation in adult mice

Rylan Allemang-Grand<sup>1</sup>, Leigh Spencer-Noakes<sup>2</sup>, Jacob Ellegood<sup>2</sup>, Brian Nieman<sup>2</sup>, Jason Lerch<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Hospital for Sick Children

1-A-3 Examining the lineage potential of a novel population of OCT4 expressing primitive neural stem cells in the postnatal brain Ashkan Azimi<sup>1</sup>. Cindi Morshead<sup>1</sup>

<sup>1</sup>University of Toronto

1-A-4 A Neurodevelopmental and Behavioural Study of Mice Following In Utero and Early Postnatal Exposure to Imidacloprid, a Neonicotinoid Pesticide

Andrew Burke<sup>1</sup>, David Hampson<sup>1</sup>

<sup>1</sup>University of Toronto

1-A-5 Embryonic Sim1 expression establishes a patterned V3 neurogenesis profile and subsequent functional separation of V3 subpopulations

Dylan Deska-Gauthier<sup>1</sup>, Jeremy Chopek<sup>1</sup>, Ying Zhang<sup>1</sup>
Dalhousie University

1-A-6 Early Adolescent Adversity and its Long-Term Effects on Long Evans Rats Aggression-Related Behaviours and Serotonin Fibre Density

Prateek Dhamija<sup>1</sup>, Cindy Tao<sup>1</sup>, Linda Booij<sup>2</sup>, Janet Menard<sup>1</sup>
<sup>1</sup>Queen's University, <sup>2</sup>Concordia

1-A-7 Reduced clustered protocadherin diversity alters retinal circuitry

Samantha Esteves<sup>1</sup>, Julie Lefebvre<sup>1</sup>

<sup>1</sup>University of Toronto

1-A-8 Neural network disturbances in children treated for brain tumors

Samantha Gauvreau<sup>1</sup>, Colleen Dockstader<sup>1</sup>, Diana Harasym<sup>2</sup>, Janine Piscione<sup>3</sup>, Suzanne Laughlin<sup>3</sup>, Brian Timmons<sup>2</sup>, Ute Bartels<sup>3</sup>, Jovanka Skocic<sup>3</sup>, Cynthia de Medeiros<sup>3</sup>, Katrin Scheinemann<sup>2</sup>, Eric Bouffet<sup>3</sup>, Sam Doesburg<sup>4</sup>, Donald Mabbott<sup>3</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>McMaster University, <sup>3</sup>The Hospital for Sick Children, <sup>4</sup>Simon Fraser University

1-A-9 The Effects of Gestational and Lactational Bisphenol A Exposure on Rat Pup Morphological Measurements and on Adrenal Gland Glucocorticoid Receptor Gene Expression

Julia Hajjar<sup>1</sup>, Anne Konkle<sup>1</sup>, Karen Phillips<sup>1</sup>

<sup>1</sup>University of Ottawa

1-A-10 Investigating the role of hnRNP-M in RNA localization during neurogenesis.

Dendra Hillier<sup>1</sup>, Anastasia Smart<sup>1</sup>, John Vessey<sup>1</sup>

<sup>1</sup>University of Guelph

1-A-11 Development of brain networks after neurodevelopmental insult: the impact of gestational exposure to methylazoxymethanol acetate (MAM)

Kally O'Reilly<sup>1</sup>, Maria Perica<sup>1</sup>, André Fenton<sup>1</sup>

<sup>1</sup>New York University

# B – Neural Excitability, Synapses, and Glia: Cellular Mechanisms

1-B-12 Using optogenetics to probe neuronal excitability in dissociated dorsal root ganglion neurons

Dhekra Al-Basha<sup>1</sup>, Steve Prescott<sup>2</sup>

<sup>1</sup>The University of Toronto, <sup>2</sup>The Hospital for Sick Children

1-B-13 Detecting Gangliosides Expression Profile Changes in Microglial Activation

Mona Alshaikh<sup>1</sup>, Gilles Lajoie<sup>1</sup>, Shawn Whitehead<sup>1</sup>

<sup>1</sup>University of Western Ontario

1-B-14 Still unidentified: The channel driving spreading depolarization during ischemia

Peter Gagolewicz<sup>1</sup>, Kaitlyn Tresidder<sup>1</sup>, David Andrew<sup>1</sup>

<sup>1</sup>Queen`s University

1-B-15 Effects of Pannexin Knockout on Neocortical Neurons in

Mark Aquilino<sup>1</sup>, Lihua Wang<sup>1</sup>, Berj Bardakjian<sup>2</sup>, Peter Carlen<sup>1</sup>
<sup>1</sup>Toronto Western Hospital, <sup>2</sup>University of Toronto

1-B-16 Dynamic interaction between Cav3 channels and calmodulin triggers a second messenger cascade of CaMKII and CREB activation

Hadhimulya Asmara<sup>1</sup>, Ileana Micu<sup>1</sup>, Arsalan Rizwan<sup>1</sup>, Giriraj Sahu<sup>1</sup>, Brett Simms<sup>1</sup>, Fang Zhang<sup>1</sup>, Peter Stys<sup>1</sup>, Gerald Zamponi<sup>1</sup>, Ray Turner<sup>1</sup>

<sup>1</sup>University of Calgary

1-B-17 Histone acetylation by VPA is associated with melatonin receptor upreaulation

Sarra Bahna<sup>1</sup>, Lennard Niles<sup>1</sup>

<sup>1</sup>McMaster University

1-B-18 Molecular characterization and modulation of electrical synapses between neuroendocrine cells

Christopher Beekharry<sup>1</sup>, Neil Magoski<sup>1</sup>

<sup>1</sup>Oueen's University

1-B-19 The cellular and molecular mechanisms underlying the role of LIMK1 in synaptic plasticity

Youssif Ben Zablah<sup>1</sup>, Zheng Ping Jia<sup>1</sup>

<sup>1</sup>Hospital for sick children

#### POSTER SESSION 1 - MONDAY, MAY 30, 2016

#### 1-B-20 Identifying protein microdomains in complex three-dimensional astrocytes in situ

Kristin Milloy<sup>1</sup>, Matt Joel<sup>1</sup>, Neil Rasiah<sup>2</sup>, Travis Moore<sup>1</sup>, Adrienne Benediktsson<sup>1</sup>

<sup>1</sup>Mount Royal University, <sup>2</sup>University of Calgary

## 1-B-21 Panx1 modulates glutamatergic transmission by regulating the synaptic ananamide concentration

Jennifer Bialecki<sup>1</sup>, Nicholas Weilinger<sup>1</sup>, Matthew Hill<sup>1</sup>, Roger Thompson<sup>1</sup>

<sup>1</sup>Hotchkiss Brain Institute

# 1-B-22 Rescuing NMDA receptor hypofunction in a mouse model of schizophrenia: Neurophysiological consequences in prefrontal cortex

Mary Binko<sup>1</sup>, Catharine Mielnik<sup>1</sup>, Amy Ramsey <sup>1</sup>, Evelyn Lambe<sup>1</sup>
<sup>1</sup>University of Toronto

# 1-B-23 The role of cGMP in regulating postsynaptic structure underlying bidirectional plasticity

Jelena Borovac<sup>1</sup>, Thomas T Luyben<sup>1</sup>, Kenichi Okamoto<sup>1</sup>
<sup>1</sup>University of Toronto

## 1-B-24 Understanding the structural basis of NMDA receptor activation

Bryan Daniels<sup>1</sup>, Maria Musgaard<sup>2</sup>, Mark Aurousseau<sup>1</sup>, Philip Biggin<sup>2</sup>, Derek Bowie<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>Oxford University

## 1-B-25 AMPA and kainate receptor auxiliary proteins relieve polyamine block by enhancing polyamine permeation

Patricia Brown<sup>1</sup>, Hugo McGuire<sup>1</sup>, Derek Bowie<sup>1</sup>

<sup>1</sup>McGill University

## 1-B-26 The role of Neuroligin 2 and inhibitory transmission in the function of thalamic circuitry during epilepsy

Feng Cao<sup>1</sup>, Jia Liu<sup>1</sup>, Zhengping Jia<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# 1-B-27 Ca2+-Dependent KCC2 Dephosphorylation as a Mechanism for Inhibitory STDP

Annik Carson<sup>1</sup>, Vivek Mahadevan<sup>1</sup>, Jessica Pressey<sup>1</sup>, Joseph Raimondo<sup>2</sup>, Melanie Woodin<sup>1</sup>, Blake Richards<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Cape Town

# 1-B-28 Synaptopodin in Necessary for Homeostatic Synaptic Scaling at CA3-CA1 Synapses

Melanie Chan<sup>1</sup>, David Verbich<sup>1</sup>, Philip K.Y. Chang<sup>1</sup>, R. Anne McKinney<sup>1</sup>

<sup>1</sup>McGill University

# 1-B-29 Using Local Field Potential (LFP) modeling to understand inhibitory cellular contributions to network rhythms in hippocampus

#### Alexandra Chatzikalymniou<sup>1</sup>, Katie Ferguson<sup>2</sup>, Frances Skinner<sup>3</sup>

<sup>1</sup>Krembil Research Institute, University Health Network, Toronto, ON; Department of Physiology, Univer, <sup>2</sup>Department of Neuroscience, Yale School of Medicine, New Haven CT; Krembil Research Institute, Unive, <sup>3</sup>Krembil Research Institute, University Health Ne

# 1-B-30 Cation channel regulation by reactive oxygen species in Aplysia neuroendocrine cells

Alamjeet Chauhan<sup>1</sup>, Neil Magoski<sup>1</sup>

<sup>1</sup>Queen's University

# 1-B-31 Electron Microscopy Analysis of Synaptic Vesicle Tethering by Calcium Channels at Presynaptic Active Zones

Robert Chen<sup>1</sup>, Arup Nath<sup>1</sup>, Elise Stanley<sup>1</sup>

<sup>1</sup>Krembil Research Institute

## 1-B-32 Changes in cation-chloride cotransporter complexes with NMDA receptors following brain trauma

Jonah Chevrier<sup>1</sup>, Vivek Mahadevan<sup>2</sup>, Christophe Pellegrino<sup>3</sup>, Melanie Woodin<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>National Institutes of Health, <sup>3</sup>Institut de Neurobiologie de la Méditerranée

# 1-B-33 Aberrant Chloride Homeostasis and Inhibitory Synaptic Transmission in Huntington's Disease

Zahra Dargaei<sup>1</sup>, Melanie Woodin<sup>1</sup>

<sup>1</sup>University of Toronto

# 1-B-34 *cGMP-dependent protein kinase regulates synaptic growth and function at the Drosophila larval neuromuscular junction*

Jeffrey Dason<sup>1</sup>, Aaron Allen<sup>1</sup>, Marla Sokolowski<sup>1</sup>

<sup>1</sup>University of Toronto

# 1-B-35 Activation of AMPA receptor-auxiliary protein complexes is coordinated by distinct structural pathways

George Dawe<sup>1</sup>, Maria Musgaard<sup>2</sup>, Mark Aurousseau<sup>1</sup>, Philip Biggin<sup>2</sup>, Derek Bowie<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>University of Oxford

## 1-B-36 Organization of paranode axoglial domain requires the netrin-1 receptor UNC5B

Omar de Faria Jr.<sup>1</sup>, Mihai Mocanu<sup>1</sup>, Roland Pilgram<sup>1</sup>, Jenea Bin<sup>1</sup>, Diane Nakamura<sup>1</sup>, Amir Shmuel<sup>1</sup>, Abbas Sadikot<sup>1</sup>, Timothy Kennedy<sup>1</sup>

<sup>1</sup>Montreal Neurological Institute/McGill University

### 1-B-37 The Effects of Retinoic Acid on Voltage-Gated Calcium Channels in CNS Neurons

Eric de Hoog<sup>1</sup>, Mark Lukewich<sup>1</sup>, Gaynor Spencer<sup>1</sup>

<sup>1</sup>Brock University

### 1-B-38 Circadian and homeostatic remodeling of excitatory synapses

Graham Diering<sup>1</sup>, Raja Nirujogi<sup>1</sup>, Richard Roth<sup>1</sup>, Paul Worley<sup>1</sup>, Akhilesh Pandey<sup>1</sup>, Richard Huganir<sup>1</sup>

<sup>1</sup>Johns Hopkins University

# 1-B-39 Enhancement of neuronal excitability as a trigger for memory consolidation in the mollusc Lymnaea stagnalis.

Nancy Dong<sup>1</sup>, Zhong-Ping Feng<sup>1</sup>

<sup>1</sup>University of Toronto

## 1-B-40 Finite element modelling of Calcium dynamics in dendritic spines

Nicolas Doyon<sup>1</sup>, Frank Boahen<sup>1</sup>

<sup>1</sup>Laval University

# **1-B-41** *Cloning of the chick CaV2.1 voltage gated calcium channel* Brittany Elliott<sup>1</sup>, Qi Li<sup>1</sup>, Elise Stanley<sup>1</sup>

<sup>1</sup>Krembil Research Institute

# 1-B-42 Cholinergic neurotransmission in the substantia nigra pars compacta modulates dopaminergic neuronal activity

Jasem Estakhr<sup>1</sup>, Raad Nashmi<sup>1</sup>

<sup>1</sup>University of Victoria

# 1-B-43 Determinants of the heterogeneous synaptic function at the mature calyx of Held synapse

Adam Fekete<sup>1</sup>, Lu-Yang Wang<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

## 1-B-44 The Involvement of Satellite Glial Cells in Different Models of Tooth Pulp Inflammatory Pain in Rats

Helena Filippini<sup>1</sup>, Paulo Scalzilli<sup>2</sup>, Kesiane Costa<sup>3</sup>, Raquel Freitas<sup>3</sup>, Graziella Molska<sup>1</sup>, Limor Avivi-Arber<sup>1</sup>, Barry Sessle<sup>1</sup>, Maria Campos<sup>3</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Pontificia Universidade Catolica do Rio Grande do Sul -PUCRS, <sup>3</sup>Pontificia Universidade Catolica do Rio Grande do Sul - PUCRS

#### 1-B-45 The Mistrafficking of Christianson Syndrome-Linked Mutation NHE6ΔES Impairs the Structure and Viability of Hippocampal Pyramidal Neurons

Andy Gao<sup>1</sup>, Sara Kasem<sup>1</sup>, Alina Ilie<sup>1</sup>, John Orlowski<sup>1</sup>, R. Anne McKinney<sup>1</sup>

<sup>1</sup>McGill University

# 1-B-46 *lonotropic and metabotropic kainate receptor signalling regulates KCC2 and synaptic inhibition*

Danielle Garand<sup>1</sup>, Melanie Woodin<sup>2</sup>

<sup>1</sup>University of Toronro, <sup>2</sup>University of Toronto

# 1-B-47 The Influence of Postsynaptic Structures on Missing Quanta at the Drosophilia Neuromuscular Junction

Christine Nguyen<sup>1</sup>, Bryan Stewart<sup>1</sup>

<sup>1</sup>University of Toronto

# 1-B-48 The transcription of Neuroligin-1 is regulated by core clock transcription factors

Emma O'Callaghan¹, Erika Bélanger-Nelson¹, Nicolas Cermakian², Jean Martin Beaulieu³, Valerie Mongrain¹

<sup>1</sup>Centre d'Études Avancées en Médecine du Sommeil, Hôpital du Sacré-Coeur de Montréal, Université de M, <sup>2</sup>Douglas Mental Health University Institute, McGill University, Montreal, <sup>3</sup>Centre de Recherche de l'Institut Universitaire en Santé Mentale de Ouébec an

#### **C- Disorders of the Nervous System**

1-C-49 Insulin stimulates retinal ganglion cell dendrite regeneration through activation of the mammalian target of rapamycin complex 1 (mTORC1) and complex 2 (mTORC2).

Jessica Agostinone<sup>1</sup>, Adriana Di Polo<sup>1</sup>

<sup>1</sup>University of Montreal Hospital Research Center

1-C-50 Neural synchronizations involved in emotion-detection in psychiatry: Exploration by depth electrodes in bipolar patients

Golnoush Alamian<sup>1</sup>, Etienne Combrisson<sup>2</sup>, Dmitrii Altukhov<sup>3</sup>, Daniel Kaping<sup>5</sup>, Nir Lipsman<sup>4</sup>, Andres Lozano<sup>4</sup>, Thilo Womelsdorf<sup>5</sup>, Karim Jerbi<sup>1</sup>

<sup>1</sup>Université de Montréal, <sup>2</sup>Université Claude Bernard Lyon 1, <sup>3</sup>Moscow State Pedagogical University, <sup>4</sup>University of Toronto, <sup>5</sup>York University

# 1-C-52 Title: The Effects of Childhood Maltreatment on Epigenetic Regulation of the Oxytocinergic System in Male Suicide Completers Daniel Almeida<sup>1</sup>, Laura Fiori<sup>1</sup>, Naguib Mechawar<sup>1</sup>, Gustavo Turecki<sup>1</sup> McGill

## 1-C-53 Cell swelling during simulated ischemia in neocortical brain slices

Hala El-Kerdawy<sup>1</sup>, Jessica Carr<sup>1</sup>, David Andrew<sup>1</sup>

<sup>1</sup>Queen`s University

## 1-C-54 Effects of metformin and enriched rehabilitation on recovery following neonatal hypoxia-ischemia

Sabina Antonescu<sup>1</sup>, Jessica Livingston-Thomas<sup>1</sup>, Matthew Jeffers<sup>1</sup>, Cindi Morshead<sup>2</sup>, Dale Corbett<sup>1</sup>

<sup>1</sup>University of Ottawa, <sup>2</sup>University of Toronto

### 1-C-55 Advances in Gene Therapy Strategies to Treat Fragile X Syndrome

Jason Arsenault<sup>1</sup>, Yosuke Niibori<sup>1</sup>, Shervin Gholizadeh<sup>1</sup>, David Hampson<sup>1</sup>

<sup>1</sup>University of Toronto

## 1-C-56 Inhibition of alpha5GABA-A receptors improves post-traumatic memory deficits

Sinziana Avramescu<sup>1</sup>, Heping Sheng<sup>1</sup>, Dian-Shi Wang<sup>1</sup>, Beverley Orser<sup>1</sup>
<sup>1</sup>University of Toronto

# 1-C-57 Sodium nitroprusside reduces psychotic-like behaviour in the ketamine animal model of schizophrenia

Priscila Balista <sup>1</sup>, Ludmyla Kandratavicius <sup>2</sup>, Jose Peixoto-Santos <sup>2</sup>, Serdar Dursun <sup>1</sup>, Glen Baker <sup>1</sup>, Jaime Hallak <sup>2</sup>

<sup>1</sup>University of Alberta, <sup>2</sup>University of Sao Paulo

## 1-C-58 Theta burst stimulation of the substantia nigra pars reticulata in Parkinson's disease patients

Diellor Basha<sup>1</sup>, Suneil Kalia<sup>2</sup>, Mojgan Hodaie<sup>2</sup>, Andres Lozano<sup>2</sup>, William Hutchison<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Toronto Western Hospital

# 1-C-59 Pharmacological Chaperones of the Dopamine Transporter Rescue Dopamine Transporter Deficiency Syndrome Mutations

Pieter Beerepoot<sup>1</sup>, Vincent Lam<sup>1</sup>, Ali Salahpour<sup>1</sup>

<sup>1</sup>University of Toronto

# 1-C-60 AMP-activated protein kinase, a conserved energy biosensor, signals early neuronal pathogenesis in glaucoma through inhibition of the mammalian target of rapamycin.

Nicolas Belforte<sup>1</sup>, Jorge Cueva Vargas<sup>1</sup>, Adriana Di Polo<sup>1</sup>
<sup>1</sup>University of Montreal Hospital Research Centre (CRCHUM)

# 1-C-61 Microglia are recruited at the interface of infiltrating leukocytes and the astroglial scar after spinal cord injury.

Victor Bellver<sup>1</sup>, Martine Lessard<sup>1</sup>, Nicolas Vallières<sup>1</sup>, Alexandre Paré<sup>1</sup>, Steve Lacroix<sup>1</sup>

<sup>1</sup>Centre de recherche du Centre hospitalier universitaire (CHU) de Québec - CHUL

#### POSTER SESSION 1 - MONDAY, MAY 30, 2016

# 1-C-62 Brain-derived progenitor cells - potential for therapeutic neurotrophic factor delivery

Simon Benoit<sup>1</sup>, Matthew Hebb<sup>1</sup>, Susanne Schmid<sup>1</sup>, Hu Xu<sup>1</sup>
<sup>1</sup>University of Western Ontario

# 1-C-63 Modeling the cognitive impairments of schizophrenia: acute amphetamine and PCP are most suited for representing impulsivity, compulsivity, and avolition using 5-CSRTT

Jayant Bhandari<sup>1</sup>, Ritesh Daya<sup>1</sup>, Ashley Bernardo<sup>1</sup>, Roohie Sharma<sup>1</sup>, Sharnpreet Kooner<sup>1</sup>, Aaron Edward<sup>1</sup>, Rodney Johnson<sup>1</sup>, Ram Mishra<sup>1</sup>

McMaster University

# 1-C-64 Phase coherence of inhibition with seizure states in a rodent model of neocortical epilepsy

Vanessa Breton<sup>1</sup>, Berj Bardakjian<sup>2</sup>, Peter Carlen<sup>1</sup>

<sup>1</sup>Krembil Discovery Tower, Toronto Western Hospital, <sup>2</sup>University of Toronto

#### 1-C-65 Quantitative EEG in the Evaluation of Patients with Post-Concussion Syndrome and Chronic Pain Following a Motor Vehicle Accident

Derrick Matthew Buchanan<sup>1</sup>, Tomas Ros<sup>2</sup>, Richard Nahas<sup>1</sup>

The Seekers Centre, <sup>2</sup>University of Geneva

# 1-C-66 Blocking spinal P2X7Rs attenuates morphine withdrawal Nicole Burma<sup>1</sup>, Heather Leduc-Pessah<sup>1</sup>, Zoe Cairncross<sup>1</sup>, Tuan Trang<sup>1</sup> 1 University of Calgary

# 1-C-68 Age-dependent increase in membrane lipid deregulation observed in brain regions vulnerable to neurodegenerative diseases

Sarah Caughlin<sup>1</sup>, David Cechetto<sup>1</sup>, Shawn Whitehead<sup>1</sup>

<sup>1</sup>The University of Western Ontario

# **1-C-69 An optogenetic kindling model of neocortical epilepsy** Elvis Cela<sup>1</sup>, Andrew Chung<sup>2</sup>, Taiji Wang<sup>3</sup>, Per Jesper Sjöström<sup>3</sup>

<sup>1</sup>Integrated Program in Neuroscience, McGill University, <sup>2</sup>McGill University, <sup>3</sup>The Research Institute of the McGill University Health Centre

## 1-C-70 The influence of beta-amyloid on intrinsic brain network adaptation in Parkinson?s disease

Leigh Christopher<sup>1</sup>, Marion Criaud<sup>1</sup>, Aaron Kucyi<sup>2</sup>, Yuko Koshimori<sup>1</sup>, Pablo Rusjan<sup>1</sup>, Nancy Lobaugh<sup>1</sup>, Anthony Lang<sup>1</sup>, Sylvain Houle<sup>1</sup>, Antonio Strafella<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Harvard University

# 1-C-71 On the origins of autism: The Quantitative Threshold Exposure hypothesis

Sarah Crawford 1

<sup>1</sup>Southern Connecticut State University

## 1-C-72 Heme oxygenase-1 modulates microRNA expression in cultured astroglia: Implications for chronic brain disorders

Marisa Cressatti<sup>1</sup>, Wei Song<sup>1</sup>, Shih-Hsiung Lin<sup>1</sup>, Hillel Zukor<sup>1</sup>, Eugenia Wang<sup>2</sup>, Hyman Schipper<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>Advanced Genomic Technology

# 1-C-73 Innate deficits in dendritic outgrowth in Parkinson?s patient-derived neurons are rescued by NRF2-mediate activation of the anti-oxidant response

Chris Czaniecki<sup>1</sup>, Arianne Cohen<sup>1</sup>, Juliane Heide<sup>1</sup>, Scott Ryan<sup>1</sup>
<sup>1</sup>University of Guelph

## 1-C-74 Intra-VTA leptin decreases the augmentation of heroin seeking induced by chronic food restriction.

Tracey D'Cunha<sup>1</sup>, Melissa Russo<sup>1</sup>, Soraya le Noble<sup>1</sup>, Damaris Rizzo<sup>1</sup>, Emilie Daoud<sup>1</sup>, Uri Shalev<sup>1</sup>

<sup>1</sup>Concordia University

# 1-C-75 A new perspective for the treatment of schizophrenia: positive allostery of the dopamine D2 receptor

Ritesh Daya<sup>1</sup>, Jayant Bhandari<sup>1</sup>, Sharnpreet Kooner<sup>1</sup>, Hetashree Joshi<sup>1</sup>, Christropher Rowley<sup>1</sup>, Nick Bock<sup>1</sup>, Ram Mishra<sup>1</sup>

<sup>1</sup>McMaster University

# 1-C-76 Hippocampal subfield volume loss in children and adolescent survivors of pediatric brain tumors

Alexandra Decker<sup>1</sup>, Kamila Szulc<sup>2</sup>, Jovanka Skocic<sup>2</sup>, Cynthia de Medeiros<sup>2</sup>, Lily Riggs<sup>2</sup>, Eric Bouffet<sup>3</sup>, Colleen Dockstader<sup>1</sup>, Suzanne Laughlin<sup>2</sup>, Uri Tabori<sup>2</sup>, Donald Mabbott<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children and the University of Toronto, <sup>2</sup>The Hospital for Sick Children, <sup>3</sup>The Hospital for Sick Children

## 1-C-77 Eye movement deficits in a zebrafish model of Parkinson's disease

Adib Dehghany<sup>1</sup>, Dylan Zamani<sup>1</sup>, Rafael Godoy<sup>1</sup>, Marc Ekker<sup>1</sup>, Tuan Bui<sup>1</sup>
<sup>1</sup>University of Ottawa

## 1-C-78 Effects of an Acute Bout of Soccer Heading on Neurovascular Coupling

Jillian Dierijck<sup>1</sup>, Jonathan Smirl<sup>1</sup>, Alexander Wright<sup>1</sup>, Colin Wallace<sup>1</sup>, Kelsey Bryk<sup>1</sup>, Mike Kennefick<sup>1</sup>, Kevin Bouliane<sup>1</sup>, Jonathan McNulty<sup>1</sup>, Maggie McLeod<sup>1</sup>, Jason Purpur<sup>1</sup>, Paul van Donkelaar<sup>1</sup>

<sup>1</sup>University of British Columbia, Okanagan Campus

# 1-C-79 IVIg immunotherapy combined with MRI-guided focused ultrasound enhances neuronal plasticity in an amyloidosis mouse model

Sonam Dubey<sup>1</sup>, Alison Burgess<sup>1</sup>, JoAnne McLaurin<sup>1</sup>, Donald Branch<sup>2</sup>, Kullervo Hynynen<sup>1</sup>, Isabelle Aubert<sup>1</sup>

<sup>1</sup>Sunnybrook Research Institute, <sup>2</sup>University of Toronto

#### 1-C-80 The role of RGMa/Neogenin Signalling in Multiple Sclerosis Ahmad Ellabban<sup>1</sup>, Nardos Tassew<sup>1</sup>, Philippe Monnier<sup>1</sup>, Christopher Barden<sup>2</sup>

<sup>1</sup>University of Toronto / Toronto Western Hospital, <sup>2</sup>Toronto Western Hospital

# 1-C-81 Significantly increased total brain volume and other neuroanatomical differences in a mouse model of Nance Horan Syndrome (NHS).

Jacob Ellegood<sup>1</sup>, Ryan Yuen<sup>1</sup>, Amie Creighton<sup>1</sup>, Leigh Spencer Noakes<sup>1</sup>, Brian Nieman<sup>1</sup>, Lauryl Nutter<sup>1</sup>, Stephen Scherer<sup>1</sup>, Jason Lerch<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

**1-C-82** Hypoxia resulting from repeated seizures augments memory impairment and AD-like pathology in the 5XFAD mouse. Jordan Farrell<sup>1</sup>, Joseph Sparling<sup>1</sup>, Kwaku Addo-Osafo<sup>1</sup>, Peter Stys<sup>1</sup>, G. Campbell Teskey<sup>1</sup>

<sup>1</sup>Hotchkiss Brain Institute

1-C-83 Muscarinic acetylcholine receptor type-1 antagonists modulate post-translational modifications of Ca2+/calmodulin-dependent protein kinase kinase beta in adult sensory neurons

Paul Fernyhough<sup>1</sup>, Mohammad Sabbir<sup>2</sup>

<sup>1</sup>University of Manitoba, <sup>2</sup>St Boniface Hospital Research Centre

# 1-C-84 Age-Related Changes in Learning and Memory in the Hebb-Williams Maze in the 3xTG Mouse Model of Alzheimer's Disease

Emre Fertan<sup>1</sup>, Nicole Woodland<sup>1</sup>, Richard Brown<sup>1</sup>

Dalhousie University

1-C-85 The effect of obesity on the vascular and glial response to endothelin-1 induced focal ischemic stroke.

Kathleen Fifield<sup>1</sup>, Jacqueline Vanderluit<sup>1</sup>

<sup>1</sup>Memorial University of Newfoundland

## 1-C-86 Repeated Seizures Alter the Functional Integration of Adult-Born Neurons into Behavioral Circuits

Alena Kalinina<sup>1</sup>, Joshua Carr<sup>1</sup>, Holly Turner<sup>1</sup>, Dana Kousmanidis<sup>1</sup>, Hugo Lehmann<sup>1</sup>, Neil Fournier<sup>1</sup>

<sup>1</sup>Trent University

# 1-C-87 Microelectrode Recordings of the Internal Segment of the Globus Pallidus in Cerebral Palsy

Majid Gasim<sup>1</sup>, Luis Fernando Botero Posada<sup>2</sup>, Adriana Lucia Lopez Rios<sup>2</sup>, William Hutchison<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Hospital Universitario San Vicente de Paul

# 1-C-88 Role of altered palmitoylation in mis-trafficking of NMDA receptors in Huntington disease mouse model

Rujun Kang<sup>1</sup>, Liang Wang<sup>1</sup>, Shaun Sanders<sup>1</sup>, Matthew Parsons<sup>2</sup>, Kurt Zuo<sup>1</sup>, Michael Hayden<sup>1</sup>, Lynn Raymond<sup>1</sup>

<sup>1</sup>Univ of BC, <sup>2</sup>Memorial University of Newfoundland

# 1-C-89 Detecting covert levels of awareness using a hierarchy of cognitive and different neuroimaging modalities in patients with disorders of consciousness.

Laura Gonzalez-Lara<sup>1</sup>, Raechelle Gibson<sup>1</sup>, Steve Beukema<sup>1</sup>, Lorina Naci<sup>1</sup>, Davinia Fernández-Espejo<sup>2</sup>, Damian Cruse<sup>2</sup>, Adrian Owen<sup>1</sup>

¹Western University, ²University of Birmingham

## 1-C-90 Behavior as a signature of neuroimmunological interactions

Katya Gris<sup>1</sup>, Jean-Philippe Coutu <sup>2</sup>, Denis Gris<sup>2</sup>
<sup>1</sup>Bishops University, <sup>2</sup>University of Sherbrooke

# 1-C-91 Tardive dyskinesia induced by prolonged antipsychotic treatments in a non-human primate model is associated with Akt/GSK-3Beta kinase activities

Giovanni Hernandez<sup>1</sup>, Souha Mahmoudi<sup>1</sup>, Michel Cyr<sup>2</sup>, Pierre Blanchet<sup>1</sup>, Daniel Lévesque<sup>1</sup>

<sup>1</sup>Universite de Montreal, <sup>2</sup>Université du Québec à Trois-Rivières

# 1-C-92 The effect of Dopaminergic therapy on Stimulus-response learning and decision-making in Parkinson?s disease using 3T MRI

Nole Hiebert<sup>1</sup>, Adrian Owen<sup>1</sup>, Ken Seergobin<sup>1</sup>, Penny MacDonald<sup>1</sup>
<sup>1</sup>University of Western Ontario

# 1-C-93 Prevalence of incidental findings in a multi-diagnosis psychosis, addiction and infection population in Vancouver's Downtown Eastside

Melissa Woodward<sup>1</sup>, Alexandra Vertinsky<sup>2</sup>, Manraj Heran<sup>2</sup>, Jason Chew<sup>2</sup>, Allen Thornton<sup>3</sup>, Kristina Gicas<sup>3</sup>, Heather Baitz<sup>3</sup>, Chantelle Giesbrecht<sup>3</sup>, Nena Wang<sup>3</sup>, Tiffany O'Connor<sup>3</sup>, Kristina Walclawik<sup>3</sup>, Alexander Rauscher<sup>1</sup>, G MacEwan<sup>1</sup>, Fidel Vila-Rodgriguez<sup>1</sup>, Olga <sup>1</sup>University of British Columbia, <sup>2</sup>Vancouver General Hospital, <sup>3</sup>Simon Fraser University

## 1-C-94 ERP abnormality induced by cholinergic deficiency in rats: a potential biomarker for Alzheimer?s disease

Bardia Nouriziabari<sup>1</sup>, Susmita Sarkar<sup>1</sup>, Stephanie Tanninen<sup>1</sup>, Kaori Takehara-Nishiuchi<sup>1</sup>

<sup>1</sup>University of Toronto

#### 1-C-95 A three-dimensional map of hindlimb movements evoked by intraspinal microstimulation in the lumbar spinal cord in rats Randolph Nudo<sup>1</sup>, Jordan Borrell<sup>2</sup>, Shawn Frost<sup>1</sup>

<sup>1</sup>University of Kansas Medical Center, <sup>2</sup>University of Kansas

#### D – Sensory and Motor Systems

## 1-D-96 Relative contributions of perception and prediction to hand localization in visuomotor adaptation

Bernard't Hart<sup>1</sup>, Denise Henriques<sup>1</sup>

<sup>1</sup>York University

# 1-D-97 Modulation of visual-proprioceptive integration weights during reach planning due to stochastic reference frame transformations

Parisa Abedi Khoozani<sup>1</sup>, Gunnar Blohm<sup>1</sup>

<sup>1</sup>Queen's University

# 1-D-98 Role of muscle spindle feedback in the generation of the swing movement during walking in mice

William Mayer<sup>1</sup>, Turgay Akay<sup>1</sup>

<sup>1</sup>Dalhousie University

#### 1-D-99 Investigation of the Relationship between Chronic Stress, Hearing Sensitivity and Noise-Induced Hearing Loss using a Rat Model

Anna Tyker<sup>1</sup>, Ashley Schormans<sup>1</sup>, Julia Abitbol<sup>1</sup>, Marei Typlt<sup>1</sup>, Brian Allman<sup>1</sup>

<sup>1</sup>Western University

# 1-D-100 Cortical Control of Olfactory Information Processing: The Role of the Anterior Olfactory Nucleus and Ventral Hippocampus in Vivo

Afif Agrabawi<sup>1</sup>, Caleb Browne<sup>1</sup>, Junchul Kim<sup>1</sup>

<sup>1</sup>University of Toronto

# 1-D-101 Concurrent reach and tracking adaptations of static and moving targets

Maria Ayala<sup>1</sup>, Priyanka Sharma<sup>1</sup>, Denise Henriques<sup>1</sup>

¹York University

## 1-D-102 Characterisation of spinofugal nociceptive neurons via new genetic tools

#### POSTER SESSION 1 - MONDAY, MAY 30, 2016

Farin B. Bourojeni<sup>1</sup>, Artur Kania<sup>1</sup>

<sup>1</sup>McGill University

1-D-103 Transsaccadic integration of spatial frequency information in an fMRIa paradigm

Bianca Baltaretu<sup>1</sup>, Benjamin Dunkley<sup>2</sup>, J. Douglas Crawford<sup>1</sup>

¹York University, ²The Hospital for Sick Children

1-D-104 Colour Modulates Inhibitory Control

Shawn Blizzard<sup>1</sup>, Adriela Fierro Rojas<sup>2</sup>, Mazyar Fallah<sup>1</sup>

<sup>1</sup>York University, <sup>2</sup>Benemérita Universidad Autónoma de Puebla

1-D-105 Assessing the Effects of Deafness on the Neuroanatomical Projections to the Second Auditory Cortex (A2) of the Cat

Blake Butler<sup>1</sup>, Stephen Lomber<sup>1</sup>

<sup>1</sup>University of Western Ontario

1-D-106 Effector-specific cortical mechanisms for memory-guided reaches and saccades: progression from target memory through motor planning and execution

David Cappadocia<sup>1</sup>, Simona Monaco<sup>2</sup>, Ying Chen<sup>3</sup>, J. Douglas Crawford<sup>1</sup>

¹York University, ²University of Trento, ³Queen's University

1-D-107 Changing the form of feedback (error-based verse reinforcement-based) leads to dissociable motor adaptation.

Joshua Cashaback<sup>1</sup>, Ayman Mohatarem<sup>1</sup>, Heather McGregor<sup>1</sup>, Paul Gribble<sup>1</sup>

<sup>1</sup>Western University

1-D-108 Wii Balance Board and Modified Balance Error Scoring System to assess changes in postural balance in young-adult male hockey athletes over athletic season

Hilary Cullen<sup>1</sup>, Yao Sun<sup>1</sup>, Brian Christie<sup>1</sup>, E. Paul Zehr<sup>1</sup>

<sup>1</sup>University of Victoria

1-D-109 Brain Plasticity after Concussion in Young Rats: Brain Change without Behavioural Change

Allison Dyck<sup>1</sup>, Tammy Ivanco<sup>1</sup>

<sup>1</sup>University of Manitoba

1-D-110 The role of conjugate eye movements to symmetric disparity stimuli

lan Erkelens<sup>1</sup>, William Bobier<sup>1</sup>

<sup>1</sup>University of Waterloo

1-D-111 Tonic Endocannabinoid Signaling Controls Excitatory Drive in the Superficial Lamina (I/II) of the Mouse Spinal Cord

Katherine Evely<sup>1</sup>, Arin Bhattacharjee<sup>1</sup>, Samir Haj-Dahmane<sup>1</sup>

<sup>1</sup>State University of New York at Buffalo

1-D-112 Connectivity of dI3 Interneurons during development of the mouse spinal cord

Carl Farah<sup>1</sup>, Tuan Bui<sup>1</sup>

<sup>1</sup>University of Ottawa

1-D-113 Functional characteristics of putative premotor areas in the intact, awake cat

Nicolas Fortier Lebel<sup>1</sup>, Nabiha Yahiaoui<sup>1</sup>, Toshi Nakajima<sup>1</sup>, Trevor Drew<sup>1</sup>
<sup>1</sup>Université de Montréal, GRSNC

1-D-114 Slow and fast nerves regenerate into appropriate endoneurial tubes to reinnervate tibialis anterior (TA) muscles after common peroneal (CP) nerve cut and repair; size-dependent branching occurs more distally in intramuscular sheaths

Tessa Gordon<sup>1</sup>, Joanne Totozy de Zepetnek<sup>2</sup>

<sup>1</sup>Hospital for Sick Children, <sup>2</sup>Global Regulatory Lead, Shire

1-D-115 Overexpression of the muscarinic receptors following visual training paired with cholinergic enhancement

Marianne Groleau<sup>1</sup>, Mira Chamoun<sup>1</sup>, Elvire Vaucher<sup>1</sup>

<sup>1</sup>Universite de Montreal

1-D-116 Biologically Realistic Deep Supervised Learning

Jordan Guerquiev<sup>1</sup>, Timothy Lillicrap<sup>2</sup>, Blake Richards<sup>1</sup>

<sup>1</sup>University of Toronto Scarborough, <sup>2</sup>Google DeepMind

1-D-117 Sensorimotor processing of ipsilateral and contralateral limbs in primary motor cortex

Ethan Heming<sup>1</sup>, Stephen Scott<sup>1</sup>

<sup>1</sup>Queen's University

# E – Homeostatic and Neurendocrine Systems

1-E-118 Corticosteroid Binding Globulin Programming by Prenatal Predator Odour Exposure in Mice

Sameera Abuaish<sup>1</sup>, Benjamin Hing<sup>1</sup>, Sophie St-Cyr<sup>1</sup>, Rudy Boonstra<sup>1</sup>, Patrick McGowan<sup>1</sup>

<sup>1</sup>University of Toronto

1-E-119 Glycemic condition influences subfornical organ neuron responsiveness to angiotensin

Nicole Cancelliere<sup>1</sup>, Alastair Ferguson<sup>1</sup>

<sup>1</sup>Queen's University

1-E-120 MicroRNA involvement in estradiol-mediated synaptic plasticity

Carolyn Creighton<sup>1</sup>, Jon LaMarre<sup>1</sup>, Neil MacLusky<sup>1</sup>

<sup>1</sup>University of Guelph

1-E-121 Hypothalamic CRH neurons orchestrate stress induced behaviours

Tamás Füzesi<sup>1</sup>, Nuria Daviu<sup>1</sup>, Jaclyn Wamsteeker Cusulin<sup>1</sup>, Robert Bonin<sup>2</sup>, Jaideep Bains<sup>1</sup>

<sup>1</sup>Hotchkiss Brain Institute, <sup>2</sup>University of Toronto

1-E-122 Weight Loss in the 5XFAD Mouse Model of Alzheimer's Disease: A Behavioural and Hormonal Analysis

William Gendron<sup>1</sup>, Stephanie Pelletier<sup>1</sup>, Michael Landsman<sup>1</sup>, Younes Anini<sup>1</sup>, Richard Brown<sup>1</sup>

<sup>1</sup>Dalhousie University

1-E-123 Optogenetic manipulation of clock driven activity in the OVLT

Claire Gizowski<sup>1</sup>, Cristian Zaelzer<sup>2</sup>, Charles Bourque<sup>2</sup>

<sup>1</sup>Research Institute of the McGill University Health Centre, <sup>2</sup>Research Institute of the McGill University Health Centre

#### F - Cognition and Behaviour

## 1-F-124 Circuit principles of neuronal processing in larval drosophila melanogaster thermotaxis

Bruno Afonso<sup>1</sup>, Mason Klein<sup>2</sup>, Matthew Berck<sup>1</sup>, Ivan Larderet<sup>3</sup>, Marc Gershow<sup>4</sup>, James Truman<sup>5</sup>, Simon Sprecher<sup>3</sup>, Albert Cardona<sup>5</sup>, Aravinthan Samuel<sup>6</sup>, Marta Zlatic<sup>5</sup>

<sup>1</sup>HHMI Janelia / Harvard University, <sup>2</sup>University of Miami, <sup>3</sup>University of Fribourg, <sup>4</sup>NYU, <sup>5</sup>HHMI Janelia, <sup>6</sup>Harvard University

# 1-F-125 Utility of a Reading Span Task in assessing cognition in early-phase relapsing-remitting multiple sclerosis

Maha Abu-AlHawa<sup>1</sup>, Jason Berard<sup>2</sup>, Lindsay Berrigan<sup>3</sup>, Lisa Walker<sup>4</sup>

<sup>1</sup>Carleton University, <sup>2</sup>University of Ottawa, <sup>3</sup>St. Francis Xavier University, <sup>4</sup>The Ottawa Hospital

## 1-F-126 Differences in neural circuits activated by safety learning or fear extinction in rodents

Maimoona Altaf¹, Alixandra Albert¹, Holly Turner¹, Alena Kalinina¹, Hugo Lehmann¹, Neil Fournier¹

<sup>1</sup>Trent University

# 1-F-127 Effects of forced swimming in neonatal rats with excitotoxic lesion in the corpus callosum

Alfonso Arrazola<sup>1</sup>, Gina Quirarte<sup>1</sup>, Thalía Harmony<sup>1</sup>

<sup>1</sup>Instituto de Neurobiología de la Univercidad Nacional Autonoma de México

# 1-F-128 The Relationship between Schizotypy and the Propensity to Accept Extraordinary Social Roles

Gifty Asare<sup>1</sup>, Ana Fernandez Cruz<sup>2</sup>, Ola Mohamed Ali<sup>1</sup>, Ishan Walpola<sup>1</sup>, Julia Segal<sup>3</sup>, Jacques Bruno Debruille<sup>4</sup>

<sup>1</sup>McGill University, <sup>2</sup>McGill University Integrated Program in Neuroscience, <sup>3</sup>McGill University, Douglas Mental Health University Institute, <sup>4</sup>McGill University, Douglas Mental Health University Institute, Department of Neurology and Neurosurg

## 1-F-129 The role of the cholinergic midbrain in sensorimotor gating

Erin Azzopardi<sup>1</sup>, Andrea Louttit<sup>1</sup>, Susanne Schmid<sup>1</sup>
<sup>1</sup>University of Western Ontario

# 1-F-130 Characterization of Hippocampal Inhibitory Stress Circuitry using Optogenetics

June Jee Bang<sup>1</sup>, Shubham Sharma<sup>1</sup>, Junchul Kim<sup>1</sup>
<sup>1</sup>U of T

## 1-F-131 Neuronal Pattern Separation in a Computational Model of Motion Discrimination

Nareg Berberian<sup>1</sup>, Amanda MacPherson<sup>2</sup>, Lydia Richardson<sup>1</sup>, Jean-Philippe Thivierge<sup>1</sup>

<sup>1</sup>University of Ottawa, <sup>2</sup>McGill University

#### 1-F-132 High-Throughput Behavioural Analyses to Bridge the Genotype-Phenotype Gap

Aram Bernardos<sup>1</sup>, Andrew Giles<sup>1</sup>, Rex Kerr<sup>2</sup>, Catharine Rankin<sup>1</sup>

The University of British Columbia, <sup>2</sup>Calico Labs

#### 1-F-133 Focused-Attention versus Open-Monitoring Meditation: An MEG investigation of the underlying oscillatory brain networks

Daphné Bertrand-Dubois<sup>1</sup>, David Meunier<sup>2</sup>, Tarek Lajnef<sup>1</sup>, Annalisa Pascarella<sup>3</sup>, Vittorio Pizzella<sup>4</sup>, Laura Marzetti<sup>4</sup>, Karim Jerbi<sup>1</sup>

<sup>1</sup>CERNEC, Dept. Psychologie, Université de Montréal, <sup>2</sup>Centre de Recherche en Neurosciences de Lyon (CRNL), <sup>3</sup>Consiglio Nazionale delle Ricerche (CNR - National Research Council), <sup>4</sup>Department of Neuroscience, Imaging and Clinical Sciences, G. d'Annunzio Univ

# 1-F-134 A neuroactive bacteria attenuates stress-induced behavioural deficits and inflammation independent of restoring the qut microbiota

Aadil Bharwani<sup>1</sup>, Firoz Mian<sup>1</sup>, Jane Foster<sup>1</sup>, Michael Surette<sup>1</sup>, John Bienenstock<sup>1</sup>, Paul Forsythe<sup>1</sup>

<sup>1</sup>McMaster University

#### 1-F-135 A Comparison of Pre-Surgical Language Mapping Paradigms Between MEG and fMRI

Ronald Bishop<sup>1</sup>, Christopher O'Grady<sup>2</sup>, Steven Beyea<sup>1</sup>, Gail Eskes<sup>2</sup>, Tynan Stevens<sup>2</sup>, Timothy Bardouille<sup>1</sup>

<sup>1</sup>IWK Health Centre, <sup>2</sup>Dalhousie University

# 1-F-136 Representational similarity analysis of category-related recognition-memory signals in the human medial temporal lobe Anna Blumenthal<sup>1</sup>, Bobby Stojanoski<sup>1</sup>, Chris Martin<sup>2</sup>, Rhodri Cusack<sup>1</sup>, Stefan Köhler<sup>1</sup>

<sup>1</sup>University of Western Ontario, <sup>2</sup>University of Toronto

## 1-F-137 Cognitive Function as Related to Cumulative Head Impact Exposure in Football: Effects of Position

Danielle Brewer Deluce<sup>1</sup>, Timothy Wilson<sup>1</sup>, Adrian Owen<sup>1</sup>
<sup>1</sup>Western University

#### 1-F-138 Concussion Does Not Affect an Athletes Ability to Inhibit a Motor Response

Kelsey Bryk<sup>1</sup>, Jonathan Smirl<sup>1</sup>, Alexander Wright<sup>1</sup>, Michael Kennefick<sup>1</sup>, Colin Wallace<sup>1</sup>, Paul van Donkelaar<sup>1</sup>

<sup>1</sup>The University of British Columbia

# 1-F-139 Examining the effect of chronic intranasal oxytocin administration on the neuroanatomy and behaviour in two different autism-related mouse models

Zsuzsa Buchwald<sup>1</sup>, Jacob Ellegood<sup>1</sup>, Monique Stuive<sup>1</sup>, Evdokia Anagnostou<sup>2</sup>, Jason Lerch<sup>1</sup>

<sup>1</sup>Mouse Imaging Center, Hospital for SickKids, <sup>2</sup>Holland Bloorview Research Institutie

# 1-F-140 Automatic detection of the slow waves in non-anaesthetised mice: comparison of traditional and novel methods

Olga Bukhtiyarova<sup>1</sup>, Sara Soltani<sup>1</sup>, Sylvain Chauvette<sup>1</sup>, Igor Timofeev<sup>1</sup>
<sup>1</sup>Institut universitaire en santé mentale de Québec

# 1-F-141 Comparing effects of alcohol and marijuana: A go/nogo fMRI study in young adults

Aziza Byron - Alhassan¹, Taylor Hatchard ¹, Ola Mioduszewski ¹, Andra Smith¹

<sup>1</sup>University of Ottawa

#### POSTER SESSION 1 - MONDAY, MAY 30, 2016

### 1-F-142 The Effects of Early Life Trauma on the Self in Eating Disorders

Samantha Carlucci<sup>1</sup>, Giorgio Tasca<sup>2</sup>, Georg Northoff<sup>3</sup>

<sup>1</sup>The University of Ottawa, <sup>2</sup>The Ottawa Hospital, <sup>3</sup>The Royal Ottawa Hospital

# 1-F-143 Utilization of Loss- and Gain- of- Function Approaches to test the Functional Role of Progenitor Cells in Stroke Recovery

Maheen Ceizar<sup>1</sup>, Karah Lee<sup>1</sup>, Marc Vani<sup>1</sup>, Anthony Carter<sup>1</sup>, Mirela Hasu<sup>1</sup>, Matthew Jeffers<sup>1</sup>, Amar Sahay<sup>2</sup>, Heather Cameron<sup>3</sup>, Dale Corbett<sup>1</sup>, Diane Lagace<sup>1</sup>

<sup>1</sup>University of Ottawa, <sup>2</sup>Centre of Regnerative Medicine, Harvard Medical School, <sup>3</sup>Neuroscience, National Institute of Health

# 1-F-144 Mice with deletion of choline acetyltransferase in VGLUT3-positive neurons present memory deficits and altered social behaviour

Kevin Chen<sup>1</sup>, Helena Janickova<sup>1</sup>, Marco A. M. Prado<sup>1</sup>, Vania F. Prado<sup>1</sup>
<sup>1</sup>Robarts Research Institute

# 1-F-145 Neural correlates of trial-to-trial adjustments of speed-accuracy trade-offs in premotor and primary motor cortex

Guido Guberman<sup>1</sup>, David Thura<sup>2</sup>, Paul Cisek<sup>2</sup>

<sup>1</sup>McGill University, <sup>2</sup>University of Montreal

# 1-F-146 Nicotinic restoration of GABAergic transmission in prefrontal cortex mediates facilitative effects on multisensory integration deficits in rodent models of schizophrenia

Jacob Cloke<sup>1</sup>, Robin Nguyen<sup>2</sup>, David Wasserman<sup>1</sup>, Stephanie De Lisio<sup>1</sup>, Junchul Kim<sup>2</sup>, Craig Bailey<sup>1</sup>, Boyer Winters<sup>1</sup>

<sup>1</sup>University of Guelph, <sup>2</sup>University of Toronto

# 1-F-147 Electrophysiological correlates of subphonemic processing in spoken word recognition

Samantha Kramer<sup>1</sup>, Karen Tucker<sup>1</sup>, Anna Moro<sup>1</sup>, Elisabet Service<sup>1</sup>, John Connollv<sup>1</sup>

<sup>1</sup>McMaster University

# 1-F-148 ERP investigation of attentional and language processes after concussion

Kyle Ruiter<sup>1</sup>, Rober Boshra<sup>1</sup>, Carol DeMatteo<sup>1</sup>, Michael Noseworthy<sup>1</sup>, John Connolly<sup>1</sup>

<sup>1</sup>McMaster University

# 1-F-149 Characterizing Eye-movement Behaviour and Kinematics of Non-Human Primates in a Virtual Environment

Ben Corrigan<sup>1</sup>, Roberto Gulli<sup>1</sup>, Guillaume Doucet<sup>1</sup>, Julio Martinez<sup>2</sup>

<sup>1</sup>McGill Universty, <sup>2</sup>University of Western Ontario

# 1-F-150 Disturbed Object Processing in 3xTG and 5xFAD Mouse Models of Alzheimer's Disease: Going Beyond "Object Recognition"

Samantha Creighton<sup>1</sup>, Daniel Palmer<sup>1</sup>, Vania Prado<sup>2</sup>, Marco Prado<sup>2</sup>, Bover Winters<sup>1</sup>

<sup>1</sup>University of Guelph, <sup>2</sup>University of Western Ontario

# 1-F-151 Phosphorylation of Glucocorticoid Receptor in Hippocampal Neurons of Rats Trained in Inhibitory Avoidance América Cruz-Quiroz<sup>1</sup>, Diego González-Franco<sup>1</sup>, Paola Bello-Medina <sup>1</sup>,

Roberto Prado-Alcalá<sup>1</sup>, Mauricio Díaz-Muñoz<sup>1</sup>, Gina Quirarte<sup>1</sup>

<sup>1</sup>Instituto de Neurobiología, Universidad Nacional Autónoma de México

# 1-F-152 Differential effects of the T-type calcium channel antagonist, Z944, on behaviours associated with morphine and amphetamine addiction

Jonathan Cunningham<sup>1</sup>, Carine Dias<sup>1</sup>, Maya Nesbit<sup>1</sup>, David Montes<sup>1</sup>, Terrance Snutch<sup>1</sup>, Anthony Phillips<sup>1</sup>

<sup>1</sup>University of British Columbia

# 1-F-153 Brain circuits involved in cross-modal target selection for gaze-shift

Mehdi Daemi<sup>1</sup>, Douglas Crawford<sup>1</sup>

<sup>1</sup>York University

# 1-F-154 Effect of steady-state methadone exposure on hedonic reactivity and caloric intake in rats

Stephen Daniels<sup>1</sup>, Mick Pratt<sup>1</sup>, Francesco Leri<sup>1</sup>
University of Guelph

# 1-F-155 Role for striatal NFĸB in neuroinflammation and depressive-like behaviours induced by saturated high-fat feeding.

Léa Décarie-Spain<sup>1</sup>, Sandeep Sharma<sup>1</sup>, Cecile Hryhorczuk<sup>1</sup>, Victor Issa Garcia<sup>1</sup>, Philip Barker<sup>2</sup>, Nathalie Arbour<sup>1</sup>, Thierry Alquier<sup>1</sup>, Stephanie Fulton<sup>1</sup>

<sup>1</sup>Centre hospitalier de l'Université de Montréal , <sup>2</sup>University of British Columbia

# 1-F-156 Effect of developmental lesioning of prefrontal cortex on attentional set-shifting in rats

Sagar Desai<sup>1</sup>, Brian Allman<sup>1</sup>, N Rajakumar<sup>1</sup>

<sup>1</sup>University of Western Ontario

# 1-F-157 Hook, worm, and noodle: Parsing perceptual and conceptual processes of the medial temporal lobe

Danielle Douglas<sup>1</sup>, Rachel Newsome<sup>2</sup>, Louisa Man<sup>1</sup>, Morgan Barense<sup>2</sup>
<sup>1</sup>University of Toronto, <sup>2</sup>University of Toronto, Rotman Research Institute

# 1-F-158 Differential implication of sleep stages in procedural memory consolidation following a daytime nap: a comparison between meditators and non-meditators.

Simon Dubé<sup>1</sup>, Elizaveta Solomonova<sup>1</sup>, Cloé Blanchette-Carrière<sup>1</sup>, Alexandra Duquette<sup>1</sup>, Olivier Dussault<sup>1</sup>, Michelle Carr<sup>1</sup>, Tyna Paquette<sup>1</sup>, Tore Nielsen<sup>1</sup>

<sup>1</sup>Université de Montréal

## 1-F-159 Building informative neural ensembles to decode attention in primate lateral prefrontal cortex

Lyndon Duong<sup>1</sup>, Matthew Leavitt<sup>2</sup>, Sebastien Tremblay<sup>2</sup>, Adam Sachs<sup>3</sup>, Julio Martinez-Trujillo<sup>1</sup>

<sup>1</sup>Western University, <sup>2</sup>McGill University, <sup>3</sup>The Ottawa Hospital

# 1-F-160 Synaptic zinc is required for the enhancement of adult hippocampal neurogenesis

Michael Chrusch<sup>1</sup>, Jacqueline Boon<sup>1</sup>, Simon Spanswick<sup>1</sup>, Jo Anne Stratton<sup>1</sup>, Prajay Shah<sup>1</sup>, Haley Vechiarelli<sup>1</sup>, Jeff Biernaskie<sup>1</sup>, Matthew Hill<sup>1</sup>, Richard Dyck<sup>1</sup>

<sup>1</sup>University of Calgary

# 1-F-161 Enhanced morphological development of adult generated neurons by optogenetic stimulation decreases memory stability.

Jonathan Epp<sup>1</sup>, Gisella Vetere<sup>1</sup>, Axel Guskjolen<sup>1</sup>, Yusing Gu<sup>1</sup>, Sheena Josselyn<sup>1</sup>, Paul Frankland<sup>1</sup>

<sup>1</sup>Hospital for Sick Children

# 1-F-162 Polyunsaturated Fatty Acids And Their Metabolites As Possible Mediators Of Depression-Like Behaviors In Rats

Maria Fernandes<sup>1</sup>, David Mutch<sup>2</sup>, Francesco Leri<sup>2</sup>

<sup>1</sup>Université de Montréal, <sup>2</sup>University of Guelph

## 1-F-163 Does Physical Activity prevent Dementia? A systematic review

Viviane Grassmann<sup>1</sup>, George Mammen<sup>2</sup>, Guy Faulkner<sup>3</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Centre for Addiction and Mental Health, <sup>3</sup>The University of British Columbia

# 1-F-164 Using pupil response to assess cognitive function across the healthy lifespan

Jeff Huang<sup>1</sup>, Matthew Smorenburg<sup>1</sup>, Brian Coe<sup>1</sup>, Chin-An Wang<sup>1</sup>, Douglas Munoz<sup>1</sup>

<sup>1</sup>Queen's University

# 1-F-165 Using eye movements to establish distinct biomarkers across the healthy lifespan

Matthew Smorenburg<sup>1</sup>, Rachel Yep<sup>1</sup>, Brian Coe<sup>1</sup>, Donald Brien<sup>1</sup>, Douglas Munoz<sup>1</sup>

<sup>1</sup>Queen's University

# **G – Novel Methods and Technology Development**

## 1-G-166 Novel formulation using dendrimers for the intranasal drug delivery to brain

Kosalan Akilan<sup>1</sup>, Yogesh Katare<sup>1</sup>, Ritesh Daya<sup>1</sup>, Jayant Bhandari<sup>1</sup>, Abhay Chauhan<sup>2</sup>, Ram Mishra<sup>1</sup>

<sup>1</sup>McMaster University, <sup>2</sup>Concordia University

# 1-G-167 An axicon-based light sheet microscope for large scale and high resolution brain imaging

Cléophace Akitegetse<sup>1</sup>, Véronique Rioux<sup>1</sup>, Yves De Koninck<sup>1</sup>, Daniel Côté<sup>1</sup>, Martin Lévesque<sup>1</sup>

<sup>1</sup>Université Laval

#### 1-G-168 Zero-Mode Waveguide Technology for Fluorescent Single-Subunit Counting

Mark Aurousseau<sup>1</sup>, Hugo McGuire<sup>1</sup>, Derek Bowie<sup>1</sup>

<sup>1</sup>McGill University

#### 1-G-169 Using Induced Pluripotent Stem Cells to Model Rare Neurodevelopmental Disorders

Scott Bell<sup>1</sup>, Huashan Peng<sup>1</sup>, Carl Ernst<sup>1</sup>

<sup>1</sup>McGill University

# 1-G-170 Optogenetic control of cAMP and cGMP signalling in living neurons

Fiona Bergin<sup>1</sup>, Megan Valencia<sup>1</sup>, Kenichi Okamoto<sup>1</sup>

<sup>1</sup>University of Toronto

# 1-G-171 Anesthetic Detection of Covert Consciousness in a Patient with Unresponsive Wakefulness Syndrome

 $Stefanie\ Blain-Moraes^1, John\ Connolly^2,\ George\ Mashour^3$ 

<sup>1</sup>McGill University, <sup>2</sup>McMaster University, <sup>3</sup>University of Michigan

# 1-G-172 Novel defined medium GAD-67-GFP-positive organotypic mouse spinal cord cultures; preservation of dorsal horn neuronal and astrocyte phenotypes

Paul Boakye<sup>1</sup>, Emma Schmidt<sup>1</sup>, Kerri Whitlock<sup>1</sup>, Vladimir Rancic<sup>1</sup>, Bijal Rawal<sup>1</sup>, Klaus Ballanyi<sup>1</sup>, Peter Smith<sup>1</sup>

<sup>1</sup>University of Alberta

#### 1-G-173 Machine learning based framework for EEG/ERP analysis Rober Boshra<sup>1</sup>, Kyle Ruiter<sup>1</sup>, James Reilly<sup>1</sup>, John Connolly<sup>1</sup> <sup>1</sup>McMaster University

# 1-G-174 Ultrafast two-photon measurement of membrane potential using a genetically encoded voltage indicator

Simon Chamberland<sup>1</sup>, François St-Pierre<sup>2</sup>, Michael Lin<sup>3</sup>, Katalin Toth<sup>1</sup>
<sup>1</sup>Universite Laval, <sup>2</sup>Baylor College of Medicine and Rice University, <sup>3</sup>Stanford University

# IBRO – International Brain Research Organization

1-IBRO-175 Chronic cannabinoid exposure during adolescence disrupts sensorimotor gating and downregulates COMT function in the prefrontal cortex in rats

Oualid Abboussi1

<sup>1</sup>University of KwaZulu-Natal

# 1-IBRO-176 Identification of a molecular mechanism leading to failure in neuroglial differentiation in focal cortical dysplasias (FCDs) offers clues to brain development

Simoni Avansini<sup>1</sup>, Fabio Torres<sup>1</sup>, Danyella Dogini<sup>1</sup>, André Vieira<sup>1</sup>, Fabio Rogério<sup>1</sup>, Ana Coan<sup>1</sup>, Rodrigo Secolin<sup>1</sup>, Helder Tedeschi<sup>1</sup>, Luciano Queiroz<sup>1</sup>, Fernando Cendes<sup>1</sup>, Iscia Lopes-Cendes<sup>1</sup>

<sup>1</sup>University of Campinas

# 1-IBRO-177 Iron-induced oxidative stress activates AKT and ERK1/2 and decreases Dyrk1B and PRMT1 in neuroblastoma SH-SY5Y cells.

Elizabeth Bautista<sup>1</sup>, Paula Vergara<sup>1</sup>, Jose Segovia<sup>1</sup>
<sup>1</sup>CINVESTAV

# 1-IBRO-178 Increased epileptic-like activity in synapsin-silenced Helix neurons associated with increased Ca2+ and Ca2+-activated BK currents.

Oscar Brenes<sup>1</sup>, David Vandael<sup>2</sup>, Emilio Carbone<sup>2</sup>, Pier Giorgio Montarolo<sup>2</sup>, Mirella Ghirardi<sup>2</sup>

<sup>1</sup>University of Costa Rica, <sup>2</sup>University of Turin

# 1-IBRO-179 Functional changes in hippocampal neurons inducted by the effects of ApoE4 on AMPA-type channels

Diana Marcela Cuestas Torres<sup>1</sup>, Fernando Cardenas<sup>1</sup>

<sup>1</sup>Universidad de los Andes

#### POSTER SESSION 2 – TUESDAY, MAY 31, 2016

#### A - Development

#### 2-A-1 The Immune Role in Sexual Dimorphism

Roksana Khalid<sup>1</sup>, Jane Foster<sup>1</sup>

<sup>1</sup>McMaster University

# 2-A-2 The ENU-3 protein family members function in the Wnt pathway parallel to UNC-6/Netrin to promote motor neuron axon outgrowth in C. elegans.

Roxana Florica<sup>1</sup>, Victoria Hipolito<sup>1</sup>, Stephen Bautista<sup>1</sup>, Costin Antonescu<sup>1</sup>, Marie Killeen<sup>1</sup>

<sup>1</sup>Ryerson University

# 2-A-3 The role of BDNF in Hebbian structural plasticity in the developing visual system

Elena Kutsarova<sup>1</sup>, Martin Munz<sup>1</sup>, Alex Wang<sup>1</sup>, Olesia Bilash<sup>1</sup>, Carmelia Lee<sup>1</sup>, Yuan Yuan Zhang<sup>1</sup>, Edward Ruthazer<sup>1</sup>

<sup>1</sup>Montreal Neurological Institute, McGill University

# 2-A-4 Role of HDAC2 in GABAergic Parvalbumin-positive cell maturation in basolateral amygdala

Marisol Lavertu Jolin<sup>1</sup>, Théo Badra<sup>1</sup>, Graziella Di Cristo<sup>1</sup>

<sup>1</sup>CHU Sainte-Justine, Université de Montréal

#### 2-A-5 Purkinje cell axon torpedoes in the developing mouse cerebellum

Lovisa Ljungberg<sup>1</sup>, Angela Yang<sup>1</sup>, Sriram Jayabal<sup>1</sup>, Sabrina Quilez<sup>1</sup>, Alanna Watt<sup>1</sup>

<sup>1</sup>McGill University

# 2-A-6 The functional requirement for clustered Protocadherin diversity in dendrite self-avoidance

Julie Marocha<sup>1</sup>, Julie Lefebvre<sup>1</sup>

<sup>1</sup>Hospital for Sick Children

# 2-A-7 Postnatal development of cerebellar Purkinje cell firing properties

Autumn Metzger<sup>1</sup>, Charlotte Rosen<sup>1</sup>, Alanna Watt<sup>1</sup>

<sup>1</sup>McGill University

## 2-A-8 Roles of Semaphorin/Plexin signaling in synapse map formation in C. elegans

Kota Mizumoto<sup>1</sup>

<sup>1</sup>University of British Columbia

# 2-A-9 The Mesocorticolimbic Dopamine Pathway Exhibits A Phenotypic Plasticity To The Experience Of Early Life Adversity

Niki Hosseini-Kamkar<sup>1</sup>, J. Bruce Morton<sup>1</sup>

<sup>1</sup>University of Western Ontario

# 2-A-10 Cellular mechanisms involved in retinoic acid-induced growth cone turning during neuronal regeneration

Tamara Nasser<sup>1</sup>, Gaynor Spencer<sup>1</sup>

<sup>1</sup>Brock University

# B – Neural Excitability, Synapses, and Glia: Cellular Mechanisms

# 2-B-11 Characterization of a synaptic vesicle binding site near the tip of the CaV2.2 C-terminal

Sabiha Gardezi¹, Arup Nath¹, Fiona Wong¹, Qi Li¹, Elise Stanley¹

<sup>1</sup>Krembil Research Institute

## 2-B-12 Target-specific modulation of the cortico-raphe pathway by cannabinoids, but not serotonin

Sean Geddes<sup>1</sup>, Saleha Assadzada<sup>1</sup>, David Lemelin<sup>1</sup>, Alexandra Sokolovski<sup>1</sup>, Richard Bergeron<sup>1</sup>, Samir Haj-Dahmane<sup>1</sup>, Jean-Claude Beigue<sup>1</sup>

<sup>1</sup>University of Ottawa

### 2-B-13 Netrin-1 is a potent regulator of synaptic function in the adult hippocampus

Stephen Glasgow<sup>1</sup>, Ian Beamish<sup>1</sup>, Julien Gibon<sup>1</sup>, Anne McKinney<sup>2</sup>, Philippe Séguéla<sup>1</sup>, Edward Ruthazer<sup>1</sup>, Timothy Kennedy<sup>1</sup>

<sup>1</sup>Montreal Neurological Institute, <sup>2</sup>McGill University

# 2-B-14 State- and frequency-dependent modifications of medial temporal lobe activity following deep brain stimulation in macaques

Andrea Gomez Palacio Schjetnan<sup>1</sup>, Timothy Leonard<sup>1</sup>, Omid Talakoub<sup>1</sup>, Kari Hoffman<sup>1</sup>

<sup>1</sup>York University

#### 2-B-15 Corticosterone as an Acute Model of Stress: Effects on 5-HT7 Receptor Signalling in the HT22 Hippocampus-Derived Cell-Line

Nyasha Gondora<sup>1</sup>, Afroditi Blandin<sup>2</sup>, Michael Beazely<sup>1</sup>, John Mielke<sup>1</sup>
<sup>1</sup>University of Waterloo, <sup>2</sup>Technische Universität Braunschweig

# 2-B-16 Mechanism of asymmetric electrical coupling between a pair of cardiorespiratory neurons

Yueling Gu<sup>1</sup>, Guan Zhu<sup>1</sup>, Neil Magoski<sup>1</sup>

<sup>1</sup>Queen's University

# 2-B-17 Developing Multi-Compartment Models of Interneuron Specific 3 (IS3) Cells in Hippocampus Using a Semi-Automated Approach

Alexandre Guet-McCreight<sup>1</sup>, Olivier Camiré<sup>2</sup>, Lisa Topolnik<sup>2</sup>, Frances Skinner<sup>1</sup>

<sup>1</sup>Krembil Research Institute & University of Toronto, <sup>2</sup>Centre de Recherche du CHU de Québec, Université Laval

# 2-B-18 Calcium Responses to Single Action Potentials in Spinal Cord Lamina I Neurons

Erika Harding<sup>1</sup>, Michael Salter<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# 2-B-19 New evidence for the involvement of BDNF and pro-BDNF in the regulation of aggressive behavior

Tatiana Ilchibaeva<sup>1</sup>, Anton Tsybko<sup>1</sup>, Elena Kondaurova<sup>1</sup>, Rimma Kozhemyakina<sup>1</sup>, Vladimir Naumenko<sup>1</sup>

<sup>1</sup>The Institute of Cytology and Genetics SB RAS

#### 2-B-20 Astrocyte independent neurovascular coupling

Adam Institoris<sup>1</sup>, Grant Gordon<sup>1</sup>

<sup>1</sup>University of Calgary

# 2-B-21 Effects of phosphorylation on neurosteroid-induced modulation of GABAA receptor currents

Jaymin Jeong<sup>1</sup>, Michael Poulter<sup>1</sup>

<sup>1</sup>University of Western Ontario

# 2-B-22 Persistent postanesthetic memory deficits are mediated by an inflammatory pathway

Kirusanthy Kaneshwaran<sup>1</sup>, Sean Haffey<sup>1</sup>, Gang Lei<sup>1</sup>, Dian-Shi Wang<sup>1</sup>, Beverley Orser<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Toronto; Sunnybrook Health Sciences Centre

# 2-B-23 Exploring the energetics of a high-frequency neuronal oscillator using computational models

Illva Kozak<sup>1</sup>, John Lewis<sup>1</sup>

<sup>1</sup>University of Ottawa

# 2-B-24 Oscillations promote neuronal discrimination of EPSP events with single neurons and population codes

Eric Kuebler<sup>1</sup>, Jean-Philippe Thivierge<sup>1</sup>

<sup>1</sup>University of Ottawa

# 2-B-25 Expression and roles of K+ channels (Kir2.1, Kv1.3) in microglial anti-inflammatory states: Proliferation and migration Doris Lam<sup>1</sup>, Lyanne Schlichter<sup>1</sup>

<sup>1</sup>Krembil Research Institute, University of Toronto

# 2-B-26 NMDA receptor elevation of cytosolic reactive oxygen species strengthens GABAergic signaling

Erik Larson<sup>1</sup>, Michael Accardi<sup>1</sup>, Derek Bowie<sup>1</sup>

<sup>1</sup>McGill

# 2-B-27 Morphine-mediated phosphorylation of the P2X7 receptor critically gates analgesic tolerance

Heather Leduc-Pessah<sup>1</sup>, Nicholas Weilinger<sup>1</sup>, Churmy Fan<sup>1</sup>, Nicole Burma<sup>1</sup>, Roger Thompson<sup>1</sup>, Tuan Trang<sup>1</sup>

<sup>1</sup>University of Calgary

# 2-B-28 Correlated synaptic inputs drive dendritic calcium amplification and cooperative plasticity during clustered synapse development

Kevin Lee<sup>1</sup>, Cary Soares<sup>1</sup>, Jean-Philippe Thivierge<sup>1</sup>, Jean-Claude Beique<sup>1</sup>

<sup>1</sup>University of Ottawa

# 2-B-29 AMPK-dependent regulation of the sodium channel Nav1.3 in rat subfornical organ

Samantha Lee<sup>1</sup>, Lauren Shute<sup>1</sup>, Mark Fry<sup>1</sup>

<sup>1</sup>University of Manitoba

# 2-B-30 The role of PAK signaling in the entorhinal cortex in the regulation of synaptic plasticity and social memory

Celeste Leung<sup>1</sup>, Feng Cao<sup>1</sup>, Zhengping Jia<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# 2-B-31 Glycine primes depression of NMDA receptor-mediated synaptic transmission in pyramidal neurons but not interneurons in the CA1 region of the hippocampus

Hongbin LI<sup>1</sup>, Ameet Sengar<sup>1</sup>, Lu Han<sup>1</sup>, Pragya Komal<sup>1</sup>, Michael Salter<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# 2-B-32 Presynaptic NMDA receptors act via RIM1αβ to control the readily releasable pool in neocortical layer-5 pyramidal neurons

Therese Abrahamsson<sup>1</sup>, Sally Li<sup>1</sup>, Christina You Chien Chou<sup>1</sup>, Adamo Mancino<sup>1</sup>, Erin Nuro<sup>1</sup>, William Todd Farmer<sup>1</sup>, Rui Costa<sup>2</sup>, Kate Buchanan<sup>3</sup>, Dale Elgar<sup>3</sup>, Arne Blackman<sup>3</sup>, Julia Oyrer<sup>3</sup>, Adam Tudor-Jones<sup>3</sup>, Mark Van Rossum<sup>2</sup>, Keith Murai<sup>1</sup>, Per Jesper Sjostrom<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>University of Edinburgh, <sup>3</sup>University College London

# 2-B-33 Molecular mechanisms of IGF-1 on the growth cone quidance in developing motoneuron.

Jau-Cheng Liou<sup>1</sup>, Kun-Lin Yang<sup>1</sup>

<sup>1</sup>National Sun Yat-Sen University

## 2-B-34 Rapid postsynaptic cAMP modulates synapse structural potentiation (sLTP)

Thomas Luyben<sup>1</sup>, Jelena Borovac<sup>1</sup>, Megan Valencia<sup>1</sup>, Mustafa Khan<sup>1</sup>, Kenichi Okamoto<sup>1</sup>

<sup>1</sup>The Lunenfeld-Tanenbaum Research Institute

#### 2-B-35 Binding Affinity of Guanosine to the G1 Receptor

Crystal Mahadeo<sup>1</sup>, Cai Jiang<sup>1</sup>, Ritesh Daya<sup>1</sup>, Yong-Fang Zhu<sup>1</sup>, Ram Mishra<sup>1</sup>, Shucui Jiang<sup>1</sup>

<sup>1</sup>McMaster University

## 2-B-36 Sex Differences in Microglia and P2X4 Receptor Mediation of Neuropathic Pain in Rats

Josiane Mapplebeck<sup>1</sup>, Orla Moriarty <sup>2</sup>, Simon Beggs<sup>1</sup>, Yushan Tu<sup>1</sup>, Jeffrey Moqil<sup>1</sup>, Michael Salter<sup>1</sup>

<sup>1</sup>Hospital for Sick Children, <sup>2</sup>University College London

# 2-B-37 Neuronal correlates for bi-directional adaptation of the hypothalamic-pituitary-adrenal (HPA) axis during chronic stress.

Sara Matovic<sup>1</sup>, Eric Salter<sup>1</sup>, Wataru Inoue<sup>1</sup>

<sup>1</sup>Robarts Research Institute

## 2-B-38 Theta Burst Neural Activity Alters Resting Astrocyte Ca2+ and Arteriole Tone

Eslam Mehina<sup>1</sup>, Grant Gordon<sup>1</sup>

<sup>1</sup>University of Calgary

## 2-B-39 Origins of voltage-gated sodium and calcium channels in primordial single-celled eukaryote Salpingoeca rosetta

Amrit Mehta<sup>1</sup>, David Spafford<sup>1</sup>

<sup>1</sup>University of Waterloo

# 2-B-40 NMDA receptor/CaMKII signaling modulates firing properties in cerebellar stellate cells

Lois Miraucourt<sup>1</sup>, Rvan Alexander<sup>1</sup>, Derek Bowie<sup>1</sup>

<sup>1</sup>McGill University

# 2-B-41 Regulation of entorhinal cortical input to hippocampal granule cells by local inhibitory network in the dentate gyrus

Yanina Mircheva<sup>1</sup>, Katalin Toth<sup>1</sup>

<sup>1</sup>University of Laval, Institut Universitaire de la sante mentale Robert Giffard

# 2-B-42 *PV+ Interneurons Constrain the Lateral Amygdala Engram to a Sparse Representation*

Dano Morrison<sup>1</sup>, Chen Yan<sup>1</sup>, Adelaide Yiu<sup>1</sup>, Sheena Josselyn<sup>1</sup>

<sup>1</sup>University of Toronto

#### POSTER SESSION 2 - TUESDAY, MAY 31, 2016

# 2-B-43 Dexmedetomidine prevents an anesthetic-induced persistent increase in GABAA receptor current

Fariya Mostafa<sup>1</sup>, Irene Lecker<sup>1</sup>, Dian-Shi Wang<sup>1</sup>, Junhui Wang<sup>1</sup>, Kirusanthy Kaneshwaran<sup>1</sup>, Sinziana Avramescu<sup>2</sup>, Gang Lei<sup>1</sup>, Beverley Orser<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Toronto; Sunnybrook Health Sciences Centre

# 2-B-44 Non-convulsive seizures observed from adult mice following middle cerebral artery occlusion: Involvement of hippocampal circuitry

Sivakami Mylvaganam<sup>1</sup>, Justin Wang<sup>1</sup>, Saeyon Mylvaganam<sup>1</sup>, Chiping Wu<sup>1</sup>, James Eubanks<sup>1</sup>, Liang Zhang<sup>1</sup>

<sup>1</sup>Toronto Western Hospital

## 2-B-45 Netrin-1 Regulates Mitochondrial Dynamics in Oligodendrocytes

Diane Nakamura<sup>1</sup>, Timothy Kennedy<sup>1</sup>

<sup>1</sup>Montreal Neurological Institute

# **2-B-46** Synaptic gain control in the neuroendocrine stress axis Eric Salter<sup>1</sup>, Sara Matovic<sup>1</sup>, Wataru Inoue<sup>1</sup>

<sup>1</sup>University of Western Ontario

#### C - Disorders of the Nervous System

### 2-C-47 Amyloid- β Clearance by Glia of wild-type and FAD amyloid

Shireen Hossain<sup>1</sup>, Meng Zhang<sup>1</sup>, Nancy He<sup>1</sup>, Guillermina Almazan<sup>1</sup>, Gerhard Multhaup<sup>1</sup>

<sup>1</sup>McGill University

## 2-C-48 Exploring the effect of scyllo-inositol treatment on the transcriptome in a mouse model of Alzheimer's disease

Qingda Hu<sup>1</sup>, Mary Brown<sup>2</sup>, Aaron Lai<sup>1</sup>, JoAnne McLaurin<sup>1</sup>
<sup>1</sup>University of Toronto, <sup>2</sup>Sunnybrook Health Sciences Centre

# 2-C-49 GSK-3β specific inhibitor, TDZD-8, is neuroprotective against neonatal hypoxic ischemic brain injury

Sammen Huang<sup>1</sup>, Haitao Wang<sup>1</sup>, Ahmed Abussaud<sup>1</sup>, Ekaterina Turlova<sup>1</sup>, Ana Martinez<sup>2</sup>, Hong-Shuo Sun<sup>1</sup>, Zhong-Ping Feng<sup>1</sup>

<sup>1</sup>University of Toronto , <sup>2</sup>Centro de Investigaciones Biologicas-CSIC

# 2-C-50 Microstimulation-induced tremor oscillations in human globus pallidus

William Hutchison<sup>1</sup>, Shane Ellis<sup>1</sup>, Diellor Basha<sup>1</sup>, Andres Lozano<sup>1</sup>, Mojdan Hodaie<sup>1</sup>, Suneil Kalia<sup>1</sup>, Adriana Lopez Rios<sup>2</sup>

<sup>1</sup>University of Toronto and Toronto Western Hospital, <sup>2</sup>Hospital Universitario San Vicente de Paul Rionegro-Medellin

# 2-C-51 Effects of a nutraceutical formulation on hippocampal neurogenesis, brain-derived neurotropic factor and memory in the 3xTq-AD mouse model of Alzheimer's disease

Craig Hutton<sup>1</sup>, Ledor Babatinca<sup>1</sup>, Judith Tran<sup>1</sup>, Elyse Rosa<sup>1</sup>, Jennifer Lemon<sup>1</sup>, Minesh Kapadia<sup>1</sup>, Boris Sakic<sup>1</sup>, C. David Rollo<sup>1</sup>, Douglas Boreham<sup>1</sup>, Margaret Fahnestock<sup>1</sup>, J. Martin Wojtowicz<sup>2</sup>, Suzanna Becker<sup>1</sup>

<sup>1</sup>McMaster University, <sup>2</sup>University of Toronto

# 2-C-52 A simple network simulates symptoms of schizophrenia by integrating functions of inhibitory, excitatory, and neuromodulatory systems

Nathan Insel<sup>1</sup>, Blake Richards<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Toronto Scarborough

# 2-C-54 Interaction between Alzheimer's Disease and Metabolic syndrome

Nadezda Ivanova<sup>1</sup>, Nina Weishaupt<sup>1</sup>, Shawn Whitehead<sup>1</sup>, David Cechetto<sup>1</sup>

<sup>1</sup>Western University

# 2-C-55 4-Aminopyridine alleviates ataxia and reverses cerebellar cortical output deficiency in a mouse model of spinocerebellar ataxia type 6

Sriram Jayabal<sup>1</sup>, Alanna Watt<sup>1</sup>

<sup>1</sup>McGill University

## 2-C-56 Combinational Therapeutics in Alzheimer Disease: A Novel Treatment Paradigm

Stefan Jevtic<sup>1</sup>, Mingzhe Liu<sup>2</sup>, Kelly Markham-Coultes<sup>3</sup>, Kullervo Hynynen<sup>2</sup>, Isabelle Aubert<sup>2</sup>, JoAnne McLaurin<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Toronto, Sunnybrook Research Institute, <sup>3</sup>Sunnybrook Research Institute

# 2-C-57 After intracerebral hemorrhage, oligodendrocyte precursors proliferate and differentiate inside white-matter tracts in the rat striatum

Michael Joseph<sup>1</sup>, Jayalakshmi Caliaperumal<sup>2</sup>, Lyanne Schlichter<sup>1</sup>

<sup>1</sup>Krembil Research Institute, University Health Network/University of Toronto, <sup>2</sup>Krembil Research Institute, University Health Network

### 2-C-58 Defining the circuitry of Infantile Spasms using the Ts65Dn mouse model.

Krutika Joshi<sup>1</sup>, Ara Karakashian<sup>1</sup>, Lily Shen<sup>1</sup>, Miguel Cortez<sup>1</sup>, O.Carter Snead<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# 2-C-59 PAOPA - A promising drug candidate for neuropsychiatric disorders and its neuroprotective effects through increased expression of neurotrophic factors

Hetshree Joshi<sup>1</sup>, Shreya Prashar<sup>1</sup>, Ram Mishra<sup>1</sup>

<sup>1</sup>McMaster University

## 2-C-60 Functional Integration Of New Cortical Neurons Following Focal Stroke

Timal Kannangara<sup>1</sup>, Jean-Claude Béïque<sup>1</sup>, Diane Lagace<sup>1</sup>
<sup>1</sup>University of Ottawa

# 2-C-61 Characterizing Spontaneous Recovery of Motor Function Following Cortical and Subcortical Stroke

**Sudhir Karthikeyan<sup>1</sup>, Matthew Jeffers<sup>1</sup>, Anthony Carter<sup>1</sup>, Dale Corbett<sup>1</sup>**<sup>1</sup>University of Ottawa

# 2-C-62 Inhibitory Synaptic Transmission and KCC2 Function in the Motor Cortex of the Presymptomatic ALS Mouse

Sahara Khademullah<sup>1</sup>, Zahra Dargaei<sup>1</sup>, Melanie Woodin<sup>1</sup> University of Toronto

# 2-C-63 Toward a valid animal model of alcohol use disorder in schizophrenia: an assessment of face, predictive and construct validities

Jibran Khokhar<sup>1</sup>, Alan Green<sup>1</sup>

<sup>1</sup>Dartmouth College

# 2-C-64 SUM01 over-expression in adult neurogenesis and Alzheimer's disease pathology

Erin Knock<sup>1</sup>, Grace Rooke<sup>2</sup>, Joseph Silburt<sup>1</sup>, Kyung Han<sup>1</sup>, Kathy Ha<sup>1</sup>, Zhilan Wang<sup>1</sup>, Rosemary Ahrens<sup>1</sup>, Isabelle Aubert<sup>3</sup>, Ottavio Arancio<sup>4</sup>, Paul Fraser<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Dalhousie University, <sup>3</sup>Sunnybrooke Research Institute, <sup>4</sup>Columbia University

# 2-C-65 DIXDC1 phosphorylation and control of dendritic morphology is impaired by rare genetic variants

Vickie Kwan<sup>1</sup>, Claudia Hung<sup>1</sup>, Nicholas Holzapfel<sup>1</sup>, Nadeem Murtaza<sup>1</sup>, Brianna Unda<sup>1</sup>, Sean White<sup>1</sup>, Kristin Hope<sup>1</sup>, Ray Truant<sup>1</sup>, Stephen Scherer<sup>2</sup>, Karun Singh<sup>1</sup>

<sup>1</sup>McMaster University, <sup>2</sup>Hospital for Sick Children

# 2-C-66 Molecular basis of using scyllo-inositol as a treatment for neuropsychiatric symptoms

Aaron Lai<sup>1</sup>, Qingda Hu<sup>1</sup>, JoAnne McLaurin<sup>1</sup>

<sup>1</sup>Sunnybrook Research Institute

# 2-C-67 Characterization of functional and pathological changes in the brain microvasculature in a rat model of Alzheimer's disease

Lewis Joo<sup>1</sup>, Aaron Lai<sup>1</sup>, John Sled<sup>2</sup>, JoAnne McLaurin<sup>1</sup>, Bojana Stefanovic<sup>1</sup>

<sup>1</sup>Sunnybrook Research Institute, <sup>2</sup>Hospital for Sick Children

## 2-C-68 The role of hypertension and inflammation in an Alzheimer disease rat model

Alexander Levit<sup>1</sup>, Vladimir Hachinski<sup>1</sup>, Shawn Whitehead<sup>1</sup>
<sup>1</sup>University of Western Ontario

#### 2-C-69 Inhibition of co-chaperone proteins to mitigate dopaminergic neurodegeneration

Stanley Li<sup>1</sup>, Suneil Kalia<sup>1</sup>

<sup>1</sup>University of Toronto

## 2-C-70 Abeta Intermediates in the CSF of Patients with Mild Cognitive Impairment versus Alzheimer Disease

Filip Liebsch<sup>1</sup>, Luka Kulic<sup>2</sup>, Charlotte Teunissen<sup>3</sup>, Christoph Hock<sup>2</sup>, Judes Poirier<sup>1</sup>, John Breitner<sup>1</sup>, Gerd Multhaup<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>University of Zurich, <sup>3</sup>VU University Medical Center

# 2-C-71 Interleukin-4-evoked alternative microglial activation increases neutrophil infiltration, astrogliosis and neuron damage if injected into the brain at the onset of ischemia

Starlee Lively<sup>1</sup>, Sarah Hutchings<sup>2</sup>, Lyanne Schlichter<sup>3</sup>

<sup>1</sup>Krembil Research Institute, <sup>2</sup>National University of Ireland Galway, <sup>3</sup>Krembil Research Institute

# 2-C-72 Compensatory forelimb opportunity affects performance in a rat model of post-stroke reaching.

Jessica Livingston-Thomas<sup>1</sup>, Matthew Jeffers<sup>1</sup>, Dale Corbett<sup>1</sup>
<sup>1</sup>University of Ottawa

# 2-C-73 Neuronal nitric oxide synthase regulates the slow EPSC of cerebellar PF-PN synapses by modulating STIM1-mediated gating of TRPC3 channels

Wei-Yang Lu<sup>1</sup>, Le Gui<sup>1</sup>, Yun-Yan Xiang<sup>1</sup>, Wataru Inove<sup>1</sup>, Qingping Feng<sup>1</sup>

The University of Western Ontario

# 2-C-74 Vasculotide treatment accelerates restoration of the blood-brain barrier after focused ultrasound in a mouse model of Alzheimer's disease

Madelaine Lynch<sup>1</sup>, Meaghan O'Reilly<sup>1</sup>, Kelly Coultes<sup>1</sup>, Paul Van Slyke<sup>2</sup>, Dan Dumont<sup>1</sup>, Kullervo Hynynen<sup>1</sup>, Isabelle Aubert<sup>1</sup>

<sup>1</sup>Sunnybrook Research Institute, <sup>2</sup>Vasomune Therapeutics

# 2-C-75 Mobilization of Hematopoietic Precursor Cells Highly Expressing the Interleukin-1 Receptor to the Central Nervous System During Experimental Autoimmunce Encephalomyelitis

Benoit Mailhot<sup>1</sup>, Sébastien Lévesque<sup>1</sup>, Alexandre Paré<sup>1</sup>, Daniel Coutu<sup>2</sup>, Timm Schroeder<sup>2</sup>, Steve Lacroix<sup>1</sup>

<sup>1</sup>Centre Hospitalier Université Laval (CHUL), <sup>2</sup>ETH

# 2-C-76 Examining the protective effects of physical exercise on the hippocampal formation in a mouse model of Alzheimers disease

Ewelina Maliszewska-Cyna<sup>1</sup>, Jonathan Oore<sup>1</sup>, Kristiana Xhima<sup>1</sup>, Lynsie Thomason<sup>1</sup>, Joseph Steinman<sup>2</sup>, JoAnne McLaurin<sup>1</sup>, John Sled<sup>2</sup>, Bojana Stefanovic<sup>1</sup>, Isabelle Aubert<sup>1</sup>

<sup>1</sup>Sunnybrook Research Institute, <sup>2</sup>Hospital for Sick Children

# 2-C-77 Identification of protein interactions regulated by alpha-synuclein serine 129 phosphorylation

Maria Marano<sup>1</sup>, Ye Liu<sup>1</sup>, Kyung Han<sup>1</sup>, Meredith Fraser<sup>2</sup>, Tammy Langman<sup>1</sup>, Anurag Tandon<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Dalhousie University

#### 2-C-78 Neuroprotective Potentiel of Epsilon-Viniferin in a Cellular Model of Parkinson's Disease

Alex Gelinas<sup>1</sup>, Justine Renaud<sup>1</sup>, Valérie Leblanc<sup>1</sup>, Jerôme Guillard<sup>2</sup>, Maria Martinoli<sup>1</sup>

<sup>1</sup>Université du Québec, <sup>2</sup>Université de Poitiers

# 2-C-79 Behavioral and neurochemical changes in mice with increased dopamine transporter and decreased vesicular monoamine transporter 2 expression

Shababa Masoud<sup>1</sup>, Amy Ramsey<sup>1</sup>, Gary Miller<sup>2</sup>, Ali Salahpour<sup>1</sup>
<sup>1</sup>University of Toronto, <sup>2</sup>Emory University

# 2-C-80 High-throughput phenotypic profiling of genes implicated in Autism Spectrum Disorders

Troy McDiarmid<sup>1</sup>, Catharine Rankin <sup>1</sup>

<sup>1</sup>Univerisity of British Columbia

# 2-C-81 Are There Sex Linked Differences Following Ischemic Injury Across the Longitudinal Axis of the Rat Hippocampus?

Sheleza Ahad<sup>1</sup>, John Mielke<sup>1</sup>

<sup>1</sup>University of Waterloo

## 2-C-82 A novel chemo-optogenetic model of inducible focal epileptic seizures

Rea Mitelman<sup>1</sup>, Dana Levy<sup>1</sup>, Ilan Lampl<sup>1</sup>, Ofer Yizhar<sup>1</sup>

<sup>1</sup>Weizmann Institute of Science

## 2-C-83 The role of the subthalamic nucleus in response inhibition: evidence from both single-cell level and local field potentials in the

#### POSTER SESSION 2 - TUESDAY, MAY 31, 2016

#### human sub-thalamic nucleus with Parkinson's disease

Negar Mohammadi<sup>1</sup>, Luis Fernando Botero Posada<sup>2</sup>, Adriana Lucia Lopez Rios<sup>2</sup>, William Hutchison<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Hospital Universitario De San Vicente Fundacion

# 2-C-84 Multi-drug therapeutic approach enhances neurogenesis in Alzheimer's disease mice

Christopher Morrone<sup>1</sup>, Lynsie Thomason<sup>1</sup>, Mary Brown<sup>1</sup>, Isabelle Aubert<sup>1</sup>, JoAnne McLaurin<sup>1</sup>

<sup>1</sup>Sunnybrook Research Institute

### 2-C-85 Intellectual Outcome in Molecular Subgroups of Medulloblastoma

Iska Moxon-Emre<sup>1</sup>, Michael Taylor<sup>1</sup>, Eric Bouffet<sup>2</sup>, Kristina Hardy<sup>3</sup>, Cynthia Campen<sup>4</sup>, David Malkin<sup>1</sup>, Cynthia Hawkins<sup>1</sup>, Normand Laperriere<sup>1</sup>, Vijay Ramaswamy<sup>2</sup>, Nadia Scantlebury<sup>2</sup>, Laura Janzen<sup>1</sup>, Nicole Law<sup>1</sup>, Karin Walsh<sup>3</sup>, Donald Mabbott<sup>1</sup>

<sup>1</sup>Hospital for Sick Children & University of Toronto, <sup>2</sup>Hospital for Sick Children, <sup>3</sup>Children's National Health System, <sup>4</sup>Lucile Packard Children's Hospital

## 2-C-86 Disruption of TAO2 in Autism Spectrum Disorders and the Characterization of TAO2 KO Mice as an ASD Model

Nadeem Murtaza<sup>1</sup>, Melanie Richter<sup>2</sup>, Sean White<sup>1</sup>, Vickie Kwan<sup>1</sup>, Susan Walker<sup>3</sup>, Stephen Scherer<sup>3</sup>, Froylan Calderon de Anda<sup>2</sup>, Karun Singh<sup>1</sup>

<sup>1</sup>Stem Cell and Cancer Research Institute/Mcmaster University, <sup>2</sup>Centre for Molecular Neurobiology/University of Hamburg, <sup>3</sup>The Hospital for Sick Children

# 2-C-87 Neuroprotective and Immunomodulatory Effects of the Plasmalogens Precursor, PPI-1011, in the Enteric Nervous System in Parkinson's Disease

Jordan Nadeau<sup>1</sup>, Édith Miville-Godbout<sup>1</sup>, Mélanie Bourque<sup>1</sup>, Marc Morissette<sup>1</sup>, Sara Al Sweidi<sup>2</sup>, Tara Smith<sup>2</sup>, Mélissa Côté<sup>3</sup>, Asuka Mochizuki<sup>2</sup>, Vijitha Senanayake<sup>2</sup>, Dushmanthi Jaysinghe<sup>2</sup>, Li Wang<sup>2</sup>, Thérèse Di Paolo<sup>1</sup>, Denis Soulet<sup>1</sup>

<sup>1</sup>ULAVAL, <sup>2</sup>Phenomenome Discoveries Inc., <sup>3</sup>CRHU de Québec

# 2-C-88 GABA and glutamate levels in the brains of people with multiple sclerosis are related to markers of demyelination and clinical impairment

Julia Nantes<sup>1</sup>, Sébastien Proulx<sup>1</sup>, Jidan Zhong<sup>2</sup>, Scott Holmes<sup>1</sup>, Sridar Narayanan<sup>1</sup>, Lisa Koski<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>University of Toronto

# 2-C-89 Brain state dependent signaling and function of CRF1 receptors

Chakravarthi Narla<sup>1</sup>

<sup>1</sup>Robarts Research Institute

#### 2-C-90 TrkB Activation Rescues PI3K/Akt Signaling and Autistic-Like Behavior in the Valproic Acid-Induced Mouse Model

Chiara Nicolini<sup>1</sup>, Vadim Aksenov<sup>1</sup>, Elyse Rosa<sup>1</sup>, Bernadeta Michalski<sup>1</sup>, David Rollo<sup>1</sup>, Jane Foster<sup>1</sup>, Frank Longo<sup>2</sup>, Margaret Fahnestock<sup>1</sup>

<sup>1</sup>McMaster University, <sup>2</sup>Stanford University School of Medicine

## 2-C-91 Quantitating Neuropathological Features in the Cerebellum of a Mouse Model of Fragile X Syndrome

Yosuke Niibori<sup>1</sup>, David Hampson<sup>1</sup>

<sup>1</sup>University of Toronto

#### 2-C-92 Characterizing the Effects of CBD

in the Mesolimbic Dopamine System

Christopher Norris<sup>1</sup>, Jordan Zunder<sup>2</sup>, Michael Loureiro<sup>3</sup>, Justine Renard<sup>1</sup>, Steven Laviolette<sup>1</sup>

<sup>1</sup>The University of Western Ontario, <sup>2</sup>University of Limerick, <sup>3</sup>University of Geneva

## 2-C-93 Gait disturbances in the 5xFAD transgenic mouse model of Alzheimer's Disease

Wai-Jane Lee <sup>1</sup>, Flavio Beraldo <sup>1</sup>, Matthew Cowan <sup>1</sup>, Boyer Winters <sup>2</sup>, Vania Prado <sup>1</sup>, Marco Prado <sup>1</sup>

<sup>1</sup>Robarts Research Institute, University of Western Ontario, <sup>2</sup>University of Guelph

#### D – Sensory and Motor Systems

## 2-D-94 Activation of a Respiratory Medullary Motor Circuit by Remote Control

Garret Horton<sup>1</sup>, Jimmy Fraigne<sup>1</sup>, Zoltan Torontali<sup>1</sup>, Jennifer Lapierre<sup>1</sup>, Hattie Liu<sup>1</sup>, Gaspard Montandon<sup>1</sup>, John Peever<sup>1</sup>, Richard Horner<sup>1</sup>

<sup>1</sup>University of Toronto

#### **2-D-95** *Dynamic neural tuning and perception enables adaptation to natural sensory stimuli under behaviorally-relevant contexts* Chengjie Huang<sup>1</sup>, Diana Martinez<sup>1</sup>, Michael Metzen<sup>1</sup>, Maurice Chacron<sup>1</sup> <sup>1</sup>McGill University

#### 2-D-96 Interactions between Posterior Parietal and Primary Motor Cortices relates to Rubber Hand Illusion

Reina Isayama<sup>1</sup>, Michael Vesia<sup>2</sup>, Gaayathiri Jegatheeswaran<sup>1</sup>, Behzad Elahi<sup>3</sup>, Carolyn Gunraj<sup>2</sup>, Lucilla Cardinali<sup>4</sup>, Alessandro Farne<sup>5</sup>, Robert Chen<sup>1</sup>

<sup>1</sup>University of Toronto/Krembil Research Institute, <sup>2</sup>Krembil Research Institute, <sup>3</sup>University of Toronto, <sup>4</sup>University of Western Ontario, The Brain and Mind Institute, <sup>5</sup>Lyon Neuroscience Research Center

# 2-D-97 Subcortical encoding of speech cues in children with attention deficit hyperactivity disorder

Zahra Jafari<sup>1</sup>, Saeed Malayeri<sup>2</sup>, Reza Rostami<sup>3</sup>

<sup>1</sup>Iran University of Medical Sciences, School of Rehabilitation Sciences, jafari.z@iums.ac.ir, <sup>2</sup>Newsha Hearing Institute, <sup>3</sup>Tehran University

#### 2-D-98 Modulation Effects and Time Course of Target-Distractor Similarity on Saccade Curvatures

**Devin Kehoe<sup>1</sup>, Selvi Aybulut<sup>1</sup>, Mazyar Fallah<sup>1</sup>**<sup>1</sup>York University

# 2-D-99 Multisensory electrophysiology reveals overt and subthreshold non-auditory influences on dorsal auditory cortex Melanie Kok<sup>1</sup>, Andres Carrasco<sup>1</sup>, Marvin Meredith<sup>2</sup>, Stephen Lomber<sup>1</sup>

<sup>1</sup>University of Western Ontario, <sup>2</sup>Virginia Commonwealth University

# 2-D-100 Real-time in vivo plasticity of corticostriatal afferent activity during skill learning

David Kupferschmidt<sup>1</sup>, Guohong Cui<sup>2</sup>, David Lovinger<sup>1</sup>

NIH / NIAAA, <sup>2</sup>NIH / NIEHS

# 2-D-101 Galvanic Vestibular Stimulation in Primates: Recording Vestibular Afferents during Transmastoid Stimulation

Annie Kwan<sup>1</sup>, Diana Mitchell<sup>1</sup>, Patrick Forbes<sup>2</sup>, Jean-Sébastien Blouin<sup>3</sup>, Kathleen Cullen<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>Delft University of Technology, <sup>3</sup>University of British Columbia

# 2-D-102 Noise enables multiplexed coding of fast and slow signals through synchronous and asynchronous spiking

Milad Lankarany<sup>1</sup>, Stephanie Ratte<sup>1</sup>, Steven Prescott<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

#### 2-D-103 Effect of allocentric cues on primate gaze behaviour in a cue conflict task

Jirui Li¹, Amir Sajad¹, Robert Marino², Xiaogang Yan¹, Saihong Sun¹, Hongying Wang¹, John Crawford¹

<sup>1</sup>York University, <sup>2</sup>Queen's University

#### 2-D-104 An adaptation-induced tactile spatial illusion: experimental demonstration and Bayesian modelling

Luxi Li<sup>1</sup>, Daniel Goldreich<sup>1</sup>

<sup>1</sup>McMaster University

# 2-D-105 Encoding of gravity by the periphery and the central neurons during passive and active head tilt

Isabelle Mackrous<sup>1</sup>, Jérôme Carriot<sup>2</sup>, Kathleen Cullen<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>University of Western Ontario

### 2-D-106 Effects of enriched environment exposure on retinal and visual cortex functions

emna mahjoub<sup>1</sup>, Sébastien Thomas<sup>1</sup>, Christian Casanova<sup>1</sup>
<sup>1</sup>Université de Montréal

## 2-D-107 Functional plasticity in primary somatosensory cortex supports motor learning by observing

Heather McGregor<sup>1</sup>, Joshua Cashaback<sup>1</sup>, Paul Gribble<sup>1</sup>

<sup>1</sup>The University of Western Ontario

# 2-D-108 Frequency-specific activity in the subthalamic nucleus during isometric hand contraction

Luka Milosevic<sup>1</sup>, Suneil Kalia<sup>1</sup>, Mojgan Hodaie<sup>1</sup>, Andres Lozano<sup>1</sup>, Milos Popovic<sup>1</sup>, William Hutchison<sup>1</sup>

<sup>1</sup>University of Toronto

## 2-D-109 Plasticity within early vestibular pathways: implications for the efficacy of a vestibular prosthesis

Diana Mitchell<sup>1</sup>, Charles Della Santina<sup>2</sup>, Kathleen Cullen<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>Johns Hopkins

# 2-D-110 Effect of novel cannabinoid type 2 in an animal model of acute inflammatory orofacial pain.

Graziella Molska<sup>1</sup>, Helena Filippini<sup>1</sup>, Limor Avivi-Arber<sup>1</sup>, Barry Sessle<sup>1</sup>
<sup>1</sup>University of Toronto

## 2-D-111 Adapted use of audiovisual information for person and object recognition in people with one eye

Stefania Moro<sup>1</sup>, Adria Hoover<sup>1</sup>, Jennifer Steeves<sup>1</sup>

<sup>1</sup>York University

# 2-D-112 Lack of adenylate cyclase 1 (AC1): Consequences on corticospinal tract development and on locomotor recovery after spinal cord injury

Hanane Nait Taleb Ali<sup>1</sup>, Sophie Scotto-Lomassese <sup>2</sup>, Isabelle Dusart<sup>2</sup>, Patricia Gaspar<sup>2</sup>, Mohamed Bennis<sup>1</sup>

<sup>1</sup>Faculty of Science Semlalia, <sup>2</sup>universite Paris 6

## 2-D-113 Cholinergic denervation of the rat posterior parietal cortex impairs complex stimulus discrimination

Hoang Nam Nguyen<sup>1</sup>, Frédéric Huppé-Gourgues<sup>1</sup>, Elvire Vaucher<sup>1</sup>
<sup>1</sup>Université de Montréal

# 2-D-114 Effects of Passive Stretch on Reflex Excitability in Neurologically Intact Participants

Steven Noble<sup>1</sup>, Greg E.P. Pearcey<sup>1</sup>, Paul Zehr<sup>1</sup>, Caroline Quartly <sup>2</sup>
<sup>1</sup>University of Victoria, <sup>2</sup>Vancouver Island Health

# E – Homeostatic and Neuroendocrine Systems

## 2-E-115 Subfornical organ neurons respond differentially to applications of cholecystokinin and angiotensin II

Sebastian Gorlewski<sup>1</sup>, Nicole Cancelliere<sup>1</sup>, Alastair Ferguson<sup>1</sup>

Queen's University

# 2-E-116 Inhibition of corticotropin-releasing factor (CRF) by teneurin C-terminal associated peptide (TCAP)-1: A molecular switch to regulate mitochondrial function.

David Hogg<sup>1</sup>, Ola Michalec<sup>1</sup>, Mia Husic<sup>1</sup>, David Lovejoy<sup>1</sup>
<sup>1</sup>University of Toronto

# 2-E-117 Prostaglandin E2 drives neuroendocrine stress response through presynaptic inhibition of GABA release

Zahra Khazaeipool<sup>1</sup>, Wataru Inoue<sup>1</sup>

<sup>1</sup>University of Western Ontario

## 2-E-118 Effects of Intranasal Insulin Administration on Memory in the 5XFAD Mouse Model of Alzheimer's Disease

Amanda Glenn<sup>1</sup>, William Gendron<sup>1</sup>, Michael Landsman<sup>1</sup>, Stephanie Pelletier<sup>1</sup>, Sooyoun Shin<sup>1</sup>, Younes Anini<sup>1</sup>, Richard Brown<sup>1</sup> <sup>1</sup>Dalhousie

# 2-E-119 High fat diet primes excitatory synapses of orexin neurons to express long term depression

Victoria Linehan<sup>1</sup>, Michiru Hirasawa<sup>1</sup>

<sup>1</sup>Memorial University of Newfoundland

# 2-E-120 Adropin Elicits Concentration-Dependent Effects on Hypothalamic Paraventricular Nucleus Neurons

Spencer Loewen<sup>1</sup>, Alastair Ferguson<sup>1</sup>

<sup>1</sup>Queen's University

#### F – Cognition and Behaviour

# 2-F-121 Determining cognitive deficits in mouse models of alzheimer's disease using touchscreen tasks: improving the transition from bench to bedside

Flavio Beraldo<sup>1</sup>, Talal Masood<sup>1</sup>, Daniel Palmer<sup>2</sup>, David Wasserman<sup>2</sup>, Samantha Creighton<sup>2</sup>, Matthew Cowan<sup>1</sup>, Benjamin Kolisnyk<sup>1</sup>, Mohammed Al-Onaizi<sup>1</sup>, Wai-Jane Virginia Lee<sup>1</sup>, Tom Gee<sup>3</sup>, Shuai

#### POSTER SESSION 2 - TUESDAY, MAY 31, 2016

Liang<sup>3</sup>, Robert Bartha<sup>1</sup>, Stephen Strother<sup>3</sup>, Vania Prado<sup>1</sup>, Boyer Winters<sup>2</sup>

<sup>1</sup>University of Western Ontario , <sup>2</sup>University of Guelph, <sup>3</sup>Rotman Research Institute, Baycrest Hospital

# 2-F-122 Longitudinal assessment of behavioural flexibility and visual spatial integration learning in the 5xFAD mouse model of Alzheimer's disease using automated touchscreen systems

Daniel Palmer<sup>1</sup>, David Wasserman<sup>1</sup>, Samantha Creighton<sup>1</sup>, Theresa Martin<sup>1</sup>, Jessica Davidson<sup>1</sup>, Flavio Beraldo<sup>2</sup>, Matthew Cowan<sup>2</sup>, Wai-Jane Lee<sup>2</sup>, Talal Masood<sup>2</sup>, Vania Prado<sup>2</sup>, Marco Prado<sup>2</sup>, Boyer Winters<sup>1</sup>

<sup>1</sup>University of Guelph, <sup>2</sup>Western University

# 2-F-123 Longitudinal assessment of behavioural flexibility and visual spatial integration learning in the 3xTG mouse model of Alzheimer's disease (AD) using automated touchscreen systems

David Wasserman<sup>1</sup>, Daniel Palmer<sup>1</sup>, Samantha Creighton<sup>1</sup>, Theresa Martin<sup>1</sup>, Jessica Davidson<sup>1</sup>, Flavio Beraldo<sup>2</sup>, Wai-Jane Lee<sup>2</sup>, Talal Masood<sup>2</sup>, Matthew Cowan<sup>2</sup>, Vania Prado<sup>2</sup>, Marco Prado<sup>2</sup>, Boyer Winters<sup>1</sup>

<sup>1</sup>University of Guelph, <sup>2</sup>University of Western Ontario

#### 2-F-124 Functional Mapping of Brain Circuits Supporting Social Modulation of Pain in Mice

Holly Turner<sup>1</sup>, Sivaani Sivaselvachandran<sup>2</sup>, Dana Kousmanidis<sup>1</sup>, Salsabil Abdallah<sup>2</sup>, Loren Martin<sup>1</sup>, Neil Fournier<sup>1</sup>

<sup>1</sup>Trent University, <sup>2</sup>University of Toronto

### 2-F-125 Glutamatergic SubC cells are the core of the REM sleep network

Jimmy Fraigne<sup>1</sup>, Zoltan Torontali<sup>1</sup>, John Peever<sup>1</sup>

<sup>1</sup>University of Toronto

# 2-F-126 The Hypnotized Brain: An Examination of the iEEG Correlates of Neutral Hypnosis

Shelagh Freedman<sup>1</sup>, Jaime Gomez-Ramirez<sup>2</sup>, Diego Mateos<sup>2</sup>, Jose Luis Perez-Velazquez<sup>3</sup>, Taufik Valiante<sup>4</sup>

<sup>1</sup>Concordia University, <sup>2</sup>The Hospital for Sick Children, <sup>3</sup>Division of Neurology, The Hospital for Sick Children, <sup>4</sup>Krembil Research Institute

# 2-F-127 Modelling gambling disorder in rats: interaction of responding for uncertainty and reward predictability on dopamine sensitization and risky decision-making

Victoria Fugariu<sup>1</sup>, Martin Zack<sup>1</sup>, Paul Fletcher<sup>2</sup>, Fiona Zeeb<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Centre for Addiction and Mental Health

# 2-F-128 Resting-state functional connectivity studies in common marmoset monkeys at 9.4T

Maryam Ghahremani<sup>1</sup>, Ravi Menon<sup>1</sup>, Stefan Everling<sup>1</sup>
<sup>1</sup>University of Western Ontario

# 2-F-129 Somatosensory attention identifies both overt and covert awareness in disorders of consciousness

Raechelle Gibson<sup>1</sup>, Srivas Chennu<sup>2</sup>, Davinia Fernández-Espejo<sup>3</sup>, Adrian Owen<sup>1</sup>, Damian Cruse<sup>3</sup>

<sup>1</sup>Western University, <sup>2</sup>University of Cambridge, <sup>3</sup>University of Birmingham

# 2-F-130 Social isolation reveals a dopamine-independent rewarding motivational response to acute nicotine that is not observed in group-housed mice

Taryn Grieder<sup>1</sup>, Mandy Yee<sup>1</sup>, Derek van der Kooy<sup>1</sup>

<sup>1</sup>University of Toronto

# 2-F-131 Place coding in the monkey hippocampus is task-dependent during virtual navigation

Roberto Gulli¹, Guillaume Doucet¹, Benjamin Corrigan¹, Lyndon Duong², Sylvain Williams¹, Julio Martinez-Trujillo²

<sup>1</sup>McGill University, <sup>2</sup>University of Western Ontario

# 2-F-132 Characterization of a rostrocaudal differentiation in the nucleus accumbens core in processing conditioned cues of conflicting valence

Laurie Hamel<sup>1</sup>, Tharshika Thangarasa<sup>1</sup>, Osai Samadi<sup>1</sup>, Rutsuko Ito<sup>1</sup>
<sup>1</sup>University of Toronto

# 2-F-133 A comparison of fMRI-based functional connectivity during resting state and naturalistic stimulation

Amelie Haugg<sup>1</sup>, Rhodri Cusack<sup>1</sup>, Bettina Sorger<sup>2</sup>, Adrian Owen<sup>1</sup>, Lorina Naci<sup>1</sup>

<sup>1</sup>University of Western Ontario, <sup>2</sup>Maastricht University

## 2-F-134 Effects of socially-based ensemble music training on children's executive functions: ERP evidence

Nina Hedayati<sup>1</sup>, Kylie Schibli<sup>1</sup>, Amedeo D'Angiulli<sup>1</sup>
<sup>1</sup>Carleton University

# 2-F-135 The role of noradrenaline in the affective properties of metabolic stressors in laboratory rats

**Thomas Horman<sup>1</sup>, Francesco Leri<sup>1</sup>, Fernanda Fernandez<sup>1</sup>**<sup>1</sup>University of Guelph

## 2-F-136 The effects of fornix stimulation on memory in non-human primates.

Ahmed Hussin<sup>1</sup>, Andrea Gomez Palacio Schjetnan<sup>1</sup>, Kari Hoffman<sup>1</sup>

<sup>1</sup>York University

#### 2-F-137 Behavioural characterization of Grk3 knockout mice

Sophie Imbeault<sup>1</sup>, Markus Larsson<sup>1</sup>, Sophie Erhardt<sup>1</sup>

<sup>1</sup>Karolinska Institutet

# 2-F-138 Implicit Learning Facilitates Cognitive Control in a Response Switching Task

Silvia Isabella<sup>1</sup>, Charline Urbain<sup>2</sup>, J. Allan Cheyne<sup>3</sup>, Douglas Cheyne<sup>1</sup>
<sup>1</sup>University of Toronto, <sup>2</sup>Hospital for Sick Children, <sup>3</sup>University of Waterloo

# 2-F-139 Molecular pathways responsible for NMDA receptor-mediated behavioural plasticity.

Rehnuma Islam<sup>1</sup>, Catharine Mielnik<sup>1</sup>, Wendy Horsfall<sup>1</sup>, Beverly Orser<sup>1</sup>, Amy Ramsey<sup>1</sup>

<sup>1</sup>University of Toronto

# 2-F-140 Wnt inhibitor, IWP-2, impairs expression of amphetamine-produced conditioned place preference in rats

Farhana Islam<sup>1</sup>, Richard Beninger<sup>1</sup>

<sup>1</sup>Queen's University

# 2-F-141 Co-allocation of Appetitive and Aversive Memories in the Lateral Amygdala

Alexander Jacob<sup>1</sup>, Asim Rashid<sup>2</sup>, Chen Yan<sup>1</sup>, Paul Frankland<sup>2</sup>, Sheena Josselyn<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Hospital for Sick Children

# 2-F-142 Human rGDF-11 counteracts age-related short-term memory impairments in middle-aged mice

Min Zhang<sup>1</sup>, Nafisa Jadavji<sup>1</sup>, Patrice Smith<sup>1</sup>

<sup>1</sup>Carleton University

# 2-F-143 The Adverse Effect of Auditory Stress on Mice Performance: Impact of Different Type of Stresses and Pregnancy

Zahra Jafari<sup>1</sup>, Bryan Kolb<sup>1</sup>, Majid H Mohajerani<sup>1</sup>

<sup>1</sup>Lethbridge University

#### 2-F-145 Contextual Fear Conditioning in Zebrafish

Justin Kenney<sup>1</sup>, Ian Scott<sup>1</sup>, Sheena Josselyn<sup>1</sup>, Paul Frankland<sup>1</sup>

The Hospital for Sick Children

#### 2-F-146 Striatal Regulation by Acetylcholine and Glutamate Co-transmission

Ornela Kljakic<sup>1</sup>, Helena Janickova<sup>1</sup>, Diana Sakae<sup>2</sup>, Mathieu Favier<sup>2</sup>, Salah Mestikawy<sup>2</sup>, Marco Prado<sup>1</sup>, Vania Prado<sup>1</sup>

<sup>1</sup>Robarts Research Institute, University of Western Ontario, <sup>2</sup>Douglas Mental Health University Institute, McGill University

# 2-F-147 Behavior, brain serotonin system and pharmacological responses to stimulation of 5-HT1A receptors in recombinant mouse lines with different predisposition to catalepsy

Elena Kondaurova<sup>1</sup>, Elizabeth Kulikova<sup>2</sup>, Anton Tsybko<sup>1</sup>, Elena Kondaurova<sup>1</sup>, Daria Bazovkina<sup>1</sup>

<sup>1</sup>Federal Research Center Institute of Cytology and Genetics, <sup>2</sup>Federal Research Center Institute of Cytolofy and Genetics

#### 2-F-148 The Facilitative Effects of Fame on Working Memory

Jaeger Lam<sup>1</sup>, Nathan Spreng<sup>2</sup>, Gary Turner<sup>1</sup>

<sup>1</sup>York University, <sup>2</sup>Cornell University

# **2-F-149** *Cortical mechanisms underlying reach-grasp integration* Ada Le<sup>1</sup>, Simona Monaco<sup>2</sup>, Ying Chen<sup>1</sup>, J Crawford<sup>1</sup>

<sup>1</sup>York University, <sup>2</sup>University of Trento

# 2-F-150 Non-selective neurons contribute information to neuronal ensembles by modifying noise correlation structure

Matthew Leavitt<sup>1</sup>, Adam Sachs<sup>2</sup>, Julio Martinez-Trujillo<sup>3</sup>

<sup>1</sup>McGill University, <sup>2</sup>Ottawa Hospital Research Institute, University of Ottawa, <sup>3</sup>University of Western Ontario

# 2-F-151 Sharp Wave Ripples during Visual Exploration in the Primate Hippocampus

Timothy Leonard <sup>1</sup>, Kari Hoffman <sup>2</sup>

<sup>1</sup>York University, <sup>2</sup>York University

# 2-F-152 Synaptic impairment of frontal cortical fast-spiking basket cells induces cognitive and behavioural deficits in mice with a Cacna1a loss-of-function mutation

Alexis Lupien-Meilleur<sup>1</sup>, Ilse Riebe<sup>2</sup>, Lena Damaj<sup>1</sup>, Catherine Vanasse<sup>1</sup>, Louise Gagnon<sup>1</sup>, Jean-Claude Lacaille<sup>2</sup>, Elsa Rossignol<sup>1</sup>

<sup>1</sup>Centre de recherche du CHU Sainte-Justine, <sup>2</sup>Université de Montréal

#### 2-F-153 Differential Effects of Dopamine Antagonists on Cognitive

#### Performance in Healthy Controls

Robert Marino<sup>1</sup>, Ian Prescott<sup>1</sup>, Pauline Gaprielian<sup>1</sup>, Ron Levy<sup>1</sup>

Oueen's University

### 2-F-154 Placebo Analgesia in a Chronic Neuropathic Pain Model in Mice

Sarasa Tohyama<sup>1</sup>, Loren Martin<sup>1</sup>

<sup>1</sup>University of Toronto

#### 2-F-155 Increased Glucocorticoid Receptor Activity in the Medial Prefrontal Cortex Prevents the Expression of Empathy in Mice

Sivaani Sivaselvachandran 1<sup>1</sup>, Salsabil Abdallah <sup>1</sup>, Sarasa Tohyama <sup>1</sup>, Loren Martin <sup>1</sup>

<sup>1</sup>University of Toronto

## 2-F-156 Recovery of memory in mice that model Alzheimer's disease

Valentina Mercaldo<sup>1</sup>, Adelaide Yiu<sup>1</sup>, Derya Sargin<sup>1</sup>, Asim Rashid<sup>1</sup>, Jonathan Epp<sup>1</sup>, Rachael Neve<sup>2</sup>, Paul Frankland<sup>1</sup>, Sheena Josselyn<sup>1</sup>

<sup>1</sup>Hospital for Sick Children, <sup>2</sup>Massachusetts Institute of Technology

# 2-F-157 Lateral Occipital Complex activation in response to repetitive visual stimuli in People with Migraine Headaches

Marla Mickleborough<sup>1</sup>, Layla Gould<sup>1</sup>, Chelsea Ekstrand<sup>1</sup>, Eric Lorentz<sup>1</sup>, Ron Borowsky<sup>1</sup>

<sup>1</sup>University of Saskatchewan

## 2-F-158 Inducible rescue of NMDA receptor deficiency to measure the plasticity of neural networks in a model of schizophrenia

Catharine Mielnik<sup>1</sup>, Mary Binko<sup>1</sup>, Rehnuma Islam<sup>1</sup>, Marija Milenkovic<sup>1</sup>, Wendy Horsfall<sup>1</sup>, Evelyn Lambe<sup>1</sup>, Amy Ramsey<sup>1</sup>

<sup>1</sup>University of Toronto

## 2-F-159 Effect of sexual experience on the rewarding state induced by mating in the female rat.

Isid Min Poblete<sup>1</sup>, Raul Paredes Guerrero<sup>1</sup>

<sup>1</sup>UNAM

# 2-F-160 Dissociable roles of GADD45a/ß in the rat perirhinal cortex and hippocampus for object memory: Different forms of DNA methylation?

Krista Mitchnick<sup>1</sup>

<sup>1</sup>University of Guelph

# 2-F-161 Hyper-activation of Right Inferior Frontal Gyrus in Pediatric Obsessive-Compulsive Disorder during a Mental Flexibility

Alexandra Mogadam<sup>1</sup>, Paul Arnold<sup>2</sup>, Amanda Robertson<sup>3</sup>, Anne Keller<sup>3</sup>, Margot Taylor<sup>4</sup>, Jason Lerch<sup>3</sup>, Evdokia Anagnostou<sup>5</sup>, Elizabeth Panq<sup>4</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Calgary, <sup>3</sup>Sick Kids Research Institute, <sup>4</sup>Hospital for Sick Children, <sup>5</sup>Holland Bloorview Kids Rehabilitation Hospital

# 2-F-162 The spatio-temporal dynamics of ?Theory of Mind? in school age children born very preterm

Sarah Mossad<sup>1</sup>, Mary Lou Smith<sup>1</sup>, Margot Taylor<sup>1</sup>

<sup>1</sup>Hospital for Sick Children, University of Toronto

#### POSTER SESSION 2 - TUESDAY, MAY 31, 2016

#### G – Novel Methods and Technology Development

### 2-G-163 Counting all possible neuronal circuits for input-output

Anthony Richard<sup>1</sup>, Patrick Desrosiers<sup>1</sup>, Simon Hardy<sup>1</sup>, Nicolas Doyon<sup>1</sup>
<sup>1</sup>Université Laval

# 2-G-164 Analysis of apoptotic cell death contribution in Caspase-3 null mice using an endothelin-1 model of cerebral ischemia

Chesarahmia Dojo Soeandy<sup>1</sup>, Faraz Salmasi<sup>1</sup>, Jeffrey Henderson<sup>1</sup>
<sup>1</sup>University of Toronto

# **2-G-165** *Parametric modelling of oscillatory sources in MEG* Peter Donhauser<sup>1</sup>, Sylvain Baillet<sup>1</sup>

<sup>1</sup>McGill University

# 2-G-166 A probabilistic approach to identifying cerebrovascular differences between mouse strains

Sahar Ghanavati<sup>1</sup>, Jason Lerch<sup>1</sup>, John Sled<sup>1</sup>

<sup>1</sup>University of Toronto

# 2-G-167 Examination of Drosophila Eye Development with THG microscopy

Abiramy Karunendiran<sup>1</sup>, Danielle Tokarz<sup>2</sup>, Richard Cisek<sup>1</sup>, Virginijus Barzda<sup>1</sup>, Bryan Stewart<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University Health Network

# 2-G-168 A novel approach to assess neurovascular patterning and remodeling in the mouse brain

Cesar Comin<sup>1</sup>, Luciano da F. Costa<sup>1</sup>, Baptiste Lacoste<sup>2</sup>

<sup>1</sup>University of Sao Paulo, <sup>2</sup>The Ottawa Hospital Research Institute, University of Ottawa

# 2-G-169 Low profile halo head fixation in non-human primates Kousha Azimi<sup>1</sup>, Ian Prescott<sup>1</sup>, Robert Marino<sup>1</sup>, Andrew Winterborn<sup>1</sup>, Ron Levy<sup>1</sup>

<sup>1</sup>Queen's University

#### 2-G-170 Opto-Panx1: Engineering a new optically controlled Pannexin 1 channel

Alexander Lohman<sup>1</sup>, Wei Zhang<sup>2</sup>, Robert Campbell<sup>2</sup>, Roger Thompson<sup>1</sup>
<sup>1</sup>University of Calgary, <sup>2</sup>University of Alberta

# 2-G-171 Application of Support Vector Machines to Longitudinal Functional Neuroimaging Data

Alexander Rudiuk<sup>1</sup>, Steve Patterson<sup>2</sup>, Steven Beyea<sup>2</sup>, Timothy Bardouille<sup>2</sup>

<sup>1</sup>Dalhousie University, <sup>2</sup>IWK Health Centre

# 2-G-172 Single-Cell Optical Control with a Digital Multi-Mirror Device

Kanghoon Seo<sup>1</sup>, Matthew Tran<sup>1</sup>, Michael Kohl<sup>2</sup>, Jee Hyun Kwag<sup>3</sup>, Blake Richards<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Oxford, <sup>3</sup>Korea University

# 2-G-173 Micropillar arrays selectively coated with humidified microcontact printing reveal cue-dependent traction forces and molecular recruitment within single cells

Abhishek Sinha<sup>1</sup>, Sebastien Ricoult<sup>1</sup>, Liangcheng Xu<sup>2</sup>, David Juncker<sup>1</sup>, Timothy Kennedy<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>University of Toronto

# 2-G-174 Advances in Fiber-based Tissue Identification for Electrode Placement in Deep Brain Stimulation Neurosurgery

Damon DePaoli<sup>1</sup>, Nicolas Lapointe<sup>1</sup>, Laurent Goetz<sup>1</sup>, Martin Parent<sup>1</sup>, Léo Cantin<sup>2</sup>, Michel Prud'Homme<sup>2</sup>, Younes Messadeq<sup>1</sup>, Daniel Côté<sup>1</sup>
<sup>1</sup>University of Laval, <sup>2</sup>Hôpital de l'Enfant-Jésus

# IBRO – International Brain Research Organization

# 2-IBRO-175 Differential expression of Sox2 in two models of adult neurogenesis

Mahmoud Dahab<sup>1</sup>, Sherine Abdel Salam<sup>1</sup>, Hussein Khamis<sup>1</sup>, Cyrine Ben Dahaou<sup>2</sup>, Marie Moftah<sup>1</sup>, Emmanuel Moyse<sup>2</sup>

<sup>1</sup>Faculty of Science, Alexandria university, <sup>2</sup>Centre INRA of Tours, PRC (Physiology of Reproduction and Behavior) Unit

## 2-IBRO-176 Stress effects and serotonin 4 receptors in mouse Central nervous system

Mariama El Ouahli<sup>1</sup>, Fatiha Chigr<sup>1</sup>, Mohamed Najimi<sup>1</sup>, Valérie Compan<sup>2</sup>
<sup>1</sup>Faculté des sciences et techniques Béni Mellal, <sup>2</sup>Institut de génomique fonctionnelle

# 2-IBRO-177 The anxiolytic-like effect of cannabidiol in chronically stressed mice is mediated by the endocannabinoid system: role of neurogenesis, autophagy and dendritic remodeling

Manoela Fogaça<sup>1</sup>, Alline Campos<sup>1</sup>, Ludmila Coelho<sup>1</sup>, Ronald Duman<sup>2</sup>, Francisco Guimarães<sup>1</sup>

<sup>1</sup>Medical School of Ribeirão Preto, University of São Paulo (FMRP-USP), <sup>2</sup>Abraham Ribicoff Research Facilities, Yale School of Medicine

# 2-IBRO-178 Manganese-induced DAergic toxicity is reduced in trt-1 mutation of Caenorhabditis elegans

Omamuyovwi Ijomone<sup>1</sup>, Mahfuzur Miah<sup>2</sup>, Tanara Peres<sup>2</sup>, Michael Aschner<sup>2</sup>, Polycarp Nwoha<sup>3</sup>

<sup>1</sup>Cross River University of Technology, Okuku Campus, <sup>2</sup>Albert Einstein College of Medicine, <sup>3</sup>Obafemi Awolowo University

#### POSTER SESSION 3 - WEDNESDAY, JUNE 1, 2016

#### A - Development

3-A-1 A heterosynaptic mechanism controls axon branch dynamics in the Xenopus laevis visual system

Tasnia Rahman<sup>1</sup>, Martin Munz<sup>1</sup>, Edward Ruthazer<sup>1</sup>

<sup>1</sup>Montreal Neurological Institute

3-A-2 The RNA-binding protein Musashi2 regulates asymmetric neural precursor cell divisions of the developing cerebral cortex Kathryn Reynolds<sup>1</sup>, John Vessey<sup>1</sup>

<sup>1</sup>University of Guelph

3-A-3 Investigating the functional role of RNA-binding protein hnRNP-Q, in regulating asymmetric cell divisions of neural precursor cells during cortical development

Anastasia Smart<sup>1</sup>, Fraser McCready<sup>1</sup>, Dendra Hillier<sup>1</sup>, John Vessey<sup>1</sup>
<sup>1</sup>University of Guelph

3-A-4 The Impact of Early-Adolescent Adversity on Social Behaviour and Serotonergic Innervation in Adulthood

 ${\sf Cindy\,Tao^1, Prateek\,Dhamija^1, Linda\,Booij^2, Janet\,Menard^1}$ 

<sup>1</sup>Queen's University, <sup>2</sup>Concordia University

3-A-5 TRPM7 regulates axonal outgrowth and maturation of primary hippocampal neurons.

Ekaterina Turlova<sup>1</sup>, Christine YouJin Bae<sup>1</sup>, Marielle Deurloo<sup>1</sup>, Wenliang Chen<sup>1</sup>, Andrew Barszczyk<sup>1</sup>, David Horgen<sup>2</sup>, Andrea Fleig<sup>3</sup>, Zhong-Ping Fenq<sup>1</sup>, Hong-Shuo Sun<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Hawaii Pacific University, <sup>3</sup>University of Hawaii

3-A-6 Re-defining the niche of neural stem cells: determining new roles for forebrain interneuron-secreted signals in cortical progenitor cell oligodendrogenesis

Anastassia Voronova<sup>1</sup>, David Kaplan<sup>1</sup>, Freda Miller<sup>1</sup>

<sup>1</sup>Hospital for Sick Children

#### 3-A-7 Loss of CREB alters brain anatomy

Dulcie Vousden<sup>1</sup>, Matthijs van Eede<sup>1</sup>, Leigh Spencer Noakes<sup>1</sup>, Sheena Josselyn<sup>1</sup>, Paul Frankland<sup>1</sup>, Brian Nieman<sup>1</sup>, Jason Lerch<sup>1</sup>

<sup>1</sup>Hospital for Sick Children

3-A-8 Examination of microRNAs in response to retinoic acid during growth cone guidance

Sarah Walker<sup>1</sup>, Robert Carlone<sup>1</sup>, Gaynor Spencer<sup>1</sup>
<sup>1</sup>Brock University

3-A-9 Translational control of neuronal subtype specification by the 4E-T repressive complex in neural precursor cells

Guang Yang<sup>1</sup>, Siraj Zahr<sup>2</sup>, Hilal Kazan<sup>3</sup>, Gianluca Amadei<sup>2</sup>, David Kaplan<sup>2</sup>, Freda Miller<sup>2</sup>

<sup>1</sup>The Hospital for Sick Children, <sup>2</sup>The Hospital for Sick Children; University of Toronto, <sup>3</sup>Antalya International University

# 3-A-10 Early white matter development and outcomes in children born very preterm

Julia Young<sup>1</sup>, Benjamin Morgan<sup>1</sup>, Wayne Lee<sup>1</sup>, Mary Lou Smith<sup>1</sup>, Manohar Shroff<sup>1</sup>, John Sled<sup>1</sup>, Margot Taylor<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# B – Neural Excitability, Synapses, and Glia: Cellular Mechanisms

3-B-11 Amyloid beta modulates excitotoxic currents during hypoxia.

Laura Palmer<sup>1</sup>, Alexander Lohman<sup>1</sup>, Roger Thompson<sup>1</sup>
<sup>1</sup>University of Calgary

3-B-12 Microglia analysis in T cell deficient mice

Sureka Pavalagantharajah<sup>1</sup>, Angela Fan<sup>1</sup>, Roksana Khalid<sup>1</sup>, Douglas Chung<sup>1</sup>, Shawna Thompson<sup>1</sup>, Jane Foster<sup>1</sup>

<sup>1</sup>McMaster University

3-B-13 Unitary EPSCs at single primary afferent-lamina I neuron synapses show predominant role of GluN2B- and GluN2D-containing NMDA receptors

Graham Pitcher<sup>1</sup>, Livia Garzia<sup>1</sup>, Sorana Morrissy <sup>1</sup>, Michael Taylor<sup>1</sup>, Michael Salter<sup>1</sup>

<sup>1</sup>SickKids

3-B-14 Optogenetic Modulation of Septal Glutamatergic Neurons in the Freely Moving Mouse

Jennifer Robinson<sup>1</sup>, Sylvain Williams<sup>1</sup>

<sup>1</sup>McGill University

3-B-15 Effect of pirenzepine and muscarinic toxin-7 on muscarinic acetylcholine type-1 receptor internalization and downstream signaling cascades.

Mohammad Sabbir<sup>1</sup>, Paul Fernyhough<sup>1</sup>

<sup>1</sup>St. Boniface Research Centre

3-B-16 Chronic ghrelin enhances long-term potentiation and memory in hippocampal CA2 region following streptozotocin-induced diabetes

Bahman Sadeghi<sup>1</sup>

<sup>1</sup>Institute for Research in Fundamental Sciences (IPM)

3-B-17 L-type calcium channels functionally couple to IKCa channels to generate an IsAHP

**Giriraj Sahu<sup>1</sup>, Jason Miclat<sup>1</sup>, Gerald Zamponi<sup>1</sup>, Ray Turner<sup>1</sup>**<sup>1</sup>University of Calgary

3-B-18 p11 corticostriatal neurons have distinctive 5-HT responses sensitive to chronic social isolation stress and to antidepressant treatment

Derya Sargin<sup>1</sup>, Kristina Perit<sup>1</sup>, Eric Schmidt<sup>2</sup>, Revathy Uthaiah<sup>2</sup>, Nathaniel Heintz<sup>2</sup>, Paul Greengard<sup>2</sup>, Evelyn Lambe<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>The Rockefeller University

3-B-19 ATP-binding Cassette Transporter A7 (ABCA7) Loss of Function Alters Alzheimer Amyloid Processing

Kanayo Satoh<sup>1</sup>, Sumiko Abe-Dohmae<sup>2</sup>, Shinji Yokoyama<sup>3</sup>, Peter St George-Hyslop<sup>1</sup>, Paul Fraser<sup>1</sup>

<sup>1</sup>Univerity of Toronto, <sup>2</sup>Nagoya City University Graduate School of Medical Sciences, <sup>3</sup>Chubu University

3-B-20 An Evolutionary Switch in ND2 enables Src kinase regulation of NMDA receptors

#### POSTER SESSION 3 - WEDNESDAY, JUNE 1, 2016

David Scanlon<sup>1</sup>, Alaji Bah<sup>1</sup>, Mickaël Krzeminski<sup>1</sup>, Wenbo Zhang<sup>1</sup>, Heather Leduc-Pessah<sup>1</sup>, Yina Dong<sup>1</sup>, Julie Forman-Kay<sup>1</sup>, Michael Salter<sup>1</sup>

The Hospital for Sick Children

#### 3-B-21 Role of Calpain in synaptic potentiation

Kapil Sehgal<sup>1</sup>, Valerie Clavet Fournier<sup>1</sup>, Paul De Koninck<sup>1</sup>

<sup>1</sup>Université Laval

3-B-22 Investigating spiking resonance in computational models of oriens-lacunosum/moleculare (O-LM) hippocampal interneurons with dendritic synaptic inputs

Vladislav Sekulic<sup>1</sup>, Josh Lawrence<sup>2</sup>, Frances Skinner<sup>1</sup>

<sup>1</sup>Krembil Research Institute and University of Toronto, <sup>2</sup>Texas Tech University Health Sciences Center

## 3-B-23 The local and global influences of neuronal field effects in synchronized networks

Aaron Shifman<sup>1</sup>, John Lewis<sup>1</sup>

<sup>1</sup>University of Ottawa

# 3-B-24 The X-linked Intellectual Disability Gene, DHHC9, in Neurite Outgrowth and Synapse Formation

Jordan Shimell<sup>1</sup>, D. Jovellar<sup>1</sup>, Gian Brigidi<sup>1</sup>, Igor Tatarnikov<sup>1</sup>, Dayne Kelly<sup>1</sup>, Austen Milnerwood<sup>1</sup>, Shernaz Bamji<sup>1</sup>

<sup>1</sup>University of British Columbia

# 3-B-25 Complex molecular and functional outcomes of single versus sequential cytokine stimulation of microglia

Tamieed Siddigui<sup>1</sup>, Starlee Lively<sup>1</sup>, Lyanne Schlichter<sup>1</sup>

<sup>1</sup>Krembil Research Institute

## 3-B-26 Radial Glial Motility Regulates Synaptic Development in the Visual System

Mari Sild<sup>1</sup>, Marion Van Horn<sup>1</sup>, Dantong Jia<sup>1</sup>, Anne Schohl<sup>1</sup>, Edward Ruthazer<sup>1</sup>

<sup>1</sup>McGill University

# 3-B-27 Theta-frequency stimulation of the parasubiculum promotes short- and long-lasting changes in entorhinal cortex responses to sensory cortical input

Daniel Sparks<sup>1</sup>, C. Andrew Chapman<sup>1</sup>

<sup>1</sup>Concordia University

# 3-B-28 Extracellular Turrets in Domain II and Domain IV as Critical Determinants of Ion Selectivity in LCav3, the T-type Calcium Channel from Lymnaea stagnalis

Robert Stephens<sup>1</sup>, Wendy Guan<sup>1</sup>, Omar Mourad<sup>1</sup>, David Spafford<sup>1</sup>
<sup>1</sup>University of Waterloo

# 3-B-29 Modulation of a non-selective cation channel by PIP2 and its metabolites controls excitability in Aplysia bag cell neurons Raymond Sturgeon<sup>1</sup>, Neil Magoski<sup>1</sup>

<sup>1</sup>Queen's University

# 3-B-30 The Application of FTIR Spectroscopy to Image Metabolic Alterations Associated with the Glial Response Following Brain Ischemia

Nicole Sylvain<sup>1</sup>, Mark Hackett<sup>2</sup>, Huishu Hou<sup>1</sup>, Sayed Uzair Admed<sup>1</sup>, Sharleen Weese Maley<sup>1</sup>, Michael Kelly<sup>1</sup>

<sup>1</sup>University of Saskatchewan, <sup>2</sup>Curtin University

# 3-B-31 Two-photon imaging of GABAA receptor-mediated antidromic discharge in primary somatosensory neurons

Petri Takkala<sup>1</sup>, Steven Prescott<sup>1</sup>

<sup>1</sup>University of Toronto

# 3-B-32 Mechanisms of cocaine-induced increases in mu opioid receptor expression in PC12 cells

Karson Theriault<sup>1</sup>, Bettina Kalisch<sup>1</sup>, Francesco Leri<sup>1</sup>

<sup>1</sup>University of Guelph

# 3-B-33 Serotonin and mechanisms of cortical gain control: A novel synergy between 5-HT1A and 5-HT2A receptors in layer 6 pyramidal neurons of prefrontal cortex

Michael Tian<sup>1</sup>, Evelyn Lambe<sup>1</sup>

<sup>1</sup>University of Toronto

# 3-B-34 Investigating the transcriptomic basis of brain-wide electrophysiological diversity

Shreejoy Tripathy<sup>1</sup>, Brenna Li<sup>1</sup>, Dmitrii Tebaykin<sup>1</sup>, Lilah Toker<sup>1</sup>, Ogan Mancarci<sup>1</sup>, Paul Pavlidis<sup>1</sup>

<sup>1</sup>University of British Columbia

# 3-B-35 The effect of selective 5-HT2A receptor agonists on the BDNF, GDNF and CDNF genes expression in the mouse brain

Anton Tsybko<sup>1</sup>, Tatyana Ilchibaeva<sup>1</sup>, Elena Filimonova<sup>2</sup>, Vladimir Naumenko<sup>1</sup>

<sup>1</sup>The Institute of Cytology and Genetics SB RAS, <sup>2</sup>Novosibirsk State University

# 3-B-36 NMDAR co-agonist D-serine promotes synapse maturation and stabilization of axonal branches in the developing visual system

Marion Van Horn<sup>1</sup>, Arielle Strasser<sup>1</sup>, Lorendano Pollegioni<sup>2</sup>, Ed Ruthazer<sup>1</sup>

<sup>1</sup>Montreal Neurological Institute, <sup>2</sup>University of Insubria

# 3-B-37 Hypoxic glioblastoma cells utilize a specialized protein synthesis machinery to synthesize PB-cadherin during migration and invasion

Joseph Varga<sup>1</sup>, Nicole Kelly<sup>1</sup>, Erin Specker<sup>1</sup>, Christina Romeo<sup>1</sup>, Jim Uniacke<sup>1</sup>

<sup>1</sup>University of Guelph

## 3-B-38 Learning Regulates the mRNA Demethylase FTO and mRNA Methylation

Brandon Walters<sup>1</sup>, Valentina Mercaldo<sup>1</sup>, Colleen Gillion<sup>1</sup>, Matthew Yip<sup>1</sup>, Paul Frankland<sup>1</sup>, Sheena Josselyn<sup>1</sup>

<sup>1</sup>Hospital for Sick Children

#### 3-B-39 GABAA receptors are novel targets for ketamine

Dian-Shi Wang<sup>1</sup>, Antonello Penna<sup>1</sup>, Beverley Orser<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>University of Toronto; Department of Anesthesia, Sunnybrook Health Sciences Centre

# 3-B-40 Intersectin1 is required for developmental enhancement of Ca2+-dependent replenishment of the readily-releasable synaptic vesicles

Yi-Mei Yang<sup>1</sup>, Ameet S. Sengar<sup>1</sup>, Jamila Aitoubah<sup>1</sup>, Sean E. Egan<sup>1</sup>, Michael W. Salter<sup>1</sup>, Lu-Yang Wang<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# 3-B-41 TLR4-mediated increase of microglial glycolysis inhibits expression of LTP through IL-1β

Elisa York<sup>1</sup>, Jingfei Zhang<sup>1</sup>, Hyun Choi<sup>1</sup>, Rebecca Ko<sup>1</sup>, Brian MacVicar<sup>1</sup>
<sup>1</sup>University of British Columbia

#### 3-B-42 BK Channels in Synaptic Plasticity Underlying Sensory Filtering Associated with Learning and Memory

Tariq Zaman<sup>1</sup>, Mahabba Smoka<sup>2</sup>, Susanne Schmid<sup>1</sup>
<sup>1</sup>University of Western Ontario, <sup>2</sup>University of Alberta

## 3-B-43 Mu opioid receptor function in the anterior cingulate cortex

Maria Zamfir<sup>1</sup>, Philippe Séguéla<sup>2</sup>

<sup>1</sup>McGill University, <sup>2</sup>Montreal Neurological Institute (MNI)

# 3-B-44 The Role of the Tubulin-Cytoskeleton in the Modulation of the Connexin 36 Nexus

Cherie Brown<sup>1</sup>, Ryan Siu<sup>1</sup>, Christiane Zoidl<sup>1</sup>, David Spray<sup>2</sup>, Georg Zoidl<sup>1</sup>

¹York University, ²Albert Einstein College of Medicine

# 3-B-45 Dissecting the Role of Connexin 36 and Calmodulin in the Plasticity of Electrical Synapses

Ryan Siu<sup>1</sup>, Ekaterina Smirnova<sup>1</sup>, Cherie Brown<sup>1</sup>, Logan Donaldson<sup>1</sup>, Georg Zoidl<sup>1</sup>

<sup>1</sup>York University

# 3-B-46 Stable changes in H2A.Z incorporation and acetylation during memory formation and maintenance

Klotilda Narkaj<sup>1</sup>, Amber Azam<sup>1</sup>, Alexandria Angco<sup>1</sup>, Karina Servado<sup>2</sup>, Iva Zovkic<sup>2</sup>

<sup>1</sup>University of Toronto Mississauga, <sup>2</sup>University of Toronto Mississa

#### C – Disorders of the Nervous System

# 3-C-47 The Ontario Neurodegenerative Disease Research Initiative (ONDRI) Study: Using eye movements to identify cognitive and motor impairments in neurodegeneration

Brian Coe<sup>1</sup>, Donald Brien<sup>1</sup>, Sandra Black, Michael Borrie, Leanne Casaubon, Tiffany Chow, Dar Dowlatshahi, Liz Finger, Corinne Fischer, Andrew Frank, Morris Freedman, Angeles Garcia, David Grimes, Mandar Jog, Sanjeev Kumar, Tony Lang, Jennifer Mandzia, Conn <sup>1</sup>Queen's University, <sup>2</sup>ONDRI

# 3-C-48 The role of the 'cholesteryl ester transfer protein' in Alzheimer's disease pathology

Felix Oestereich<sup>1</sup>, Elizabeth-Ann Kranjec<sup>2</sup>, Hanyi Yu<sup>1</sup>, Pierre Chaurand<sup>2</sup>, Lisa-Marie Münter<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>Université de Montréal

#### 3-C-49 Improved Phenotype in Adult Sandhoff Disease Mice Following Intravenous Administration of Self-complementary Adeno-associated Viral Vector Expressing a Novel Hexosaminidase Enzyme

Karlaina Osmon<sup>1</sup>, Evan Woodley<sup>1</sup>, Patrick Thompson<sup>1</sup>, Subha

#### Karumuthil-Melethil<sup>2</sup>, Steven Gray<sup>3</sup>, Jagdeep Walia<sup>1</sup>

<sup>1</sup>Queen's University, <sup>2</sup>University of North Carolina, <sup>3</sup>University of North Carolina

# 3-C-50 Redox switch in Neuronal Autophagy and apoptosis: Implication of Thioredoxin system

Nagakannan Pandian<sup>1</sup>, Mohamed Ariff Iqbal<sup>1</sup>, James Thliveris<sup>1</sup>, Mojgan Rastegar<sup>1</sup>, Saeid Ghavami<sup>1</sup>, Eftekhar Eftekharpour<sup>1</sup>

<sup>1</sup>University of Manitoba

# 3-C-51 Myeloid cell-derived IL-1beta triggers CNS endothelial cell activation and autoimmunity.

Alexandre Paré<sup>1</sup>, Sébastien Lévesque<sup>1</sup>, Benoit Mailhot<sup>1</sup>, Marc-André Lécuyer<sup>2</sup>, Hania Kébir<sup>2</sup>, Alexandre Prat<sup>2</sup>, Steve Lacroix<sup>1</sup>

<sup>1</sup>Université Laval, <sup>2</sup>Université de Montréal

### 3-C-52 Dysfunctional decision-making processes in Parkinson's patients playing a strategic game

Ashley Parr<sup>1</sup>, Brian Coe<sup>1</sup>, Giovanna Pari<sup>1</sup>, Douglas Munoz<sup>1</sup>
<sup>1</sup>Queen's University

# 3-C-53 RHBDL4-mediated cleavage of the amyloid precursor protein reduces Amyloid-beta generation

Sandra Paschkowsky<sup>1</sup>, Mehdi Hamzé<sup>1</sup>, Felix Oestereich<sup>1</sup>, Bernadeta Michalski<sup>2</sup>, Margaret Fahnestock<sup>2</sup>, Lisa Marie Munter<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>McMaster University

### 3-C-54 Supervised learning improves the ability of MEG to detect Alzheimer's disease

Steve Patterson<sup>1</sup>, Alexander Rudiuk<sup>2</sup>, Tim Bardouille<sup>1</sup>
<sup>1</sup>IWK Health Centre, <sup>2</sup>Dalhousie University

# 3-C-55 Histopathological studies of the Effects of Combined Administration of Duovir-N and Vitamin E on the Cerebellum of Wistar rats.

Aniekan Peter<sup>1</sup>, Moses Ekong<sup>1</sup>, Onyemaechi AZU<sup>1</sup>, Jegede Ayoola<sup>2</sup>, Ugochukwu Offor<sup>1</sup>

<sup>1</sup>University of Uyo, <sup>2</sup>University of Kwazulu Natal

# 3-C-56 Neuroprotective and anti-inflammatory roles of estrogenic receptors in the myenteric plexus of a mouse model of Parkinson's disease

Andrée-Anne Poirier<sup>1</sup>, Mélissa Côté<sup>1</sup>, Mélanie Bourque<sup>1</sup>, Marc Morissette<sup>2</sup>, Thérèse Di Paolo<sup>1</sup>, Denis Soulet<sup>1</sup>

<sup>1</sup>Laval University, <sup>2</sup>CHUQ Research Center (CHUL)

# 3-C-57 Investigating the Role of CDNF, MANF, and BDNF as Biomarkers and Therapeutic Targets for Parkinson's Disease.

Shreya Prashar<sup>1</sup>, Hetshree Joshi<sup>1</sup>, Sharnpreet Kooner<sup>1</sup>, Ram Mishra<sup>1</sup>

McMaster University

# 3-C-58 Exogenous Dopamine Application and Synaptic Plasticity in the Normal Globus Pallidus

Ian Prescott<sup>1</sup>, Robert Marino<sup>1</sup>, Ron Levy<sup>1</sup>
<sup>1</sup>Oueen's University

# 3-C-59 Characterization of the effects of FDA-approved drugs on human cells: A potential treatment for C90RF72 ALS cases.

Amélie Quoibion<sup>1</sup>, Martine Therrien<sup>2</sup>, Simon Girard<sup>3</sup>, J. Alex Parker<sup>2</sup>, Patrick Dion<sup>1</sup>, Guy Rouleau<sup>1</sup>

#### POSTER SESSION 3 - WEDNESDAY, JUNE 1, 2016

<sup>1</sup>McGill University (Montreal Neurological Institute), <sup>2</sup>Université de Montréal (CRCHUM), <sup>3</sup>McGill University

# 3-C-60 Cadherins mediate cocaine-induced synaptic plasticity and behavioural conditioning

Andrea Globa<sup>1</sup>, Fergil Mills<sup>1</sup>, Shuai Liu<sup>2</sup>, Catherine Cowan<sup>1</sup>, Mahsan Mobasser<sup>1</sup>, Anthony Phillips<sup>1</sup>, Stephanie Borgland<sup>2</sup>, Shernaz Bamji<sup>1</sup>
<sup>1</sup>University of British Columbia, <sup>2</sup>University of Calgary

# 3-C-61 Assessing outcomes of an Endothelin-1 induced stroke injury in an APP transgenic rat

Aaron Regis<sup>1</sup>, Vladimir Hachinski<sup>1</sup>, Shawn Whitehead<sup>1</sup>
<sup>1</sup>Western University

# 3-C-62 The 3xTG-AD and 5XFAD mouse models of Alzheimer's disease show differences in signal detection and response bias on an automated odour discrimination task

**Kyle Roddick<sup>1</sup>, Heather Schellinck<sup>1</sup>, Richard Brown<sup>1</sup>**<sup>1</sup>Dalhousie University

# 3-C-63 TAU Modulates BDNF Expression and Mediates Aß-Induced BDNF Down-Regulation in Animal and Cellular Models of Alzheimer's Disease

Elyse Rosa<sup>1</sup>, Sujeivan Mahendram<sup>1</sup>, Stephen Ginsberg<sup>2</sup>, Yazi Ke<sup>3</sup>, Lars Ittner<sup>3</sup>, Margaret Fahnestock<sup>1</sup>

<sup>1</sup>McMaster University, <sup>2</sup>New York University School of Medicine, <sup>3</sup>The University of New South Wales

# 3-C-64 Dopamine D3 receptor activity and its downstream signaling targets are altered within the basolateral amygdala following chronic opiate exposure

Laura Rosen<sup>1</sup>, Walter Rushlow<sup>1</sup>, Steven Laviolette<sup>1</sup>

<sup>1</sup>The University of Western Ontario

# 3-C-65 Cerebral aquaporins (AQPs) and their co-localised potassium channel as potential drug targets and/or biomarkers in Temporal Lobe Epilepsy (TLE)

Mootaz Salman<sup>1</sup>, Mariam Sheilabi<sup>1</sup>, D. Bhattacharyya<sup>2</sup>, Alessandra Princivalle<sup>1</sup>, Matthew Conner<sup>1</sup>

<sup>1</sup>Sheffield Hallam University, <sup>2</sup>Royal Hallamshire Hospital

# **3-C-66** Personalized botulinum toxin type A therapy of bilateral upper limb essential tremor by multi-sensor kinematic technology Olivia Samotus<sup>1</sup>, Hadi Moradi<sup>1</sup>, Mandar Joq<sup>1</sup>

<sup>1</sup>London Health Sciences Centre

# 3-C-67 Prohibition of Neogenin interaction with lipid rafts promotes functional recovery after ischemic stroke

**Alireza Shabanzadeh Pirsaraei<sup>1</sup>, Paulo Koeberle<sup>2</sup>, Philippe Monnier<sup>1</sup>**<sup>1</sup>University of Toronto/Toronto Western Research institute, <sup>2</sup>University of Toronto

#### 3-C-68 Different Forms of Disinhibition Have Distinct Effects on Dorsal Horn Circuits

Husain Shakil<sup>1</sup>, Kwan Yeop Lee<sup>2</sup>, Steven Prescott<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>The Hospital for Sick Children

# 3-C-69 The role of PAR2 activation in the pathophysiology of synucleinopathies with emphasis on Multiple System Atrophy (MSA)

Seyedeh Zahra Shams Shoaei<sup>1</sup>, Lili-Naz Hazrati<sup>2</sup>, JoAnne McLaurin<sup>1</sup>

<sup>1</sup>Sunnybrook Research Institute (SRI), <sup>2</sup>The Hospital for sick children(Sickkids)

# 3-C-70 LPS-Induced Blood-Brain Barrier Disruption: Assessing Lithium's Molecular and Therapeutic Effects

Roohie Sharma<sup>1</sup>, Aaron Edward<sup>1</sup>, Ritesh Daya<sup>1</sup>, Jay Patel<sup>1</sup>, Benicio Frey<sup>1</sup>, Ram Mishra<sup>1</sup>

<sup>1</sup>McMaster University

# 3-C-71 Traumatic brain injury induces progressive and degenerative changes resembling motor neuron disease that are exacerbated by pathological TDP-43

Sandy Shultz<sup>1</sup>, David Wright<sup>1</sup>, Xin Tan<sup>1</sup>, Terence O'Brien<sup>1</sup>

The University of Melbourne

#### 3-C-72 Effect of Normal and Parkinson's Disease-Mutant Alpha-Synuclein on Synaptic Vesicle Recycling in Human CNS Presynaptic Terminals

Christine Snidal<sup>1</sup>, Robert Chen<sup>1</sup>, Arup Nath<sup>1</sup>, Qi Li<sup>1</sup>, Taufik Valiente<sup>2</sup>, Elise Stanley<sup>1</sup>

<sup>1</sup>Krembil Research Institute, <sup>2</sup>University of Toronto

# 3-C-73 The effects of microglia-mediated inflammation on neuronal development in vivo

Cynthia Solek<sup>1</sup>, Nasr Farooqi<sup>1</sup>, Edward Ruthazer<sup>1</sup>

<sup>1</sup>Monteal Neurological Institute, McGill University

## 3-C-74 The role of thalamo-motor fibre damage in overt motor responses in disorders of consciousness.

Clara Stafford<sup>1</sup>, Adrian Owen<sup>1</sup>, Davinia Fernandez-Espejo<sup>2</sup>
<sup>1</sup>University of Western Ontario, <sup>2</sup>University of Birmingham

#### 3-C-75 History of Traumatic Brain Injury Moderates Relationships Between Polygenetic Risk and Neural Substrates of ADHD Symptoms

Sonja Stojanovski<sup>1</sup>, Daniel Felsky<sup>2</sup>, Aristotle Voineskos<sup>2</sup>, Russell Schachar<sup>1</sup>, Anne Wheeler<sup>1</sup>

<sup>1</sup>Hospital for Sick Children, <sup>2</sup>Centre for Addiction and Mental Health

# 3-C-76 Differential Effects of Hippocampal Kindling in Young and Aging Mice

Kurt Stover<sup>1</sup>, Chiping Wu<sup>2</sup>, Paul Stafford<sup>1</sup>, Donald Weaver<sup>1</sup>, James Eubanks<sup>1</sup>, Liang Zhang<sup>1</sup>

<sup>1</sup>Krembil Research Institute, University Health Network, <sup>2</sup>University of Toronto

#### 3-C-77 Characterization of Anatomical Brain Recovery after Treatment with Metformin in Hypoxia-Ischemia Mouse Model of Childhood Brain Injury Using Micro-MRI

Kamila Szulc<sup>1</sup>, Parvati Dadwal<sup>2</sup>, Neemat Mahmud<sup>2</sup>, Rebecca Ruddy<sup>2</sup>, Christine Laliberté<sup>1</sup>, Jacob Ellegood<sup>1</sup>, Brian Nieman<sup>1</sup>, Cindi Morshead<sup>2</sup>, Donald Mabbott<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children, <sup>2</sup>University of Toronto

# 3-C-78 Entorhinal tau pathology decouples hippocampal and prefrontal oscillations without impairing associative memory

Stephanie Tanninen<sup>1</sup>, Bardia Nouriziabari<sup>1</sup>, Mark Morrissey<sup>1</sup>, Ronald Klein<sup>2</sup>, Kaori Takehara-Nishiuchi<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Lousiana State University Health Sciences Center

# 3-C-79 Childhood maltreatment is associated with a global impairment of oligodendrocyte function in the anterior cingulate cortex of depressed suicides

Arnaud Tanti<sup>1</sup>, Pierre-Eric Lutz<sup>1</sup>, Alicja Gasecka<sup>2</sup>, John Kim<sup>1</sup>, Marina Wakid<sup>1</sup>, Meghan Shaw<sup>1</sup>, Marc-Aurele Chay<sup>1</sup>, Sarah Barnett-Burns<sup>1</sup>, Volodymyr Yerko<sup>1</sup>, Gary Chen<sup>1</sup>, Maria Antonietta Davoli<sup>1</sup>, Daniel Zhou<sup>1</sup>, Kathryn Vaillancourt<sup>1</sup>, Jean-François Théroux<sup>1</sup>, Alexan

<sup>1</sup>McGill Group for Suicide Studies, <sup>2</sup>Centre de Recherche de l'Institut en Sante Mentale de Quebec, <sup>3</sup>Institut universitaire en santé mentale de Québec

# 3-C-80 Investigating Perivascular Changes and the Blood Brain Barrier in Fetal Alcohol Spectrum Disorder

Uilki Tufa<sup>1</sup>, Suzie Dufour<sup>2</sup>, Meera Ramani<sup>2</sup>, Iliya Weisspapir<sup>2</sup>, Berj Bardakjian<sup>1</sup>, Peter Carlen<sup>2</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Toronto Western Hospital

# 3-C-81 OTUD7A is a novel candidate driver gene of neurodevelopmental abnormalities in the 15q13.3 microdeletion syndrome

Brianna Unda<sup>1</sup>, Mohammed Uddin<sup>2</sup>, Sean White<sup>1</sup>, Nicholas Holzapfel<sup>1</sup>, Vickie Kwan<sup>1</sup>, Nadeem Murtaza<sup>1</sup>, Annika Forsingdal<sup>3</sup>, Jacob Nielsen<sup>3</sup>, Kristin Hope<sup>1</sup>, Stephen Scherer<sup>2</sup>, Karun Singh<sup>1</sup>

<sup>1</sup>McMaster University, <sup>2</sup>The Hospital for Sick Children, <sup>3</sup>H. Lundbeck A/S

#### 3-C-82 The Biochemical and Behavioural Effects of Tyrosine Hydroxylase Overexpression in Transgenic Mice

Laura Vecchio<sup>1</sup>, M. Kristel Bermejo<sup>1</sup>, Gary Miller<sup>2</sup>, Amy Ramsey<sup>1</sup>, Ali Salahpour<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Emory University

# 3-C-83 Extensive white matter pathology in aged wildtype and APP transgenic rats used to model post-stroke dementia

Nina Weishaupt<sup>1</sup>, Shawn Whitehead<sup>1</sup>, David Cechetto<sup>1</sup>, Vladimir Hachinski<sup>1</sup>

<sup>1</sup>University of Western Ontario

# 3-C-84 Amyloid-β induced insulin resistance leads to diabetes and aggravated neurodegeneration in transgenic mice

Nadeeja Wijesekara<sup>1</sup>, Rosemary Ahrens<sup>1</sup>, Ling Wu<sup>1</sup>, Kathy Ha<sup>1</sup>, Miheer Sabale<sup>2</sup>, Giuseppe Verdil<sup>1</sup>, Paul Fraser<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Curtin University of Technology

# 3-C-85 Reopening the critical period for recovery by augmenting spinal plasticity after cortical stroke

**Anna Wiersma<sup>1</sup>, Karim Fouad<sup>1</sup>, Ian Winship<sup>1</sup>**<sup>1</sup>University of Alberta

# 3-C-86 Changes in behaviour and resting state functional connectivity in a primate model of Alzheimer's Disease

Robert Wither<sup>1</sup>, Susan Boehnke<sup>1</sup>, Ann Lablans<sup>1</sup>, Brian Coe<sup>1</sup>, Joe Nashed<sup>1</sup>, DJ Cook<sup>1</sup>, Fernanda De Felice<sup>2</sup>, Douglas Munoz<sup>1</sup>

<sup>1</sup>Queen's University, <sup>2</sup>Federal University of Rio de Janeiro

# 3-C-87 Long-term amelioration of seizure-induced hypoxia: Effect on epileptogenesis and behavioural disturbances

Marshal Wolff<sup>1</sup>, Simon Spanswick<sup>1</sup>, Malek Amr<sup>1</sup>, Jordan Farrell<sup>1</sup>, Gordan Teskey<sup>1</sup>

<sup>1</sup>University of Calgary

# 3-C-88 Indications of impaired cerebrovascular buffering of rapid blood pressure changes following one season of participation in contact sports

Alexander Wright<sup>1</sup>, Jonathan Smirl<sup>2</sup>, Michael Kennefick<sup>2</sup>, Colin Wallace<sup>2</sup>, Kelsey Bryk<sup>2</sup>, Paul van Donkelaar<sup>2</sup>

<sup>1</sup>University of British Columbia, <sup>2</sup>University of British Columbia Okanagan

# 3-C-89 MRI-guided focused ultrasound-mediated delivery of shRNA targeting a-synuclein in a mouse model of Parkinson's disease

Kristiana Xhima<sup>1</sup>, Fadl Nabbouh<sup>2</sup>, Kelly Markham-Coultes<sup>1</sup>, Paul Nagy<sup>1</sup>, Alison Burgess<sup>1</sup>, Kullervo Hynynen<sup>1</sup>, Isabelle Aubert<sup>3</sup>, Anurag Tandon<sup>2</sup>

Sunnybrook Research Institute, <sup>2</sup>Tanz Centre for Research in Neurodegenerative Diseases, <sup>3</sup>University of Toronto

# 3-C-90 Electrophysiological investigation in neurons derived from human induced pluripotent stem cells with disruptions of SHANK2

Wenbo Zhang<sup>1</sup>, Kirill Zaslavsky<sup>1</sup>, P Joel Ross<sup>1</sup>, Asli Dedeagac<sup>1</sup>, Alina Piekna<sup>1</sup>, Graham Pitcher<sup>1</sup>, Stephen Scherer<sup>1</sup>, James Ellis<sup>1</sup>, Michael Salter<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

#### 3-C-91 Investigating the effects of Amyloid-beta GxxxG-motiftargeting agents on Abeta42-induced toxicity in a D. melanogaster model

Yifei Zhong<sup>1</sup>, Filip Liebsch<sup>1</sup>, Gerhard Multhaup<sup>1</sup>

<sup>1</sup>McGill University

#### D – Sensory and Motor Systems

## 3-D-92 rTMS to the OFA shows increased correlation to right and left FFA

Francisco Parreira<sup>1</sup>, Sara Rafique<sup>1</sup>, Lily Solomon-Harris<sup>1</sup>, Jennifer Steeves<sup>1</sup>

<sup>1</sup>York University

# 3-D-93 Altered structural connectivity associated with visual hallucinations following occipital stroke

Sara Rafique<sup>1</sup>, John Richards<sup>2</sup>, Francisco Parreira<sup>1</sup>, Jennifer Steeves<sup>1</sup>

<sup>1</sup>York University, <sup>2</sup>University of California, Davis, Medical Center

# 3-D-94 Cannabinoid type 2 receptors modulate visual information in the primary visual cortex.

William Redmond<sup>1</sup>, Umit Keysan<sup>1</sup>, Destiny Lu-Cleary<sup>2</sup>, Bruno Cécyre<sup>1</sup>, Sébastien Thomas<sup>1</sup>, Jean-François Bouchard<sup>1</sup>, Christian Casanova<sup>1</sup>

<sup>1</sup>Université de Montréal, <sup>2</sup>University British Columbia

# 3-D-95 Genetic identification of pain circuits using developmentally regulated Cre expression

Robert Roome<sup>1</sup>, Artur Kania<sup>1</sup>

<sup>1</sup>Institut de Recherches Cliniques de Montréal

# 3-D-96 Central Pattern Generator modelling for swimming activity in Zebrafish larva spinal cord

Yann Roussel<sup>1</sup>, Tuan Bui<sup>1</sup>

<sup>1</sup>University of Ottawa

#### POSTER SESSION 3 - WEDNESDAY, JUNE 1, 2016

# 3-D-97 Time Course Of Change In Reaches And Proprioception: After Reaching With A Misaligned Cursor

Jennifer Ruttle<sup>1</sup>, Erin Cressman<sup>1</sup>, Denise Henriques<sup>1</sup>

<sup>1</sup>York University

## 3-D-98 Spatial codes in the superior colliculus delay activity during memory-quided gaze task

Amirsaman Sajad<sup>1</sup>, Morteza Sadeh<sup>1</sup>, Xiaogang Yan<sup>1</sup>, Hongying Wang<sup>1</sup>, Douglas Crawford<sup>1</sup>

<sup>1</sup>York University

# 3-D-99 Altered Laminar Processing in Multisensory and Auditory Cortical Areas Following Adult-Onset Noise-Induced Hearing Loss

Ashley Schormans<sup>1</sup>, Marei Typlt<sup>1</sup>, Brian Allman<sup>1</sup>

<sup>1</sup>Western University

# 3-D-100 Audiovisual Temporal Processing in Rats as Assessed by Novel Operant Conditioning Tasks

Kaela Scott<sup>1</sup>, Ashley Shormans<sup>1</sup>, Anna Tyker<sup>1</sup>, Albert Vo<sup>1</sup>, Dan Stolzberg<sup>1</sup>, Brian Allman<sup>1</sup>

<sup>1</sup>University of Western Ontario

### 3-D-101 A pixel-computable stabilized supralinear network model of V1

Ben Selby<sup>1</sup>, Bryan Tripp<sup>1</sup>

<sup>1</sup>University of Waterloo

# 3-D-102 Challenging the Labeled Line Theory: Itch and Pain can be Coded by a Single Afferent Population

Behrang Sharif<sup>1</sup>, Ariel Ase<sup>1</sup>, Alfredo Ribeiro da Silva<sup>1</sup>, Philippe Séguéla<sup>1</sup>

McGill University

## 3-D-103 Von Economo neurons in Indian green Ring neck Parrot (Psittacula krameri): possible role in vocal learning

Shubha Srivastava<sup>1</sup>, Sudhi Shrivastava<sup>2</sup>

<sup>1</sup>K N P G College Gyanpur S R N Bhadohi, <sup>2</sup>Barkatullah University Bhopal M P

# **3-D-104** *Deactivation of PMd and A5 in non-human primates impairs corrective responses to mechanical disturbances of the limb* Tomohiko Takei<sup>1</sup>, Stephen Lomber<sup>2</sup>, Douglas Cook<sup>1</sup>, Stephen Scott<sup>1</sup>

<sup>1</sup>Queen's University, <sup>2</sup>Western University

#### 3-D-105 Sciatic Nerve Exposure to Non-Compressive Nucleus Puplosus Elicits an Acute Inflammatory Neuritis Mediated by Neurotrophin Expression

YuShan Tu<sup>1</sup>, Mohammed Shamji<sup>2</sup>, Michael Salter<sup>1</sup>

<sup>1</sup>Hospital for Sick Children, <sup>2</sup>Toronto Western Hospital

#### 3-D-106 Peripheral Hypersensitivity to Subthreshold Stimuli Persists after Resolution of Acute Experimental Disc-Herniation Neuropathy

Mohammed Shamji<sup>1</sup>, YuShan Tu<sup>2</sup>, Michael Salter<sup>2</sup>

<sup>1</sup>Toronto Western Hospital, <sup>2</sup>Hospital for Sick Children

## 3-D-107 Goal-dependent modulation of the long-latency stretch response accounts for orientation of the arm

Jeff Weiler<sup>1</sup>, Paul Gribble<sup>1</sup>, Andrew Pruszynski<sup>1</sup>

<sup>1</sup>University of Western Ontario

# 3-D-108 Pannexin Channel Expression and Function in the Olfactory System of a Knock Out Panx1 Mouse Model

Paige Whyte - Fagundes<sup>1</sup>, Stefan Kurtenbach<sup>1</sup>, Georg Zoidl<sup>1</sup>

¹York University

## 3-D-109 DTI reveals asymmetry in the optic radiations following early monocular enucleation

Nikita Wong<sup>1</sup>, Sara Rafique<sup>1</sup>, Krista Kelly<sup>2</sup>, Stefania Moro<sup>1</sup>, Jennifer Steeves<sup>1</sup>

<sup>1</sup>York University, <sup>2</sup>Retina Foundation of the Southwest

#### 3-D-110 HD-tDCS over the mIPS affects movement planning

Sisi Xu<sup>1</sup>, Jason Gallivan<sup>1</sup>, Gunnar Blohm<sup>1</sup>

<sup>1</sup>Queen's University

#### 3-D-111 Two-stage bimanual coordination learning

Maral Yeganeh Doost<sup>1</sup>, Jean Jacques Orban de Xivry<sup>2</sup>, Yves Vandermeeren <sup>1</sup>

<sup>1</sup>UcL (Université Catholique de Louvain), <sup>2</sup>KULeuven (Katholieke Universiteit Leuven)

## 3-D-112 Cortical movement representations during unimanual and bimanual wrist movements in humans

Atsushi Yokoi<sup>1</sup>, Diogo Duarte<sup>2</sup>, Jörn Diedrichsen<sup>1</sup>

<sup>1</sup>The University of Western Ontario, <sup>2</sup>University of Lisbon

#### 3-D-113 V3 Spinal Interneurons Are Crucial In Regulating Weight-Loading Movement

Han Zhang<sup>1</sup>, Dylan Gauthier<sup>1</sup>, Ying Zhang<sup>1</sup>

<sup>1</sup>Dalhousie University

# E – Homeostatic and Neuroendocrine Systems

# 3-E-114 The GABAergic neurosteroid 3a-androstanediol protects SH-SY5Y human neuroblastoma cells against prolonged ERK phosphorylation induced by hydrogen peroxide and amyloid $\beta$ peptide

Ari Mendell<sup>1</sup>, Neil MacLusky<sup>1</sup>

<sup>1</sup>University of Guelph

## 3-E-115 The role of Growth Hormone as a neurotransmitter involved in depression: A human model

Shubham Sharma<sup>1</sup>, Michael Cusimano<sup>1</sup>, Rowan Jing<sup>2</sup>, Khalid Fahoum<sup>1</sup>, Mubarak Algahtany<sup>3</sup>, Stanley Zhang<sup>2</sup>

<sup>1</sup>University of Toronto/ St. Michael's Hospital, <sup>2</sup>St. Michael's Hospital, <sup>3</sup>College of Medicine, King Khalid University

## 3-E-116 The effects of neuropeptide Y on dissociated subfornical organ neurons.

Lauren Shute<sup>1</sup>, Samantha Lee<sup>1</sup>, Mark Fry<sup>1</sup>

<sup>1</sup>University of Manitoba

### 3-E-117 Stress as a contagion: Synaptic imprinting following social interactions in rodents

Toni-Lee Sterley<sup>1</sup>, Dinara Baimoukhametova<sup>1</sup>, Jaideep Bains<sup>1</sup>
<sup>1</sup>University of Calgary

# 3-E-118 The Tubby protein regulates expression of genes involved in metabolism and neuronal functions

Hamza Taufique<sup>1</sup>, Sabine Cordes<sup>1</sup>

<sup>1</sup>University of Toronto

3-E-119 Maternal Circuits that Respond to Mouse Pup Vocalizations: D2 Dopamine and Oxytocin Receptors

John Yeomans<sup>1</sup>, Brian Pereira<sup>1</sup>

<sup>1</sup>University of Toronto

#### F - Cognition and Behaviour

3-F-120 Induction of 50 kHz vocalizations by dopamine and apomorphine from nucleus accumbens and lateral septum Michael Silkstone<sup>1</sup>, Kevin Mulvihill<sup>1</sup>, Christina Jobson<sup>1</sup>, Stefan

Brudzynski<sup>1</sup>

<sup>1</sup>Brock University

# 3-F-121 5-HT1A receptor and its transcription factors Freud-1 and Freud-2 in the brain of rats with genetically determined fear-induced aggression or its absence

Vladimir Naumenko<sup>1</sup>, Tatyana Ilchibaeva<sup>1</sup>, Anton Tsybko<sup>1</sup>, Rimma Kozhemyakina<sup>1</sup>, Elena Kondaurova<sup>1</sup>

<sup>1</sup>Federal Research Center Institute of Cytology and Genetics

## 3-F-122 The effect of d-govadine on the rewarding properties of d-amphetamine

Maya Nesbit<sup>1</sup>, Carine Dias<sup>1</sup>, Jonathan Cunningham<sup>1</sup>, Anthony Phillips<sup>1</sup>
<sup>1</sup>University of British Columbia

# 3-F-123 Evaluating the role of GABA interneurons in the medial prefrontal cortex during working memory in mice

Robin Nguyen<sup>1</sup>, Junchul Kim<sup>1</sup>

<sup>1</sup>University of Toronto

# 3-F-124 Opposite effects of nucleus accumbens shell D1 and D2 receptor antagonism in approach-avoidance conflict resolution

David Nguyen<sup>1</sup>, Victoria Fugariu<sup>1</sup>, Rutsuko Ito<sup>1</sup>

<sup>1</sup>University of Toronto

## 3-F-125 Correlation between cognitive decline and blood pressure in elderly patients with controlled hypertension

Adrián Noriega de la Colina<sup>1</sup>, Rong Wu<sup>1</sup>, Laurence Desjardins-Crépeau<sup>2</sup>, Maxime Lamarre-Cliche<sup>1</sup>, Pierre Larochelle<sup>1</sup>, Louis Bherer<sup>3</sup>, Hélène Girouard<sup>1</sup>

<sup>1</sup>Université de Montréal, <sup>2</sup>Université de Québec à Montréal (UQAM), <sup>3</sup>Concordia University

# 3-F-126 fMRI reveals the evolution of representational content during a delayed match-to-sample task

Edward O'Neil<sup>1</sup>, Andy C.H. Lee<sup>1</sup>

<sup>1</sup>University of Toronto

## 3-F-127 Resting-state MEG oscillations predict working memory scores on neuropsychological tests

Victor Oswald<sup>1</sup>, Younes Zerouali<sup>1</sup>, Aubrée Boulait-Craig<sup>1</sup>, Maja Krajinovic <sup>1</sup>, Caroline Laverdière<sup>1</sup>, Daniel Sinnett<sup>1</sup>, Pierre Jolicoeur <sup>1</sup>, Sarah Lippé <sup>1</sup>, Karim Jerbi <sup>1</sup>, Philippe Robaey<sup>1</sup> <sup>1</sup>University of Montreal

## 3-F-128 Genetic predictors of neurocognitive outcome in children treated for medulloblastoma

Adeoye Oyefiade<sup>1</sup>, Nadia Scantlebury<sup>1</sup>, Nicole Law<sup>1</sup>, Anna Goldenberg<sup>1</sup>, Donald Mabbott<sup>1</sup>

<sup>1</sup>The Hospital for Sick Children

# 3-F-129 Role of the ventral hippocampal projections to the lateral septum in fear and anxiety

Gustavo Parfitt<sup>1</sup>, June JY Bang<sup>1</sup>, Junchul Kim<sup>1</sup>
<sup>1</sup>Uofī

# 3-F-130 The lateral entorhinal cortex encodes combinations of physical and relational features of stimuli in environmental context

Maryna Pilkiw<sup>1</sup>, Nathan Insel<sup>1</sup>, Yonghua Cui<sup>2</sup>, Caitlin Finney<sup>1</sup>, Simone Chenq<sup>1</sup>, Mark Morrissey<sup>1</sup>, Kaori Takehara-Nishiuchi<sup>1</sup>

<sup>1</sup>University of Toronto, <sup>2</sup>Medical College of Soochow University

# 3-F-131 Basal forebrain cholinergic lesions attenuate the reinstatement of cocaine-seeking produced by a discriminative stimulus in goal-trackers but not sign-trackers

Kyle Pitchers<sup>1</sup>, Jonte Jones<sup>1</sup>, Terry Robinson<sup>1</sup>, Martin Sarter<sup>1</sup>
<sup>1</sup>University of Michigan

### 3-F-132 Optical Imaging of Forgetting in the Mouse Hippocampus

Adam Ramsaran<sup>1</sup>, Jessica Jimenez<sup>2</sup>, Sheena Josselyn<sup>1</sup>, Mazen Kheirbek<sup>2</sup>, Paul Frankland<sup>1</sup>

<sup>1</sup>Hospital for Sick Children, <sup>2</sup>Columbia University

# 3-F-133 Linking of fear memories by temporally limited changes in both excitatory and inhibitory neuron activity in the lateral amvadala

Asim Rashid<sup>1</sup>, Chen Yan<sup>1</sup>, Valentina Mercaldo<sup>1</sup>, Hwa-Lin (Liz) Hsiang<sup>1</sup>, Antonietta DeCristofaro<sup>1</sup>, Sungmo Park<sup>1</sup>, Paul Frankland<sup>1</sup>, Sheena Josselvn<sup>1</sup>

<sup>1</sup>The Hospital For Sick Children

# 3-F-134 Pathway-specific recording of thalamic input to nucleus accumbens during reward seeking task

Sean Reed<sup>1</sup>, Christopher Lafferty<sup>1</sup>, Thomas Davidson<sup>2</sup>, Logan Grosenick<sup>2</sup>, Karl Deisseroth<sup>2</sup>, Jonathan Britt<sup>1</sup>

<sup>1</sup>McGill University, <sup>2</sup>Stanford University

## 3-F-135 Neurocognitive alterations in adult rats following neonatal treatment with domoic acid

Mark Robbins<sup>1</sup>, Catherine Ryan<sup>1</sup>, Tracy Doucette<sup>1</sup>

<sup>1</sup>University of Prince Edward Island

## 3-F-136 Metformin promotes cognitive recovery in two mouse models of juvenile brain injury

Rebecca Ruddy<sup>1</sup>, Daniel Derkach<sup>1</sup>, Parvati Dadwal<sup>1</sup>, Wenjun Xu<sup>1</sup>, Cindi Morshead<sup>1</sup>

<sup>1</sup>University of Toronto

### 3-F-137 Insights into how the Hippocampus Governs the Drive to Explore

Jean-Philippe Dufour<sup>1</sup>, Alejandro Tsai Cabal<sup>2</sup>, Sabine Egli<sup>3</sup>, Christopher Barnes<sup>3</sup>, Horea-Ioan Ioanas<sup>3</sup>, Mahboubeh Ahmadi<sup>4</sup>, Adrienne Müller Herde<sup>3</sup>, Silvan Boss<sup>3</sup>, Stefanie Krämer<sup>3</sup>, Simon Ametamey<sup>3</sup>, Markus Rudin<sup>3</sup>, Javad Mirnajafi-Zadeh<sup>4</sup>, Christopher Pryce<sup>5</sup>, Eri

#### POSTER SESSION 3 - WEDNESDAY, JUNE 1, 2016

<sup>1</sup>University of Zürich, <sup>2</sup>Friedrich Miescher Institute, <sup>3</sup>Swiss Federal Institute of Technology, <sup>4</sup>Tarbiat Modares University, <sup>5</sup>University of Zurich Hospital for Psychiatry

# 3-F-138 Involvement of CB1 receptor on fear memory processing and on long-term potentiation in the hippocampus and infralimbic cortex.

Fabiana Santana<sup>1</sup>, Rodrigo Ordonez<sup>1</sup>, Ana Paula Crestani<sup>1</sup>, Krislei Scienza<sup>1</sup>, Josué Haubrich<sup>1</sup>, Ricardo Sachser<sup>1</sup>, Flavia Santos<sup>1</sup>, Fernanda Lotz<sup>1</sup>, Lucas Alvares<sup>1</sup>, Jorge Quillfeldt<sup>1</sup>

<sup>1</sup>UFRGS/ Brazil

# 3-F-139 N400 evidence for embodied processing of concrete words after a picture context

Daniel Schmidtke<sup>1</sup>, Elisabet Service<sup>1</sup>, Richard Mah<sup>1</sup>, John Connolly<sup>1</sup>

<sup>1</sup>McMaster University

## 3-F-140 The neural basis of episodic memory transformation in humans

Melanie Sekeres<sup>1</sup>, John Anderson<sup>2</sup>, Morris Moscovitch<sup>1</sup>, Gordon Winocur<sup>1</sup>, Cheryl Grady<sup>1</sup>

<sup>1</sup>Baycrest, <sup>2</sup>York University

## 3-F-141 An anatomical interface for guidance of visual behavior by medial temporal lobe representations

Kelly Shen<sup>1</sup>, Gleb Bezgin<sup>1</sup>, Rajajee Selvam<sup>1</sup>, Anthony McIntosh<sup>1</sup>, Jennifer Ryan<sup>1</sup>

<sup>1</sup>Rotman Research Institute

# 3-F-142 GABA Cells in the Central Nucleus of the Amygdala Control Cataplexy

Matthew Snow<sup>1</sup>, Jimmy Fraigne<sup>1</sup>, Victoria Chuen<sup>1</sup>, Richard Horner<sup>1</sup>, John Peever<sup>1</sup>

<sup>1</sup>University of Toronto

## 3-F-143 Memory functions of adult neurogenesis are modulated by stress and sex

Jason Snyder<sup>1</sup>, Timothy O'Leary<sup>1</sup>

<sup>1</sup>University of British Columbia

# 3-F-144 Hippocampus place cell network properties in a Fmr1 knockout model of Fragile X Syndromic Autism Spectrum Disorder

Fraser Sparks<sup>1</sup>, Zoe Talbot<sup>1</sup>, Dino Dvorak<sup>1</sup>, André Fenton<sup>1</sup>

<sup>1</sup>New York University

# 3-F-145 Programming of adult behaviour and epigenetic gene regulation in rat offspring through prenatal exposure to predator odour

Sophie St-Cyr<sup>1</sup>, Sameera Abuaish<sup>1</sup>, Patrick McGowan<sup>1</sup> <sup>1</sup>University of Toronto

# 3-F-146 Feedback inhibition underlies slot-like capacity and resource-like neural coding: a biophysical model of multiple-item working memory

Dominic Standage<sup>1</sup>, Martin Pare<sup>1</sup>

<sup>1</sup>Queen's University

3-F-147 Remote object memory destabilization involves a

## pathway linking M1 receptors to proteasome-mediated protein degradation

Mikaela Stiver<sup>1</sup>, Natalie Nightingale<sup>1</sup>, Julian Rizos<sup>1</sup>, William Messer<sup>2</sup>, Boyer Winters<sup>1</sup>

<sup>1</sup>University of Guelph, <sup>2</sup>University of Toledo

# 3-F-148 Do multivoxel patterns of activity within the hippocampus carry information about temporal duration contained within event sequences?

Sathesan Thavabalasingam<sup>1</sup>, Edward O'Neil<sup>1</sup>, Andy Lee<sup>1</sup>
<sup>1</sup>University of Toronto

# 3-F-150 Neurogenesis' Influence on Learning and Memory: A Computational Approach to Dynamics of Circuit Remodeling

Lina Tran<sup>1</sup>, Adam Santoro<sup>1</sup>, Sheena Josselyn<sup>2</sup>, Paul Frankland<sup>2</sup>
<sup>1</sup>University of Toronto, <sup>2</sup>Hospital for Sick Children

# Discover the Possibilities

Confocal image of mouse kidney captured with 1.25x objective using the FV3000.

#### Olympus introduces the new FLUOVIEW 3000RS

The Olympus FLUOVIEW® FV3000 series confocal laser scanning microscope combines usability with high-performance imaging capabilities so researchers can collect advanced imaging data quickly and easily.

- Fast resonant laser scanning microscope captures up to 438 frames per second
- New TruSpectral detection technology provides high sensitivity
- Designed for easy "macro to micro" imaging
- Fully upgradable design with up to 4 channels of high sensitivity GaAsP detection
- New, customizable and fully integrated acquisition and analysis software
- Low operating cost with an all-laser diode combiner system

#### Your Science Matters™

Contact your local Olympus confocal sales representative or visit: www.olympus-lifescience.com/en/ to learn more.

#### **CAN-ACN EXHIBITORS**

CAN-ACN receives support from a number of companies providing services to our community. Please show your apprecitiation for their support by visiting the exhibit booths during the conference to learn about their products and services.

# ALZET Osmotic Pumps/DURECT Corp Table 03

ALZET® Osmotic Pumps are miniature infusion pumps that provide convenient and precise delivery of solutions for up to 28 days, in animals as small as mice. These self-powered, fully implantable pumps require no external connections, and offer a superior alternative to repeated injections and external pumps. The pumps are implanted either subcutaneously or intraperitoneally. They can be attached to a catheter for local delivery, such as to the central or peripheral nervous systems. These innovative devices have been used in over 16,000 studies to deliver agents such as neurotrophic factors, gene vectors, siRNA, receptor antagonists and others.

Email *alzet@durect.com*Web *www.alzet.com* 

#### Animal Care Systems Table 04

Animal Care Systems manufactures the only motor-free rodent caging system in the industry. Combining ultra-high density with our unique carousel design, our caging provides a microenvironment that is free of noise, vibration, ultrasound and air turbulence, creating a variable-free environment. Our revolutionary motor-free direct exhaust method improves air quality for animals, personnel and the room. We have established a stellar reputation for our superior customer service and product support.

Email **info@animalcaresystems.com**Web **www.animalcaresystems.com** 

#### **ANT North America Inc.** Booth 18

ANT Neuro offers products tailored to the needs of scientists conducting both basic and applied neuroscience research. ANT's eego line of EEG products was developed from the ground up to allow collection of high density EEG and EMG data during movement, without compromising data quality. For studies involving stationary conditions, our EEG systems are available with up to 256 EEG channels, and with sampling rates up to 16 kHz/channel. In addition to EEG equipment, ANT offers the visor2 TMS navigation system with optional speech and motor mapping components. This system enables mapping of motor or speech cortical areas and image guided navigation of TMS coils.

Email **infous@gmail.com**Web **www.ant-neuro.com** 

#### Blackrock Microsystems Booth 15

Blackrock Microsystems is dedicated to providing enabling tools for neuroscience, neural engineering and neuro-prosthetics research and the clinical community worldwide. Blackrock?s Utah Array has been the benchmark for multichannel, high-density neural recording in human patients and animal models for more than two decades. They offer complete research setups that are easy to use, allowing scientists to focus on their research. The Blackrock team offers project support from conceptualization all the way through to data analysis and interpretation. They help researchers publish faster by ensuring the accuracy of their data. Blackrock Microsystems, empowering ephys.

# The Canadian Neurophotonics Platform Table 11

The Canadian Neurophotonics Platform is a technology platform that drives development of leading-edge photonics technologies for the study, diagnostics and treatment of brain diseases. Neurophotonics enables the investigation of neural circuits in a non-destructive manner, using light to activate, repress or simply detect activity in living tissues. The Neurophotonics Platform brings together the complementary expertise of leading Canadian chemists, physicists, neurobiologist and computational modelers who work in collaboration to develop and test novel neurophotonics tools and technologies. This close collaboration generates a rapid feedback loop for development of novel tools.

# The Centre for Drug Research and Development Booth 10

Headquartered in Vancouver, British Columbia, The Centre for Drug Research and Development (CDRD) is Canada's national drug development and commercialization engine. We work in partnership with academia, industry, government and foundations, to provide the specialized expertise and infrastructure to identify and de-risk promising discoveries generated by health-related research, and transform them into commercially viable investment opportunities for the private sector? and ultimately into innovative new therapies for patients. In doing so, CDRD is actively growing our national health sciences industry into a wholly-optimized generator of economic prosperity for the country.

#### **Mightex Systems**

#### Booth 16

Mightex is a leading provider of advanced light delivery and imaging systems for neuroscience and optogenetics. Our market leading Polygon400 patterned illuminator enables one to illuminate any neuron(s) at any location & time. The OASIS microscope/macroscope In Vivo platform is designed to provide reconfigurability/flexibility to work around a live animal. The new OASIS Implant allows users to can acquire real-time deep brain imagesvwith calcium imaging while simultaneously performing patterned illumination optogentics in freely moving animals.

Email **sales@mightex.com**Web **www.mightex.com** 

#### Neuralynx, Inc.

#### Booth 20

Neuralynx partners with researchers worldwide to provide the most advanced solutions for brain research. We develop intuitive, high-density, low noise, electrophysiology systems with custom integration features and devices. We deliver complete system solutions based on proven technology — meeting the specific performance and data quality demands of each experiment. Decades of innovation, flexible integrations, unmatched support of our partners, and the drive to improve people's lives — that's why over 700 animal and clinical research labs choose Neuralynx.

Email **sales@neuralynx.com**Web **www.neuralynx.com** 

#### **Neurescence Inc.**

#### Table 07

Neurescence offers a miniature fluorescence microscope that can simultaneously image MULTIPLE REGIONS of the brain and spine of freely behaving animals. With our device you SEE and LONGITUDINALLY MONITOR the activities of individual neurons in different regions, hence you can make a causal connection between your experimental parameter, such as behavior or drug, and neuronal activity in different regions of the Central Nervous System. We are a start-up in Toronto and are currently looking for early adopters. We offer you a significant discount and partner with you to ensure your success and publication in high impact journals, since it is a means of advertisement for Neurescence.

#### **NeuroNexus**

#### Booth 14

NeuroNexus is a global leader for innovative neural interface products and technologies to meet current and emerging needs in neuroscience research, neurosurgery, and neurostimulation. Our diverse line of products is used in species ranging from fruit flies to non-human primates to precisely record, stimulate, and deliver drugs across all areas of the nervous system. Our technologies and products are aimed at advancing brain research and therapies.

# Spectra-Physics, A Newport Company Booth 30

As the first laser company, Spectra-Physics is singularly focused on helping customers use precision laser technologies to advance science and propel industries forward. The company does so by offering groundbreaking technologies, deep applications expertise, disruptive cost-performance, and a commitment to world-class customer experience. Our product portfolio spans CW to nanoseconds to femtosecond, UV to mid-infrared, and fiber to DPSS lasers. We enable applications in industrial and microelectronics manufacturing, medical and life sciences, and scientific research.

#### **Thought Technology**

Table 06

Founded in 1975, Thought Technology is the world's leading neurofeedback and psychophysiological instrument manufacturer. Our instrumentation not only monitors and records a wide variety of physiological and mechanical signals, but also analyzes and provides feedback in real time, through a variety of auditory and visual means, to promote self-regulation and conditioning. Thought Technology is redefining EEG based biofeedback with systems that can take your practice into new realms of neurological self-regulation.

Email **helen@thoughttechnology.com**Web **www.thoughttechnology.com** 

#### Tucker-Davis Technologies Booth 17

Tucker-Davis Technologies (TDT) provides products for basic and applied research in the neurophysiology, hearing, and speech sciences as well as for general data acquisition applications. We offer a complete line of modular DSP-based data acquisition and stimulus generation systems. At TDT, we work closely to achieve our common goal: to supply you with the highest quality, most up-to-date technology available at an affordable price. We believe we can best meet this goal when all areas of our business work together in a cooperative and collaborative environment.

Email **rrojas@tdt.com**Web **www.tdt.com** 

#### Weston Brain Institute

Table 10

The Weston Brain Institute accelerates the development of breakthrough treatments for neurodegenerative diseases of aging, including Alzheimer's, Parkinson's and ALS. The Institute is Canada's largest privately funded national initiative. It directly supports world-class translational research through its focus on high-risk, high-reward projects, independent of commercial potential, using an innovative fast-track granting model. Support includes things like grants (up to \$1.5m), counsel and access to important networks. Funding for the Institute's Canadian programs comes from The W. Garfield Weston Foundation. International programs are supported by the Selfridges Group Foundation.

Notes		

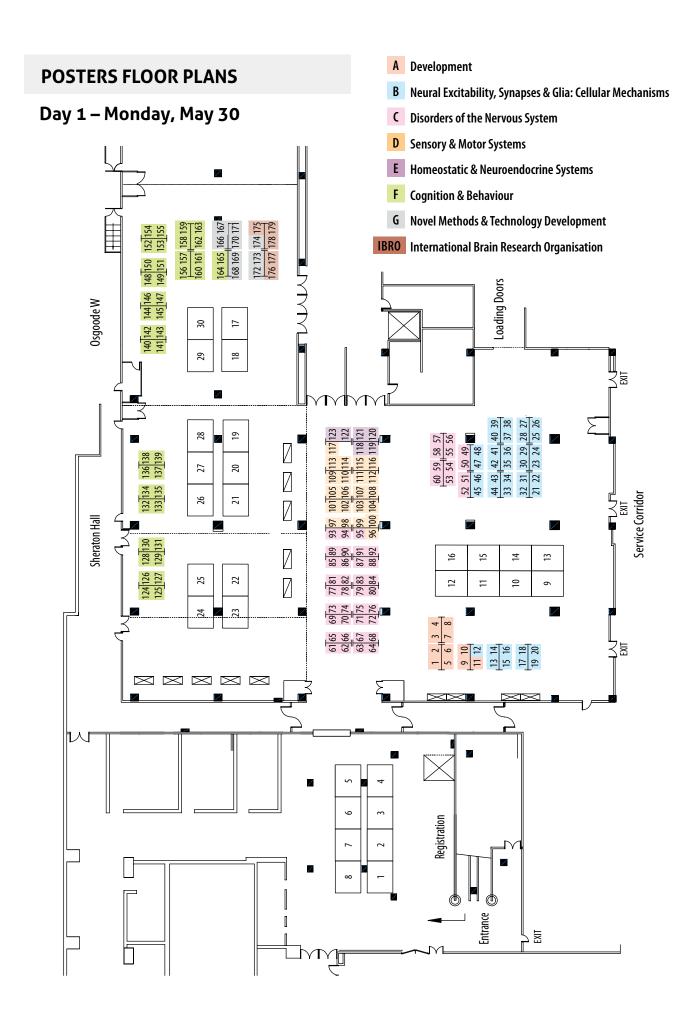

# Download the official CAN Mobile App!

Building on the well-received usage of our app, we are excited to bring you the 2016 edition of the official CAN Mobile Meeting App! The app is, once again, available as a free download for iPhone, Android, Blackberry and all tablets, and in a web version for all other web browserenabled smartphones. Maximize your time and experience with the CAN Meeting — scan the QR code to access the app.

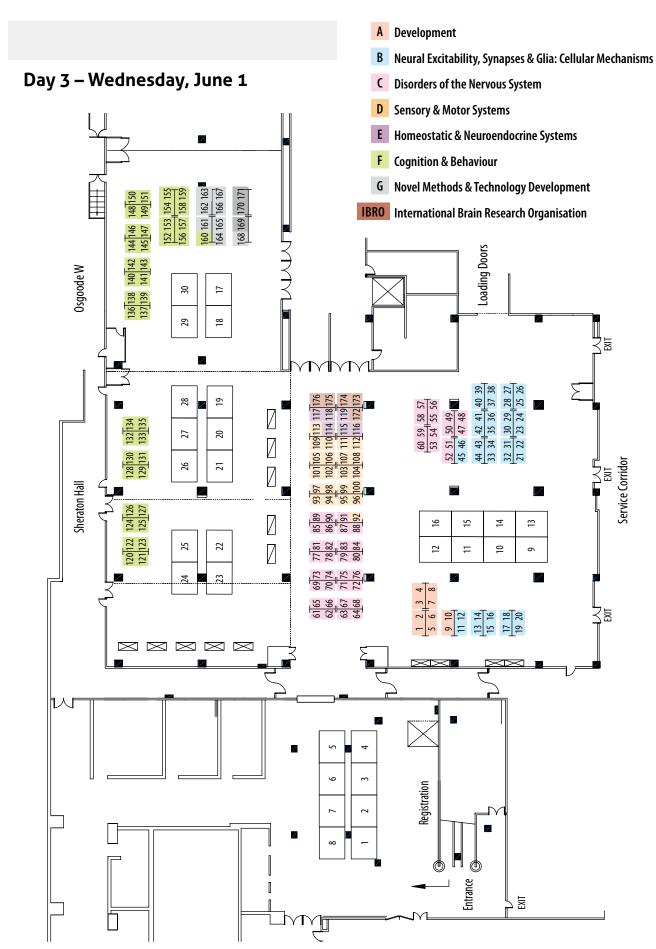

#### The CAN app allows you to:

- View all conference information (sessions, abstracts, speakers, exhibitors, maps, attendee profiles, etc.) on your mobile device
- Build a personalized schedule and access any session handouts
- Find information quickly with the search feature
- Opt into messaging with other attendees
- Receive important conference-related notifications and updates
- Take notes on your mobile device during specific sessions with the ability to extract the information later
- Browse local restaurants and attractions
- And much more...
